Below are the 5 main design and technological innovations of the new Public Works facility. IMPROVE TROMBE WALL PERFORMANCE

- Involves increasing the north-south spacing between the wings of the administration building from 16' to 22' 4". Reduces winter shading to improve heat gathering performance of the Trombe-walls.
- Incremental Cost: Approximately \$29,200 (\$2,343 annually @ 5%).
- Payback: Ten to eleven years, with positive cash flow beginning in year 3.

IMPROVE INSULATION AND REDUCE AIR INFILTRATION

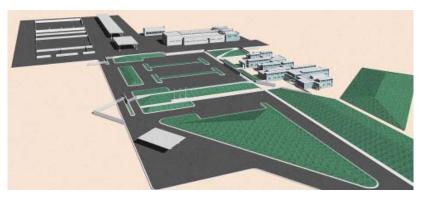

- Includes switching from fiberglass to cellulose insulation, revising certain framing details to eliminate thermal bypass.
- Reduces heating and cooling loads, improves occupancy comfort.
- Incremental Cost: \$49,430 (\$3,966 annually @ 5%). Payback:15 years, with positive cash flow beginning in year 12.

UPGRADED WINDOWS

Involves specifying high-performance windows on the north side of the buildings. This amounts to about 400 sq. ft. of windows on each of two buildings. Reduces heating load, greater occupant comfort.
 Cost: \$1,640 (\$132 annually @ 5% for both buildings. Payback: 1-2 years, with positive cash flow beginning in the first year.

REPLACE HOT-AIR HEATING WITH HYDRONIC HEATING

- Involves specifying a boiler-based heating system rather than the air-based system that is currently planned Heat from the boiler would be distributed via water-to-air heat exchange coils.
- Benefits: Heating-fuel flexibility, energy security and potential to reduce energy costs if a local fuel is used. This reduces vulnerability to fluctuating energy costs.
- Cost: \$412,500 (\$33,100 annually @ 5%, plus an additional \$10,000 annual O&M).
- Payback: Approximately 17 years, with positive cash flow beginning in year 18.

INSTALL SOLAR HOT WATER HEATING FOR VEHICLE WASH Involves installing a solar hot water collection and storage system to provide hot water for the Vehicle Wash facility, reducing energy costs.

Cost: \$8,500 per 2-collector system (\$682 annually @ 5%) Payback: Sixteen to seventeen years, with positive cash flow beginning in year 16.
