

SLDC, Public Review Draft, Public Comments- Week 7

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/22/2012		Timothy	Nolen	Pinon Hills Homeowners Assoc.	8		I am strongly, STRONGLY opposed to any development of the King Ranch into commercial and densly populated housing developments! Any development of this sort is wildy irresponsable and hateful to residents of Pinon Hills.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/23/2012	amanda.evans@sfcc.edu	Amanda	Evans	New Mexico Energy \$mart Academy	7	7.14	<p>"I would like to comment about the proposed HERS requirement for new county residential construction. I am very much in favor of this for two reasons.</p> <ol style="list-style-type: none"> 1. It helps take the energy burden off homeowners by lessening the energy bills for them. 2. It provides some parity with builders in the city. <p>I was a HERS rater in the city for several years before becoming the Director of the Center of Excellence for Green Building and Energy Efficiency and the New Mexico Energy \$mart Academy at Santa Fe Community College.</p> <p>The additional expense to pay for the building upgrades and the HERS rating have been estimated on average to add an additional 3 - 5% to the construction costs and that has been my experience. My husband, as a general contractor working in the city, also has had this experience.</p> <p>The benefits to the future homeowner are excellent. Their lower energy bills more than offset the additional expense for construction. The fact the Homewise and Centex/Pulte are still frequently building affordable houses in the city attests to the fact that it can be easily done. In fact, Homewise is usually building homes that have a HERS rating around 56, which is much lower than the required 70.</p> <p>As an educator, I find that the response from contractors that this will be too expensive or</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>too difficult is usually from a lack of awareness and education of how to build an energy efficient house. Many of the techniques such as advanced framing and avoiding thermal bypasses adds no extra cost to the job (in fact, advanced framing saves the builder money) but many builders are unaware of these new skill-sets. When I was a HERS rater in Santa Fe I would often have builders come to me for their first house with the new HERS 70 requirement with a very disgruntled attitude. By their second house it was an easy process and they were suddenly embracing the idea that they too were truly building efficient homes, using it in their marketing and in their outreach to homeowners.</p>
							<p>There is a 4-hour curriculum that we have developed (in English and Spanish) to address this lack of education which is freely available</p>
							<p>Energy efficiency is important on so many levels and it has been consistently shown that the energy burden on low income families is disproportionately high. I think that by requiring a HERS 70, the County will be enabling those who are looking to live in an affordable home a better opportunity to do so.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/23/2012	douglas.e.patrick@gmail.com	Douglas	Patrick		Appendix B		"Appendix B : Is there a legend for this spreadsheet? I don't understand it what do the numbers in the columns refer to? ? what does a p,c,x,a denote? Any hints"
10/23/2012	douglas.e.patrick@gmail.com	Douglas	Patrick			8	"I have a vacant 9.25 acre lot in the proposed rural residential zone (RUR-R) that I am planning on building on soon.It was part of a approved subdivision for residential use in the 1980s. I purchased the lot in 2006. This proposed zoning (RUR-R)has a density of 1 dwelling per 10 acres: Does that mean that I have to apply for a variance in order to build a Single Family home since my lot is just under that 10 acres?"

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/23/2012	Steve@GreenBuildingAssociates.com	Steve	Bradley	Green Building Associates.com	7	7.14	A HERS rating on every new house in the county gives a buyer the ability to compare energy performance between Santa Fe City and County homes. The additional costs to the owner-builder in the county will provide information leading to wiser decisions and lower energy bills repaying the cost of the HERS many times over the life of the mortgage. The cost to the production builder using the performance path will be minimal and provide a marketing tool.
10/23/2012	Steve@GreenBuildingAssociates.com	Steve	Bradley	Green Building Associates.com	7	7.14	Requirements for a certain HERS rating or better do not address the issue of Indoor Air Quality. Requirements for ventilation systems providing the requirements of ASHRAE 62.2-2010 would be a good start. Further education of the virtues of Heat Recovery Ventilators, energy recovery and quality of fresh air should be provided with any requirement for ventilation. For example, fresh air entering through cracks is not the same quality as fresh air through the ERV. Then the issue of depressurization of a home to gain fresh air should be discussed with the unintended consequences of unstable pressures.

10/22/2012	tnol41@aol.com	Timothy	Nolen		8		I am strongly STRONGLY opposed to any development of the King Ranch into densely populated housing or commercial properties. This sort of thing will be met by our organization with strong opposition, both legal and political. Do we want to turn Santa Fe into another slum like Albuquerque??

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/22/2012	joseigner@gmail.com	Joseph	Eigner	SERA (Sustainable Eldorado Residents Alliance)	7	7.14	<p>SERA (Sustainable Eldorado Residents Alliance) has a strong commitment to energy efficiency. In the recent past we have offered local homeowners free energy audits and we have promoted the installation of photo-voltaic electric generating systems at private homes and businesses.</p> <p>Although The Eldorado Subdivision is largely built out, we strongly support energy efficient construction in all new homes throughout Santa Fe County.</p> <p>For this reason we are delighted with Section 7.14 of the Sustainable Growth Management Code as presented in the September 2012 draft posted on the County's web site.</p> <p>The HERS 70 standard called for in Section 7.14.2.3 has been shown to produce energy savings greater than the monthly increase in mortgage payment due to the modest extra cost of meeting this standard. This was demonstrated in the October 24, 2011 study submitted by Erik Aaboe, the county Energy Specialist, done in collaboration with local construction experts. The standard clearly makes new homes in all price categories more affordable over the life of the initial mortgage, and more importantly, over the lifetime of the home.</p> <p>With energy prices predictably increasing over time the savings resulting from HERS 70 (compared to HERS 89, as shown in the Aaboe study) will rise every year.</p> <p>Another advantage of this standard is that</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
------	-------	------------	-----------	--------------	---------	---------	------------------

the Santa Fe City green building code also stipulates HERS 70. Adoption of this standard for the portions of the County outside the City will mean that builders will have a single, uniform energy efficiency requirement throughout the entire County - always a plus from their point of view.

With the wasteful energy systems of older buildings being one the largest contributors to man-made carbon emissions with their impact on global warming and climate change, we believe it is imperative that our Sustainable Growth Management Code does all it can to insure that our future building practices reduce such emissions.

Thank you!

This statement of support for Section 7.14 of the September 2012 draft was authorized by unanimous vote at the meeting of the SERA Steering Committee held on Oct. 20, 2012, the following attending:

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/22/2012	jmdstuff@jun o.com	Dennis	May				<p>Because of the impending SLDC and its UN Agenda 21 designs, I have sold off my property and divested myself of my other interests in Santa Fe County rather than get stuck with useless dirt due to the SLDC. Before any further action or approval, look to Florida and the east coast to see the damage that SDLC has done to those counties and to the effort to finally repeal those SDLC regulations.</p> <p>Good luck and I'm glad to be out of it.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/22/2012	cmesser@projecttruffle.com	Caroline; Gregory	Messer		8		<p data-bbox="1167 110 1703 524">Dear Sir/Madam, I am writing to protest the county's proposed re-zoning of my property under the proposed new sustainable land development code. My husband and I purchased our land parcel 1-042-124-259, tax id 79000703 in 2007 which is currently zoned Rural residential. The county now wishes to re-zone our property as agricultural/ranch as part of the sustainable land development code which we feel will be a financial detriment to us and to our property.</p> <p data-bbox="1167 573 1703 987">The property is located at 215 Rogersville Rd, Cerrillos NM 87010 and we began the process of developing the property in 2009. We built a 1200 sq ft guest house (which we are currently occupying), a horse barn and a storage structure, all fully permitted, on this lot and we have been resident here full time since 2010. We have also spent over \$50,000 in local architects plans and surveys to design a 3,000 sq ft main house on this property which will require us to apply for a mortgage to cover the cost of building.</p> <p data-bbox="1167 1036 1703 1344">If the county were to re-zone the property from Rural residential to agricultural/ranch this would severely limit our mortgage lender options and increase the mortgage rate vs that available through a traditional lender. We feel it will also devalue the land value when time comes for us to eventually sell, which was valued at \$577,500 for 275 acres i.e. \$2,100/acre by the county in 2010.</p> <p data-bbox="1167 1393 1703 1455">It seems unfair that other vacant and developed land parcels immediately</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>bordering our parcel to the east, west and north on Rogersville will be allowed to remain Rural residential and thus remain sub dividable into much smaller 40 acre Rural Residential lots while we, the only developed lot of all the proposed Rogersville properties to be re-zoned on Rogersville as ag/ranch, could never subdivide since the lot size would need be 160 acres for Ag/ranch. Several of my neighbors properties are currently used for agricultural grazing and in 2012 we also re-instated the agricultural grazing tax exemption on this lot which the county assessor's office incorrectly removed after we purchased the land.</p> <p>We have no plans to subdivide, in fact we own 4 additional lots to the south and north of this lot ranging from 20-210 acres that we purchased to prevent them from being developed and we plan to continue to use the property for grazing purposes. However, we are very concerned of the negative de-valuation and financial limits for any future mortgaging the re-zoning the 275 acre property to AG/Ranch will bring.</p> <p>This is not a high development growth area, no other property has been built on Rogersville Rd (which is over 6 miles long!) since we built in 2009 and only 1 other house in addition to ours, has been built on Rogersville Rd in the last 10 years during the peak of the property market!! The properties here are remote and all off-grid (i.e. require solar power) and accessed by a private dirt road making it difficult and expensive to build so we think the re-zoning is unnecessary.</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

We therefore hope you will re-consider removing the proposed re-zoning of this property and allow it to remain rural residential. We look forward to hearing back from you.

Kindest Regards,

10/22/2012	heidieynon@yahoo.com	Heidi; Derek	Cunningham		8/7?	I am writing to oppose SDA-1 planned for the King Ranch adjacent to Pinion Hills. As a resident and association member of Pinion Hills, I do not feel this change is in the best interest of homeowners. Other SDA-1 zones in the plan are generally located well away from existing residential developments. The designation of the King property as SDA-1 is anomalous and inappropriate.

10/23/2012	dclark@cybermesa.com	Doug	Clark	Chimayo Citizens for Community Planning	7	7.16.5.1	<p>There needs specific definitions throughout this section that delineates "reconnaissance" from "intensive" survey... This should be "intensive survey". ie: use SOI guidelines..."</p> <p>Survey techniques may be loosely grouped into two categories, according to their results. First are the techniques that result in the characterization of a region's historic properties. Such techniques might include "windshield" or walk-over surveys, with perhaps a limited use of sub-surface survey. For purposes of these Guidelines, this kind of survey is termed a "reconnaissance." The second category of survey techniques is those that permit the identification and description of specific historic properties in an area; this kind of survey effort is termed "intensive." The terms "reconnaissance" and "intensive" are sometimes defined to mean particular survey techniques, generally with regard to prehistoric sites. "</p> <p>http://www.cr.nps.gov/local-law/Arch_standards.htm</p>

10/23/2012	geoancona@gmail.com	George; Helga	Ancona		8/7?		As a resident of Pinon Hills and a member of the West Santa Fe Association, I am opposed to the rezoning of the adjoining King Brothers Ranch property to Sustainable Development Area (SDA-1). The current zoning would be more appropriate. Keeping it zoned for 2.5 to 10 acre single family lots would be more in keeping with our own residential neighborhood. I would not like to live next to increased density, commercial and or industrial area. I'm sure it would reduce the value of our homes.

10/23/2012	phcrumpsf@gmail.com	Philip	Crump		4		<p>As a longtime Santa Fe resident as well as longtime facilitator in the City of Albuquerque Land Use Facilitation Program (see http://www.cabq.gov/legal/legal/adr/luf), I have been following with great interest the emergence of the County's Sustainable Land Development Code. County Commissioners and planning staff are commended for taking on this important and monumental task and seeing it through to completion.</p> <p>In my dozen or more years as a facilitator in the Albuquerque program, I have experienced the value in allowing neighbors and interested organizations review and comment upon development applications that will impact them. Often, early review allows for changes in plans that make projects more suitable for their locations and uses. Indeed, the more savvy private planners and agents often voluntarily request meetings with affected neighborhood associations prior to submittal. For "big box" projects, the City requires significant pre-application effort.</p> <p>With regard to the SLDC, I propose inclusion of a "Facilitated Public Meeting" column in Table 4.1, immediately following "Agency Review;" this allows for a facilitated meeting if the reviewing staff or officials (or, indeed, the developer or affected ROS or COs) deem such as necessary to resolve issues in the application. This would be in addition to the Pre-Application meeting. (I am not entirely clear with regard to the sequence of events</p>

10/25/2012	beholdenlife@gmail.com	Barbara	Holden		Zoning Map	zoning map	<p>After reviewing the Proposed Zoning Districts 10-4-12 we oppose one of the proposed zones laid out for the Cedar Grove area, specifically the zone labeled Public/Institutional (blue) on your map. This Public/Institutional zoning is not even defined anywhere in your documents. This particular "blue" piece of property on your map has been zoned Ag/Ranch. During a contested Board of County Commissioners (BCC) decision of November 2010, the BCC approved the use of that land for a community service facility (CSF). The South Mountain Neighborhood Association of the Cedar Grove area filed an appeal of that BCC decision. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." Therefore, though the BCC approved the use of the land for a CSF, the zoning was NOT changed. Therefore, the SLDC should NOT change this land's current zoning and show that land as the original zoning of Ag/Ranch. Additionally, the organization that had planned for the CFS use has decided not to pursue that use or build on that land. This area is up for sale. Since no development has been started, this land use is still Ag/Ranch and not a Community Services Facility. Our understanding is that if this land is not developed within 5 years this land use designation would revert back to Ag/Ranch. Since it is up for sale at this point, we believe it makes more sense to remain as its original zoning of Ag/Ranch or Rural which is compatible with the surrounding zones.</p>

area whose current uses are more dense be shown as legal non-conforming uses. That would, among others, keep the zoning simpler and biased in favor of preserving the rural residential living in this area adjoining the Santa Fe National Forest. It would also make a more compatible transition to the National Forest.

On the related issue of height I think the maximum height for a building in the area, as well as its accessory structures, should be limited to 16' which roughly is the height of the dominant trees in the area – pinon and juniper. Such a limitation would prevent the construction of more two-story buildings which rise above the dominant tree line and create eyesores for neighbors. As you know, the maximum height in the current Mountain Special Review District is 14' and outside of it I think is 24' which is too high and allows second story houses.

On the related issue of lighting, I think the whole area should be blanketed with a lighting restriction which requires all exterior lighting to be shaded on the top and sides so that it is just visible on the land of the owner and not an eyesore nuisance to neighbors. We already have enough light pollution in the area in the adjoining City of Santa Fe which prevents a clear view of the night sky.

Finally, on the related issue of setback, I think the proposed general boundary setback for structures on a lot of 25' is reasonable although it might be increased to 50' on all sides of a lot in the 10 acre Rural

Residential Zone.

Aside from trying to protect the rural residential character on the east side of this entrance to Santa Fe, the foregoing zoning would help protect the natural beauty of the entrance and stop further urban and suburban sprawl and reflect some demarcation between the urban city and the rural landscape adjoining it.

10/26/2012	linda.me.auton@me.com	Linda	Auton		zoning map	zoning map	<p>This letter is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, rather the "blue area" should retain it's original Ag/Ranch zoning.</p> <p>During the 2009/2010 time frame, owners of that "blue" property requested county approval of a community services facility (CSF) development rezoning/master plan. Based on many technical and environmental issues, that development met with massive disapproval by residents of the Cedar Grove community as well as many Edgewood residents. When the Board of County Commissioners approved the rezoning/master plan request, the Cedar Grove community filed an appeal of that decision on the basis that the county did not follow legal process regarding rezoning of the property. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." And, therefore, the community's appeal was lost. Although the CFS use was approved, there was NO actual rezoning of the property.</p> <p>Therefore :</p> <ol style="list-style-type: none"> 1. For the SLDC to change the zoning of the "blue" area to "Public/Institutional" from its current Ag/Ranch zoning would be to change the zoning without a request by the community or approval by the community to change the zoning. One of the arguments used during the community's appeal of the BCC decision was based on the case of Miller

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>v. City of Albuquerque, 89 N.M. 503, 554 P.2d 665 (1976), in which the New Mexico Supreme Court confirmed that initial zoning determinations are presumed correct, but in cases involving interference with a zoning plan the burden of proof shifts to the local public body to show that a rezoning was necessary as a result of a mistake in the original zoning or a change in conditions in the neighborhood. Since there was no mistake in the original zoning of Ag/Ranch and there has not been a change in conditions of the neighborhood, the current zoning of Ag/Ranch should not be changed by the SLDC.</p>
							<p>2. The Cedar Grove community was assured by Santa Fe county that if the Boys and Girls Ranches of New Mexico (The Ranches) did not develop their CSF within 5 years of approval of their Master Plan they would lose the CSF use approval and the property's use would revert back to Ag/Ranch. The Ranches have declared that they will not pursue development of their CSF and the property is currently listed for sale. Should a new owner want to develop a CSF on that property they would need to begin a new process for development approval. We are now 2 years into the 5 year period. It is extremely unlikely that development of the proposed CSF or a different CSF would begin in the next 3 years. Therefore, the original Ag/Ranch zoning should stay in effect for that "blue" area.</p>
							<p>3. Changing the zoning to "Public/Institutional" (which is not defined) would be breaking faith with the Cedar Grove</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
------	-------	------------	-----------	--------------	---------	---------	------------------

community. If the property is sold, and the new owner wishes to develop some kind of "Public/Institutional" facility, then they can begin the process of requesting a change of zoning. A reasonable development request, that would be in the interest of the community, would likely be approved by the community.

Therefore, this is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, and to say that this "blue area" should remain as it's original Ag/Ranch zoning.

10/26/2012	warrenthompson@mac.com	Warren	Thompson	Univest-Rancho Viejo LLC	6		<p>The Studies, Reports, and Assessments in Chapter 6 present several issues that should be carefully considered. First, the cost of housing will increase. These documents and the resulting conditions imposed by the approval process will necessarily be passed along to the consumer, in addition to the costs they will bear for affordable housing, energy efficiency, and impact fees. While all of the goals are admirable, the result could be a significant increase in the cost of housing. The net effect on development may not change much at all, but the cost will definitely be higher. I know that the SLDP and the SLDC have been in the development phase for a number of years and I'm sure there must be a desire to bring an end to this process by approving the code, but the public review process, comment period, and input process has gone by in a flash. Please take the time necessary to think through the implications of this document so that unintended consequences may be minimized.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	warrenthompson@mac.com	Warren	Thompson	Uninvest-Rancho Vieo LLC	4		The approving body's broad discretion dramatically increases the uncertainty and risks of approval and creates a more politicized approval process. The net effect on development may not change much at all, but the cost will definitely be higher. I know that the SLDP and the SLDC have been in the development phase for a number of years and I'm sure there must be a desire to bring an end to this process by approving the code, but the public review process, comment period, and input process has gone by in a flash. 10/26/2012	snucci@aol.com	Ralph	Hill		5/12	5.8.4.3.4.	County has the capability of doing a title search itself. Why should the owner bear the expense for a title insurance policy when he is giving dedicated lands and improvements to the county?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	snucci@aol.com	Ralph	Hill		5	5.8.5	Chapter 12.11 has 16 pages of Development fees. There appears to be no cap on development fees nor limit to their scope. Present impact fees cover fire and rescue only. A recent example is a minor subdivision Lot split cost a \$952 impact fee for a 3 acre lot valued at \$35,000. The new provisions in the SLDC provide for the first seven years of capital Improvements on roadways, water, law enforcement, fire and rescue, Parks and Recreation areas, open spaces, trails, and trailheads. Cost could be enormous and destroy low income housing construction. This is especially onerous for the first developer in an area where subsequent developers are benefiting from his initial outlay. An example is Max Hill paving West Venus road and subsequently used by the Edgewood Middle School and First Choice health clinic. No reimbursement to Max Hill. Will there still be an impact fee on top of the development fees? Will fees come back to the contributing community and not lost in administration as currently occurs?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	snucci@aol.com	Ralph	Hill		5	5-2	Table 5 – 2 is misleading as it shows a minor subdivision plat taking 40 days for approval. Our experiences are that it can take up to six months just to meet the qualifications for the application process And all the signatories on the plant itself. The fire marshal was probably The slowest. An example is the cost for a minor lot as stated above the 3 acres was \$3552, including survey and impact fees. One of the planner's initial goals was to clarify zoning regulations and streamline the development review process.

10/26/2012	snucci@aol.com	Ralph	Hill		5	5.12-5.13	5.13 and 5.12.appear to be Curious responsibilities for the Board of County Commissioners and the administrator. These are normally responsibilities of the Board of Realtors and the Attorney General. How does the Board intend to enforce these?

10/26/2012	mww@rt66.com	Michael	Wiese	West SF Association	8/7?		Representing the Piñon Hills neighborhood, immediately to the east of the King Ranch, we are most concerned about the designation of that ranch as SDA-1. The close proximity to our established, semi-rural community is inappropriate and unlike other SDA-1 designations in the plan. We would strongly recommend a Rural Residential (1dwelling per 10 acres) to Residential Estate (1 dwelling per 2.5 acres) zoning designation for this area, in keeping with the surrounding community.

10/26/2012	mww@rt66.com	Michael	Wiese	West SF Association	7	7.15.3.5	<p>In our area, when we were governed by the EZA, we had a 30% minimum open space requirement. This worked very well where it was included. We asked developers if this was a problem for them and they said no. Even if the open space is private, if there is a public trail through it, it makes for an excellent area wide trail system. We strongly support an open space and trail system, in areas where density is 2.5 acres – 5 acres. It can also be used to protect wildlife corridors or archaeological areas.</p> <p>When the density is greater, the open space should increase up to 50%. When the density is smaller, the open space in a subdivision should decrease. For example at 160 acres (maybe even 80 or 40), there is no need for open space. So there should be a gradual decrease in the percentage.</p>

10/26/2012	mww@rt66.com	Michael	Wiese	West SF Association	7	7.15.3.3	7.15.3.3? (this section should be 3). The goal of the code should be to create a multimodal transportation system. If this can be accomplished off-trail, so much the better. If it can overlap with a recreational trail system, better still.

10/26/2012	tandres@q.com	Theo	Andres		8/7?		<p>I strongly object to the rezoning being proposed in the SLDC for the property owned by the NM Boys and Girls Ranches, namely the 968 acre tract in the Cedar Grove area of southern S F County.</p> <p>This parcel, shown as blue on your proposed zoning map, is zoned Ag/Ranch. During a contested Board of County Commissioners (BCC) decision of November 2010, the BCC approved the use of that land for a community service facility (CSF). The residents of this area, via the South Mountain Neighborhood Association of the Cedar Grove area, so strongly objected to the intrusion of an entirely out-of-place institution in the midst of our very rural area, that we filed an appeal of that BCC decision to them followed by another to the judicial system. [And note that people here put up their own money for legal representation, so strongly did they feel.] Judge Singleton, District Judge of the First Judicial District of Santa Fe County, ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." Therefore, though the BCC approved the use of the land for a CSF, the zoning was NOT changed. Hence that parcel is still zoned as before, Ag/Res. The application to build that institution sits idly, the applicant has stated publically that he has abandoned his plan to build it and the land is currently for sale.</p> <p>While none of us in the area has managed to find the proposed zoning's definition(Public/Institutional), we still, as in</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

2010, find it altogether inappropriate to plunk down any "institution" or any other non-residence into the middle of a rural residential area. That would forever change the nature of this area as quiet, peaceful, and very rural. Most of us carefully checked the zoning of our parcels before purchasing, as we understood that the zoning gave us the right to presume that new construction would also have to abide by the very same zoning we ourselves did, unless there were really strong reasons to do otherwise. That is how important it is to us to keep the nature of our area this way.

Are there two sets of rules at play in who influences the new zoning map? One for the residents, another for businesses and "institutions"? I have trouble not suspecting that a possible purchaser, one requiring the land be rezoned for the sale to go through, has arrived on the scene. We know none of the residents is pushing for this rezoning.

Another point against zoning for the like of institutions: to what extent have you considered the water use by such entities? Do you have data regarding that question for this area? Is it recent? It would be foolhardy and derelict of duty for the County not to weigh that issue based on solid numeric data and reasonable modelling for projection into the future.

There is a level of idealism in the notion of citizen input being solicited in the design and construction of the SLDC. It suggests that we citizens should have a big say in what happens in our neighborhoods. Please do

10/26/2012	tgass@earthlink.net	Toby	Gass		6	6.7	10. Regarding the components of a traffic assessment, I would like to see analysis of how the proposed roads would affect existing use by bicyclists, pedestrians, and equestrians.
10/26/2012	tgass@earthlink.net	Toby	Gass		5	5	11. Somewhere in the evaluation process for new subdivisions, I would like to see analysis of effects on what might be termed "traditional use trails" that are in the path of the new development. Such trails should either be preserved or replaced with an equivalent. There might be language on this issue in the TAP community plan.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.6	12. There are quite a few standards regarding planting of trees. Trees are aesthetically pleasing, effective screens, and can often have a cooling effect. Trees also consume large amounts of water. Many urbanizing areas in the Interior West that have planted trees in greater density than they naturally existed are seeing their water tables drop, specifically as a result of urban tree planting programs. Even if the trees are irrigated with roof water, much of that roof water will be lost to transpiration by the trees rather than ending up recharging groundwater supplies. The amount that would be lost to transpiration can be estimated.
10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.8	13. P. 104: I would like to see broader application of Dark Skies criterion for outside lighting. There are too many exemptions in this section. 900 lumens, for instance, is too bright to be unshielded. Numerous studies are showing deleterious effects of outside lights on a wide variety of nocturnal animals; this is not just a question of being able to see the Milky Way.

10/26/2012	tgass@earthlink.net	Toby	Gass		8	8	14. The zoning predicts increasing “urbanization” of SDA2, but it also seems to promote increasing urbanization of SDA2. I’d like to see a greater attempt to preserve more of the rural character, however much remains, in SDA2.
10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.11	15. The road standards for SDA1 and SDA2 should differ. Many of the road standards seem questionable, such as requiring 2 4’ wide sidewalks on roads with 0-300 trips per day. Further, bike lanes might be advisable on collector roads, depending on speed limits, amount of traffic, etc.
10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.13	17. P. 139 It is not clear to me why plants being irrigated for sale need to be watered in the middle of the day. These businesses, if anyone does, should have the capability to water automatically during the cooler hours.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.13	<p>18. P. 143 I'm all for water conservation but have doubts about requiring cisterns and drip irrigation systems on all construction. Depending on the landscaping, a drip irrigation system may be completely unnecessary. Local landscapers routinely install cisterns that automatically switch to domestic water if the water level in the cistern is low. I'm guessing that most people who water from cisterns have no idea when they are using rainwater as opposed to domestic water. My personal anecdote is that I recently interviewed several landscapers regarding construction of a fairly simple rainwater and gravity based system on my property. Several of them tried to push the whole house cistern+drip on me. I finally found someone who did not do that. I will be installing a much simpler system that will use rainwater to meet my water needs at a savings of \$15,000 compared to the cistern+drip system.</p>

10/26/2012	tgass@earthlink.net	Toby	Gass		7	7.13	<p>Putting all roof water into cisterns eliminates groundwater recharge by the total roof surface are in future developments.</p>

10/26/2012	tgass@earthlink.net	Toby	Gass		8	8.11	35. P. 191 Again we need to see the proposed overlay zones. It is difficult to know whether or not the proposed code makes sense without being able to see where it might apply.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	tgass@earthlink.net	Toby	Gass		10	10.6	<p>36.2P. 203 Several years ago, the BCC provided an amnesty to those with unlicensed home occupations, instructing staff to issue permits to unpermitted businesses. These permits were issued without inspection of the premises. This resulted in grossly inappropriate businesses receiving permits, businesses that would not have received permits had an inspection occurred. I want to make sure that these now-permitted but never inspected home businesses are not grandfathered in when the new code passes. As an example of what I'm talking about, the home business owner about 1/8 mile from my house leveled and mass-cleared almost an acre of land, filled an arroyo, constructed 2 outbuildings on the fill, and created a yard for construction equipment (dump trucks, front-end loaders, boom trucks, etc.). This was all unpermitted but he got a permit during the amnesty. The precedent having been set, another contractor – the second one being a concrete business – bought a nearby house and did the same thing. How do we prevent this from being grandfathered in to the new code? Also, I don't think the criteria for home occupations address this kind of situation – multiple family members involved in a heavy-equipment business. They are all family members and no patrons come to the home. The family members leave the home each day to go to work in a parade of dump trucks, boom trucks, tanker trucks, earth-moving equipment, and trailered heavy equipment. This is in an area that would be considered RES-F 5 or RES-E 2.5.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	tgass@earthlink.net	Toby	Gass		4	4.8	37. There should be a neighbor notification requirement prior to granting home occupation permits. Perhaps everyone sharing the access road within ½ mile and everyone adjoining the property.
10/26/2012	tgass@earthlink.net	Toby	Gass		10	10.10	38. PP 210-211. What is the difference between a temporary produce stand (p. 210) and an itinerant vendor selling fruits, vegetables, berries, eggs, or farm produce (p. 211)?
10/26/2012	tgass@earthlink.net	Toby	Gass		Appendix B	Appendix B	39. I would like to see temporary sale of fruits, vegetables, berries, eggs, or farm allowed anywhere, and certainly in the various RES areas.

10/26/2012	siebert.associates@comcast.net	James	Siebert				<p>Regarding the Disconnect Between Sustainable Growth Management Plan (SGMP) and SLDC:</p> <p>Planning Works in conjunction with Dr. Freilich prepared the initial draft of the SGMP, creating an unintelligible document 1100 pages in length that had no correlation with the County residents' ideas or beliefs on planning for the future of Santa Fe County. The neighborhood organizations, development community and citizens as a whole were so disillusioned with the document that Land Use staff was directed by the County Commission to redo the Plan in a manner that represented community based planning goals and objectives. Most people would agree that the current SGMP is an accurate assessment and statement of what land use policies the County would like to achieve over the next 20 years.</p> <p>Dr. Freilich also prepared a draft of the SLDC as an adjunct to the SGMP being prepared by Planning Works. Much of the proposed SLDC is derived from the Dr. Freilich's and Mark White's book 21st Century Land Development Code. Like the original draft of the Sustainable Growth Management Plan the SLDC is cumbersome, overly complicated and most importantly does not relate to the policies and goals of the current Plan. For the most part, the Code drafted by Dr. Freilich was based on his model code which may be appropriate for major urban centers but has no relation to rural counties.</p> <p>Recommendation: Just as the first draft of the Sustainable Growth Management Plan was reevaluated</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
------	-------	------------	-----------	--------------	---------	---------	------------------

and staff directed to bring the Plan in line with citizen perspectives on the direction and management of growth in the County the current draft of the Code needs to focus drafting succinct and understandable language to implement the goals and objectives the SGMP. If there is no correlation with the SGMP the language should be stricken from the SLDC.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	siebert.associates@comcast.net	James	Siebert				<p>Regarding County Costs: There needs to be a careful assessment of costs both for the County to implement the Code and for the applicants and residents to comply with the Code. The costs to the County would include a Hearing Office with a law degree, certified by the Bar Association, licensed in New Mexico with six years of experience, including soft and support costs. Extra staff will have to be hired to administer the Code, especially in light of limited time schedule for review of the applications.</p> <p>For example, there is 30 day time period from BCC action to prepare and act on the "Findings of Fact and Conclusions of Law". This time period should be compared to the current time lag between the BCC action and the finalization of the "Findings of Fact and Conclusions of Law", which typically averages three months. Given the fact that current work load exceeds staff capacity the only way to shorten the review period is to add more staff. The same is true for other stages in the development review process. In addition to the shortened review periods and given the complexity of the development applications additional staff. In addition to the shortened review periods and given the complexity of the development applications additional staff will be required to comprehend and review the extraordinary submittals required by the Code.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	siebert.associates@comcast.net	James	Siebert				<p>Regarding Applicant Costs: Staff or consultants need to prepare an estimate of costs to comply with the application and submittal procedures and requirements of the Code. Such costs would include preparation of the "Studies, Reports, and Assessments", legal notice per the 500 foot radius standard and other extraordinary submittal standards. Although the actual costs for submittal of the various applications to the County are supposed to be developed later, it would be important to include these in the cost analysis. The review of costs needs to include the fiscal impact from the affordable housing requirements. The cumulative effect of the various costs may severely restrict residential development.</p> <p>There is a relevancy factor for the "Studies, Reports and Assessments" which although a recommendation in the SGMP needs further review to determine if the costs of preparing the studies adds value to the development review process.</p> <p>An exercise in costs might include an evaluation of the recently approved BTI application, and what financial impact would result from the draft: Code on this much warranted project. The cost evaluation needs to include the cost of impact fees to be imposed by the draft Code.</p> <p>Recommendation: The County needs to understand the real and substantive costs to be imposed on the community by enactment of the draft: Code and consider the deterrent this would have on future economic development in Santa Fe County.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	siebert.associates@comcast.net	James	Siebert				<p>There is an underlying tone in the Code that Business is not the most appropriate type of development for Santa Fe County. There is reference to targeting certain industries, such as film and cinematography, and the County has proven their commitment by guaranteeing the financing for this business.</p> <p>Although BTI does not fit neatly into the targeted businesses set forth in SGMP it shows the County's commitment to encouraging businesses with well-paying jobs. These businesses are a substantial economic asset to the County and will hopefully prove to be the foundation that supports local business to grow here and other businesses to relocate here. Given the fact that State and Federal government employs fewer workers than it has in the past (there are 14 percent fewer state employees than four years ago) it is not government that will bring us out of the current fiscal crisis. The best hope for improving our local economy will have to come from the private sector. The more impediments that government puts in the way of the private sector the less likely that our local economy will see any improvement. At a time that other communities are eliminating or reducing impact fees to encourage development, including Albuquerque, Rio Rancho and even Santa Fe, the draft Code is proposing to impose what looks like some of the most onerous impact fees ever enacted in the Southwest. Santa Fe County is heavily dependent on</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>property tax revenue to support its annual budget. Along with a decrease in land and property values, that have been recently reassessed, there will be a decrease in revenues to the County. The County's ability to provide an adequate level of government services to its citizens is dependent on its ability to increase its sources of revenue.</p> <p>By its financial support of BTI and the movie studios, the County Commission has demonstrated its willingness to work cooperatively with the private sector. The draft Code is contrary to that policy and contrary to creating an economic foundation that provides jobs for our youth and stops the exodus of our trained professionals that are moving to other states for employment.</p> <p>Recommendation: Through the SLDC, seek ways to support the private sector, especially for businesses and developments that create employment.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	siebert.associates@comcast.net	James	Siebert				<p>The complexity of the SLDC draft will not only require additional staff to administer the Code but will necessitate the re-education of existing staff. Give the level of complexity it will most likely take several years for staff to understand the intricacies of the Code. During that time the implementation of the SLDC will run counter to what the County would like to achieve, which is consistency and uniformity of processing and enforcement. Given the complexity of the Code staff will have to interpret the standards and requirements resulting in greater discretionary action in the implementation of the Code.</p> <p>Recommendation: The SLDC needs to be simplified and made more understandable to the community and Land Use staff. The goal of the Code should be to ensure that all applicants are treated equally in its administration and enforcement.</p>

10/26/2012	ursus154@gmail.com	Jim	Hannan		7	7.15	<p>1. My comments pertain to Section 7.15, Open Space.</p> <p>2. I agree with the sentiments expressed in 7.15.1, Purpose. Designated open space does add value to a development.</p> <p>3. However, I believe that much more can be added to this section. The only real planning recommendation is to build a neighborhood park. There is no language in this section about preserving open space or creating trails. Given the detail in other parts of the draft SLDC, this seems to be an oversight. I strongly recommend that county staff add language to the final approved SLDC that will give much greater attention to both open space and trails, as this document will oversee land development for many years to come.</p> <p>4. I would recommend that the county adopt a percentage open space requirement for new subdivisions. I believe there is history with such a requirement in the EZA. For subdivisions with 2.5 acre lots, a minimum of 30% open space might be appropriate. As the density decreases, the open space requirement could also decrease, perhaps to the point of 160 acre lots requiring no open space dedication.</p> <p>5. It is unfortunate that there is absolutely no language at all in this draft regarding trails and access to trails. If the county does not act now, in this SLDC, we will find that much of the county will have been "locked up" in terms of trails and access. I think we all</p>

understand that our current transportation system of one car, one driver is becoming obsolete. Santa Fe County should be in the forefront of advocating for different travel options. As gas prices continue to rise, it is important that we keep our options open for lower cost ways to travel. Trails that connect that allow for pedestrian and perhaps bicycle movement are essential to this goal. In the draft SLDC there is section 7.15.3.3, Trails, which is an empty line. This is a subject that not only concerns large subdivisions, but also smaller parcels as well. If there are historical trails in place, the county should try hard to make sure that they are not ended by one or two property owners that decide to fence off access.

6. In some parts of the county, there may be a need for trailheads. I recommend language in the trails section that addresses the issue of trailheads, including providing parking for some amount of vehicles. I don't have a specific recommendation, but by inserting language about this now, the county will then have some standing to require this going forward.

10/26/2012	ursus154@gmail.com	Jim	Hannan		12	12-1	My last comment relates to Table 12-1 and the Levels of Service for open space and trails. In my opinion, these levels of service are much too low. Right now there is not enough open space and trails in Santa Fe County. Given the value of both, as stated in 7.15.1, the county should be going for much higher levels. We all know that Santa Fe County will continue to add population. Without sufficient open space and a trails network, the quality of life in the county will be less than optimal.

10/26/2012	screechowl@q.com	Paul	Noble		zoning map	zoning map	<p>After reviewing the Proposed Zoning Districts 10-4-12 we are not in agreement with the zones laid out for the Cedar Grove area. The zone labeled Public/Institutional (blue) on your map is not even defined anywhere in your documents. This area is up for sale and the zoning had been changed to Community Services Facility in Nov. 2010 from Ag/Ranch. Our understanding is that if this land was not developed within 5 years this land zone designation would revert back to Ag/Ranch. This land is currently not officially a Community Services facility zone either until development has occurred so it is still pending. Since it is up for sale at this point, we believe it makes more sense to return it to its original zone of Ag/Ranch or Rural which is compatible with the surrounding zones.</p> <p>To re-label this zone and this particular property as Public/Institutional would mean another zone change before that 5 year period is up. Any public or institutional use of this land will be fought by this community for all of the same reasons we fought the NM Boys & Girls Ranch Master Plan. We feel that this is just another example of the County being influenced by special interests rather than looking at options that would be in the best interest for the residents here in Cedar Grove.</p> <p>I am sure that when the rest of the community gets wind of this zoning you will receive lots of feedback. The Independent Newspaper also stated that Edgewood residents have been encouraged to develop</p>

10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonweal Conservancy	7	7.11	<p>Table 7-12 - Maximum grades for Minor Arterials are 8% in the current code, but the proposed urban standard in the SLDC is 5%; Collector roads have allowed a maximum grade of 10%, but in the revised SLDC they are limited to 8%; subcollectors have been 11% until now, but are proposed to be 8%; local roads are currently 11%, but are proposed to be 7% or 6% for alleys and driveways. With this set of changes, allowable road grades would be measurably reduced by the SLDC.</p> <p>Given Commonweal’s experience with a “topographically diverse” site (i.e., the Galisteo Basin Preserve), restricting road grades could risk greater impacts on the surrounding landscape. Re-contouring steeper land areas in accordance with the SLDC road grade standards could cause unnecessary site disturbance (especially with 3:1 setbacks for re-vegetation) with little improved public safety.</p> <p>In a time of increasing climactic aridity, we believe that the County would be well advised to pursue development strategies that minimize site, soil and vegetation disturbance whenever possible. Accordingly, allowing road grades in the SLDC to match the current standards would be recommended. The Implications for Trenza are as follows: Given the potential impact of the SLDC’s planning and development requirements on Commonweal’s proposed mixed-use/mixed income community (i.e., Trenza), the impact of this section of the SLDC requires fuller discussion. This said, our</p>

------	-------	------------	-----------	--------------	---------	---------	------------------

immediate questions include:

If Trenza is designated a Planned Development District, we assume that its roads would be considered Urban roads. Urban travel lane widths would be allowed to be narrower in new code: collector roads have been 12', as opposed to a proposed 11' width; local roads have been 10-12', and are now proposed to be 10'. Also ROW requirements are recommended to be narrower (i.e., local subcollector ROW was 50', whereas in the SLDC, the ROW width can be 34'-48').

Rural roads in the SLDC are also proposed to be narrower -- i.e., local road and cul de sacs will be allowed to be 10' in width, whereas in the current code, they are 10-12' wide.

Given Commonweal's advocacy for cluster development strategies for Trenza and in other areas of Santa Fe County, allowing for narrower road and ROW widths represents a positive change.

10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonweal I Conservancy	7	7.11.5.2	Curb and Gutter is required only when road is to be dedicated to the County and "where necessary for drainage". We regard this proposal to be a positive change relative to the current code.
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonweal I Conservancy	7	7.11.6.6	<p>"Grades at approaches to intersections shall not exceed 5% of 100' linear feet from the radius return of the intersection, excluding vertical curve distance." This will be a good change from current code -- one that mandated that grades could not exceed 3%.</p> <p>Notwithstanding the more lenient grade allowance, staff should consider reducing the approach distance requirements. One of the variances afforded to Trenza's Phase I Preliminary Plat was a maximum grade of 5% at intersections with a 50' approach.</p> <p>In cases where topography and TND design strategies are better served by shorter approach distances (i.e., tighter neighborhood blocks, less grading impacts), the new code should provide for such design allowances.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonweal Conservancy	7	7.11.7	In the SLDC, cul de sac lengths are limited to 500 ft. Commonweal won administrative support for a variance request to have longer cul de sacs to serve Trenza's Phase I Preliminary Plat. While cul-de-sac lengths seem to be a fire access and safety issue, staff has supported administrative variances on longer cul-de-sacs in the past. Past allowances would seem to suggest that a relatively short (500 ft) length may be overly restrictive.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonwealth Conservancy	7	7.11.13	<p>1) "Driveways may not serve more than 2 lots." Is this a requirement in the current code? It would seem that the SLDC should support shared driveways as a means of reducing the construction area per lot.</p> <p>2) "Driveways shall not be located within 150' of an intersection." This code provision supports – hopefully, unintentionally -- a development pattern that is largely of a suburban and/or rural residential quality.</p> <p>If one of the principal objectives of the new code is to promote denser, clustered development, then extended driveway set backs from intersections will make the creation of “traditional neighborhood development” and New Urbanist-inspired projects impossible.</p> <p>The current code prescribes driveways to be located not less than 100' from an intersection. The current Community College District Ordinance doesn't allow driveways within 75' of an intersection. By the standards of the SLDC, driveways are pushed further away from intersections than either regulatory standard.</p> <p>As noted above, this requirement would work against the County's stated goal of encouraging a mixed-use clustered development pattern. Trenza's Phase I Preliminary Plat plan has six instances where driveways are located closer than 100' to intersections. Each of the requested variances was approved by the BCC.</p>

10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonwealth Conservancy	7	7.13.1.1	Maximum water usage per dwelling unit is 0.25 acre feet/year for planning purposes. While this standard maintains the current allowance for a main home, it is unclear as to whether the same standard will be required for guest homes (i.e., will 0.5 ac/ft be required for a lot that includes a home and guest home?). In Planned Development Districts wherein water and wastewater systems can be centrally managed, it would seem appropriate for the County to encourage lower per unit water standards. In the case of Trenza, water use is limited to 0.16-0.17 acre feet/year.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonwealth Conservancy	7	7.13.1.3	"...if any part of the development is within the distance where connection to the County water utility is required, than the entire development must make the connection when the utility is ready, even if the development is phased."

By the language of this section, it is unclear whether a project that has access to local water supplies (i.e., a substantial, proven local aquifer) could pursue a conjunctive use strategy wherein a portion of the project's water is locally supplied and a portion is supplied by the county system. It is also unclear whether this regulation would require more than a "master meter" at the junction of the county water system and a smaller community system. Furthermore, the regulation seems to require that a project's entire water infrastructure be constructed in advance of a phased development program. Such an infrastructure development requirement would be cost prohibitive for larger-scale projects. It would also preclude any design flexibility in a project that is scaled to be constructed over multiple business cycles wherein the demand for various home typologies and businesses may evolve.

(This same language is used in Section 7.13.2.1 for community wastewater systems.)

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonwealth Conservancy	7	7.13.1.5	<p>2) Community water systems must meet standards of NMED, CID and OSE. By referencing state requirements without identifying their specific provisions sets a developer or landowner on the (endless) hunt for relevant agency rules and requirements. Perhaps this is unavoidable, but a more comprehensive appendix noting those standards and rules (or web links) would be very helpful.</p> <p>3) Water wells supplying a community water system must be individually and collectively capable of serving the water needs of development for at least 99 years. If a project is designed with multiple wells to serve a community of say 20-30 lots, it is not reasonable to mandate that a single well be capable of supplying water for entire community's needs for 99+ years. While it is conceivable that a single well could serve a larger community on a short-term basis, this standard is unlikely to be demonstrable to the satisfaction of the County hydrologist. Integrated, distributed wells should be the standard for community water systems wherein the whole of the system can supply, say, 120% of the project's daily needs for 99+years.</p> <p>5) When is proof of a water right required in the County approval process under the new code?</p> <p>6) Distribution lines for a community water system must be 8" in diameter. This is a dramatic increase from the current code that requires community water system</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>distribution lines to be a minimum of 6" in diameter. Trenza's water supply plans for the community water system call for 6" distribution lines. The requirement for 8" lines would excessive for small community systems and prohibitively expensive for developers. Although an 8" line may be an appropriate guideline for commercial development, it is not a reasonable standard for residential development.</p>
							<p>8) Public Utility Act Articles 1 -6 and 8 - 13 of Chapter 62 NMSA 1978 shall be met. See our comment under 2) above. What do these rules cover? Where can they be found?</p>
							<p>13) Financial security shall be deposited to secure construction of a new or expanded community water system. Is this currently required? What is the form of the guarantee (i.e., performance bonds, letters of credit, cash)? For small neighborhood development projects, this provision could prove a prohibitive cost burden.</p>
							<p>14) Any community water system that uses ground water in whole or in part shall perform a geohydrologic report. Isn't this already required in the water supply plan regulations?</p>

10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonweal Conservancy	7	7.13.1.6	<p>2) Shared and individual wells shall meet or exceed the standards of NMED, CID and OSE. Is this currently required in the code?</p> <p>8) Financial guarantee is required for construction of shared well system. Is this currently required in the code?</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	ted.harrison@commonwealconservancy.or	Ted	Harrison	Commonwealth Conservancy	7	7.13.2.3	<p>2) "Where development is not required to connect to County utility, the development must provide tertiary sewer treatment with full grey water capture, treatment and re-use and shall provide for the laying of capped lateral sewer lines so that connection can be made when the County sewer area encompasses the development and appropriate covenants shall be provided to retire the tertiary system or transfer ownership to the County."</p> <p>The wastewater plans for Trenza do not currently include provisions to connect to a future County wastewater utility. Would this provision – on a retroactive basis – mandate that Trenza be “connection ready” to link to a County system? Alternatively, if the project has already won approval from NMED for a wastewater permit, could it be pursued as a stand-alone system?</p> <p>Among the many concerns we would have regarding a centralized wastewater management requirement is the risk that the county would take treated wastewater away from its point of origin and pipe it miles away to a duplicative treatment facility.</p> <p>If a project’s treatment strategy is one that would allow treated wastewater to be available for public parks, agriculture, wildlife habitat, etc., requiring county connection would cause this water to be lost to a local development. In Trenza’s case, our investment in a habitat serving wetland facility would be completely lost.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
------	-------	------------	-----------	--------------	---------	---------	------------------

More generally, this code requirement sets a standard for treatment (tertiary level), grey water capture and reuse that is so ambitious and so unproven as to its engineering and economic feasibility that most new development projects would be unable to meet the standard. Although Trenza has sought to establish a high bar for its local wastewater treatment, capture and re-use methodology, comparable projects have not been able to demonstrate that this collection of purposes is feasible or appropriate.

While we celebrate the spirit of this regulation relative to its water conservation ambitions, it is too broadly stated and prematurely required. Instead, these sorts of requirements should be called out as “preferred design strategies” wherein a development capable of manifesting them could be eligible for fee reductions, density bonuses, county financing assistance, etc.

10/26/2012	williamhenry mee@aol.com		Mee		2	2.2.2.3	Add a new: 2.2.2.3.8. Description of the member's official representation of other organizations within the Community.
10/26/2012	williamhenry mee@aol.com		Mee		2	2.2.2.6	Add "of County Commissioners" as follows: The right to receive notice and provide written recommendations for any discretionary development application pending within the geographic area designated in the resolution of the Board of County Commissioners recognizing the CO or notice of any public hearing or public meeting concerning such application;
10/26/2012	williamhenry mee@aol.com		Mee		2	2.2.2.9	Add, "public infrastructure project in the CIP/ICIP" as follows: The right to participate and make recommendations in the development of a community strategic work plan, studies, public infrastructure project in the CIP/ICIP, public improvement and assessment districts, and levels of service for community infrastructure and services;

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		2	2.2.2.13	Add, "(COCO)" as follows: The right to participate in CO leadership retreats and training programs which may include an annual Congress of Community Organizations (COCO), as applicable.
10/26/2012	williamhenry mee@aol.com		Mee		2	2.2.3.3	Add, "i.e., an officially designated neighborhood association;" as follows:
10/26/2012	williamhenry mee@aol.com		Mee		3	3.3.2.6	I could see that the temporary installation of story poles to publicly display building heights could be a function.
10/26/2012	williamhenry mee@aol.com		Mee		3	3.3.3.2	I like the 3 consecutive terms but 4 would coincide with the Commissioner's maximum term.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		3	3.5.1	Add "A Hearing Officer shall be an independent contractor hired through a competitive proposal process with the qualifications as specified in 3.5.4."
10/26/2012	williamhenry mee@aol.com		Mee		3	3	A new section, 3.6, should be created to address mediation
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	"As needed" --- what does this mean?
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	For a Family Transfer in traditional community "Studies, Reports Assessment" should be changed from "as needed" to "no"

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	For a family transfer outside of traditional community (Remains as same on Table 4-1)
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	For a residential development permit for a Individual lot owner (Remains as same on Table 4-1)
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	For a residential development permit with a Developer lot owner Change to "yes" for Discretionary Review, Pre-application meeting, Pre-application neighborhood meeting
10/26/2012	williamhenry mee@aol.com		Mee		4	4-1	Add, Minor subdivision; Preliminary plat Add "yes" for Discretionary Review, Pre-application meeting, Pre-application neighborhood meeting, Agency review

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		4	4.4.4.4	Change rough to draft. The City uses "Conceptual" and the promises ,made to a neighborhood under conceptual are not legally enforceable by a neighborhood association in District Court. Shouldn't also a copy of the TAC report be given to the applicant for presentation to the Community?
10/26/2012	williamhenry mee@aol.com		Mee		4	4.6	I am uneasy with the 500 and 100 foot issues. In the past Code and City it was 200 feet. In rural areas this is nothing. But in urban 500 foot is a lot. Perhaps having different standards for SDA 1, 2 & # would work better. Or that staff helps determine this distance with a chart. Ideally, in the four directions at least 4 neighbors would be notified. Perhaps the requirement should be to find 5-8 neighbors.
10/26/2012	williamhenry mee@aol.com		Mee		4	4.6.3.4	What is the definition of "Reasonable effort" ? at least a Registered Mail?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		4	4.6.5	This section should have a thirty (30) day requirement because a subdivision can have a major impact on a community/neighborhood. Yet, the 4.9.5.2 Posting (15 days) and 4.65.3 Supplemental Notice is weak.
10/26/2012	williamhenry mee@aol.com		Mee		4	4.7	A new section, 4.7.3, should be added to address mediation
10/26/2012	williamhenry mee@aol.com		Mee		4	4.8.1	Add "usually" as follows: 4.8.1. Generally. Ministerial development approval, often referred to as 'administrative approval,' involves the application of the standards of the SLDC to an application by the Administrator. A public hearing is not usually required. The types of applications eligible for ministerial development approval are described below.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee		4	4.8.3	Minor subdivision pursuant to Chapter 5 should not be included.
10/26/2012	williamhenry mee@aol.com		Mee		4	4.9.9	Wouldn't these include "Vested Rights" definitions page 342 and in Chapter 1 (1.11.3). How about antique subdivisions ("reserved" in definitions)?
10/26/2012	williamhenry mee@aol.com		Mee		5	5.3.3.3	development order should be title capitalized and reference to the page 320 definition given.
10/26/2012	williamhenry mee@aol.com		Mee		5	5.4.3.3	Wasn't this formerly restricted at 160 acres? How many parcels can you cut up into 35 acres without any oversight? Same is true in 5.4.3.11. Large Parcels.

10/26/2012	jespie@higherspeed.net	Bob	Jespersen		zoning map	zoning map	<p>Prior to 2010 the area in Ceder Grove in question was zoned "Ag/Ranch. This was appropriate and most people who bought land here and built homes did so because of the type of life style such zoning guaranteed. This zoning label has not been changed permanently and should not be changed now without hearings and thorough discussions. To do so would re-open the long and bitter debate we experienced with the "Ranches" proposal. Noone should welcome that, especially the BCC. Besides the lack of discussions, the vagueness of the label "Public/Institutional" would certainly encourage development proposals that would lead us down the same road. Property owners in Cedar Grove will never allow any development of this area which will threaten their live style without a vigorous fight. We are firmly resolved!</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	judithstevens@yahoo.com	Judith	Stevens		zoning map	zoning map	We wish to strongly state our opposition to your rezoning the King Ranch, which borders our property in Piñon Hills, to SDA-1 for increased density, commercial and industrial use. This would destroy the integrity and property value of our area which has been a growing 5 acre lot subdivision since the 1960's. We were assured when the BLN land was traded to the King holdings that any property development would be in the 5-10 acre residential zoning consistent with Piñon Hills. It is very irregular for you to even consider putting a SDA - 1 zone next to an established big lot residential area as this has not been done elsewhere. We are counting on you to protect the future of our neighborhood and individual properties

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	terryla@msn.com	Terryl	Anderson		zoning map	zoning map	<p>This letter is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, and to say that this "blue area" should remain as it's original Ag/Ranch zoning.</p> <p>During the 2009/2010 time frame, owners of that "blue" property requested county approval of a community services facility (CSF) development rezoning/master plan. Based on many technical and environmental issues, that development met with massive disapproval by residents of the Cedar Grove community as well as many Edgewood residents. When the Board of County Commissioners approved the rezoning/master plan request, the Cedar Grove community filed an appeal against that decision on the basis that the county did not follow legal process regarding rezoning of the property. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." And, therefore, the community's appeal was lost. Bottom line is that the CFS use was approved, but there was NO rezoning of the property.</p> <p>So, two points :</p> <ol style="list-style-type: none"> 1. For the SLDC to change the zoning of the "blue" area to "Public/Institutional" from its current Ag/Ranch zoning would be to change the zoning without there having been a request by the community or approval by the community to change the zoning. One of the arguments used during the community's

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>appeal of the BCC decision was based on the case of "Miller v. City of Albuquerque, 89 N.M. 503, 554 P.2d 665 (1976), in which the New Mexico Supreme Court confirmed that initial zoning determinations are presumed correct, but in cases involving interference with a zoning plan the burden of proof shifts to the local public body to show that a rezoning was necessary as a result of a mistake in the original zoning or a change in conditions in the neighborhood". Since there was no mistake in the original zoning of Ag/Ranch and there has not been a change in conditions of the neighborhood, the current zoning of Ag/Ranch should not be changed by the SLDC.</p>
							<p>2. The Cedar Grove community was assured by Santa Fe county that if the Boys and Girls Ranches of New Mexico (The Ranches) did not develop their CSF within 5 years of approval of their Master Plan they would lose the CSF use approval and the property's use would revert back to Ag/Ranch. The Ranches have declared that they will not pursue development of their CSF and the property is currently listed for sale. Should a new owner want to develop a CSF on that property they would need to begin a new process for development approval. We are now 2 years into the 5 year period. It is totally unlikely that development of the proposed CSF or a different CSF would begin in the next 3 years. Therefore, the original Ag/Ranch zoning should stay in effect for that "blue" area. Changing the zoning to "Public/Institutional" (whatever that means) would be breaking faith with the Cedar Grove community. If the property is sold, and the</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>new owner wishes to develop some kind of "Public/Institutional" facility, then they can begin the process of requesting a change of zoning. A reasonable development request, that would be in the interest of the community, would likely be approved by the community.</p>
							<p>Therefore, this is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, and to say that this "blue area" should remain as it's original Ag/Ranch zoning.</p>
10/26/2012	jerrydpowers@aol.com	Jerry	Powers	Southern Santa Fe County Landowners Association	4	4	<p>A mediation provision should be added to the code in lieu of a County paid attorney to arbitrate. I believe that a developer working face-to-face with community members to try to address problems before appeal or litigation would be more productive.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			<p>This code is so complex and the process so unclear that it would create a lot of problems for County staff to implement and would require additional personnel just to do so, and that the best course of action would be to take these preliminary comments and try to clarify the code and come out with a redraft for more public comment. The complexity and lack of clarity and certainty would undoubtedly undermine the stated purpose of making it easier for home-based businesses and startup businesses in the community. Business owners take a lot of risk in even establishing a new business, and need as much certainty as possible in the regulation to encourage them and allow them to take the other necessary risks they must take.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			The initial draft of the sustainable land use last year prepared by Mr. Frielich read like a legal document; thank you to the staff for minimizing the legal language and make it more reader friendly. There still exists a complexity to the Code in its application to developments. In the initial draft, the intent of the Code was clear: Allow development first in the SDA1 and focus money for infrastructure improvements and adequate public facilities in those areas. In response to concerns from citizens outside of the SDA1 who feared not being able to develop, the code was rewritten to allow for Planned Communities and overlay zones in areas in order to diversify the zoning and uses in areas outside SDA1. In doing so the inadvertent consequence has been to sweep in small developments into what appear to be cumbersome and excessive requirements.

10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	Zoning Map	Zoning Map	the map should be published in local newspapers to assure zoning is accurate and persons have sufficient notice to assure their parcels are accurately zoned.

10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	4	4.8	The definition of development permit encompasses everything, yet there isn't a clear distinction the between building permit requirements and development permits. Lack of clarity leaves a question as to what the requirements are for individuals for each. While there is a very real difference between a development permit for construction of a home and a commercial center it is not clear in the code the process to follow for each, nor the level of submittals needed.
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	4	4	Provide flow charts for specific submittal requirements and process for each development.
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6-1	Clarify P.72 square footage v building envelope with regard to 10K development permit.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	4/7?	4/7?	How is an individual legal lot of record not a part of a subdivision treated with respect to submittals and requirements for offsite improvements and hook up to a water line treated?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6	The SRA's are set forth in Chapter 6, however there is no clarity as to depth and level of information needed for differing developments.
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6-1	The Table 6-1 detailing the necessary SRA's uses (up to 10K) does that mean disturbed area or building square footage?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6.2	Payment of SRA's are not clear (section 6.2). If you are the first to come in with a request for a development permit do you have to pay for the entire report? Staff had mentioned reimbursement but such process is not spelled out in the Code.
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6.6	Clarify when TIA is needed. The language on pg. 84-85 is too open to subjectivity as to application and level of TIA needed
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6	How do public studies work? Unclear.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	7	7-17	<p>Table 7-17 needs clarification.</p> <p>a. Connection to water should be dependent on:</p> <ul style="list-style-type: none"> i. Easement attained. ii. Distance set forth should be to a potable water line and not a water boundary. iii. Title to chart should include community water system; iv. Ability of water system to serve; v. Reasonable expense to connect;
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6.5	<p>The requirement for 99 year water supply is required for fire protection as well. Yet many community water systems cannot prove 99 year supply. Does that mean a development cannot move forward?</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	6	6.4	Does an individual well have to prove 99 water supply or 40?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	7	7.13	If an individual lot not tied to a subdivision wants to use a well is that still allowed under this code?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.11	How do existing impact fees and development fees already in ordinance (which are not referred to in this draft), differ from the fees and additional requirements for offsite improvements in the Development Agreement?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.4	Will all developments require development agreements? Not clear.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			Are pre existing legal lots of record subject to code and all requirements? Given the lack of distinction between development permit and building permit it is unclear what would be required for an existing legal lot of record.
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			If currently a legal lot of record is allowed to have a well, will that change with this code?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.3	The process for determining what are adequate public facilities is not clear. Is it based on the County CIP? Or something else?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.3	The calculation for how much each development (including building permits) has to pay toward adequate public facilities is nowhere in the code.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.2	Is the priority schedule for the need of public facilities associated with CIP timeline?
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.2	If the Adequate public facilities is measured by CIP? Will the CIP be focused on needs for specific areas and not SDA levels? The language in the Code is "Based on higher levels of population within the individual SDA's."
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.3	The Code makes reference to "levels of service" for emergency personnel etc yet it is not clear on how that is calculated, and what and where the boundaries of the service areas are for such a calculation.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	5	5	Change 1 per 160 acres density for ag/ranch base zone to state standards of 1 per 145 acres as set forth in subdivision act.

10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	4	4-1	Table 4 – 1 sets out some of the procedural requirements by application type. However, the term "as needed" appears far too frequently to allow for any certainty at all in the process.
------------	----------------------	--	--------	---	---	-----	--

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12.3	Section 12.3 adequate public facilities regulations. At a meeting in Edgewood, we asked staff to explain how the adequate public facilities regulations would work from the adequate public facility study through completion of development fees. The staff was unable to explain the process which highlights the lack of clarity contained in these regulations. Robert Griego promised that he would prepare examples of how this works in all of the various types of developments from building permit minor subdivision through major subdivision. We believe these should be included in the plan for the sake of clarity. The adopted level of service. Table 12-1 brings up other questions.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	12	12-1	Are these the current level of service in the County of Santa Fe? Or is this a hypothetical. proposed level of service that is either above or below the current level of service?

Level of services, differ in different parts of the county. It is common knowledge that rural areas experience a lower level of service by choice to maintain a rural lifestyle and it's somewhat of a trade-off for the benefits of living a rural lifestyle. At the level of services on 12 – 1 are even slightly higher or substantially higher than the rural parts of the county currently maintain, this would drastically raise the cost of housing beyond affordability because the builder would have to pay to upgrade all of the services beyond the existing levels. For adequate public review, I believe staff should disclose how the left adopted level of service was arrived at.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			<p>The new proposed code could raise the cost of housing substantially especially in rural parts of the county where housing costs are more sensitive. The new costs to the County would include a Hearing Officer with a law degree, certified by the Bar Association, licensed in New Mexico with six years of experience, including soft and support costs. Extra staff will have to be hired to administer the Code, especially in light of limited time schedule for review of the applications. For example, there is 30 day time period from BCC action to prepare and act on the "Findings of Fact and Conclusions of Law". This time period should be compared to the current time lag between the BCC action and the finalization of the "Findings of Fact and Conclusions of Law", which typically averages three months. Given the fact that current work load exceeds staff capacity the only way to shorten the review period is to add more staff. The same is true for other stages in the development review process. In addition to the shortened review periods and the given the complexity of the development applications additional staff will be required to comprehend and review the extraordinary submittals required by the Code. At a more staff will translate a higher cost for the County and be passed on to the homeowners.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association			<p>New costs for any applicant would include preparation of the “Studies, Reports, and Assessments”, legal notice perthe 500 foot radius standard and other extraordinary submittal standards. Although the actual costs for submittal of the various applications to the County are supposed to be developed later it would be important to include these in the cost analysis. The review of costs needs to include the fiscal impact from the affordable housing requirements. The cumulative effect of the various costs may severely restrict residential development below what is required.</p> <p>There is a relevancy factor for the “Studies, Reports and Assessments” which although a recommendation in the SGMP needs further review to determine if the costs of preparing the various studies adds sufficient value to the development review process to warrant it.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	Zoning Map	Zoning Map	The Draft Zoning Map for the Southern part of the County should take into consideration the interrelationships and connections between Southern Santa Fe County and the adjoining Counties of Torrance and Bernalillo along with the Municipalities of Edgewood and Moriarty. Specifically, the existing zoning allowances in the adjacent Counties and the Municipalities of Edgewood and Moriarty along with existing and planned infrastructure in those areas in order to provide for a logical pattern for future growth along with reasonable transitions from one zoning area to another.

10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	7	7-17	The new code would require hooking up to community water systems if you are within their service area or within 2500 feet of their infrastructure, even just to obtain a building permit. In the south part of the county, many of the co-ops and water systems have established huge service areas in order to stake out future area for them to grow into. So it is possible to be inside of a service area, be required to hook up to community water, and still be miles from the pipe.
------------	----------------------	--	--------	---	---	------	---

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	jerrydpowers@aol.com		Powers	Southern Santa Fe County Landowners Association	4	4	The definition of development in the proposed code is so broad that it encompasses any change whatsoever. This means that any person who wants to add a room onto their home in order support a home-based business would have to go through a substantially more involved complex and costly process than is required by the current code. One of his stated intentions of the new plan and code was to make it easier for home-based businesses to operate. The way the proposed code is currently structured, would defeat that intention.

10/26/2012	williamhenrymee@aol.com		Mee	United Communities of Santa Fe			1. The County's public review process should have used an MSWord document opposed to a PDF file. This makes the 'cut and paste' function much easier for citizens.
------------	-------------------------	--	-----	--------------------------------	--	--	--

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	williamhenry mee@aol.com		Mee	United Communities of Santa Fe			2. UCSFC is disappointed on the number of participants at the Code's Series 1 Informational Open Houses, Series 2 Administrative, Procedures and Financing Chapters, and the Series 3 Zoning and Standards Chapters. Although a lot of detailed information was exchanged and the dialog was good; UCSFC fears a public backlash of people coming into the process at the last minute and saying "we never heard about this."

10/26/2012	williamhenry mee@aol.com		Mee	United Communities of Santa Fe			3. UCSFC commends the presentation by staff member Sarah Ijadi to the Board of County Commissioners on October 9th. The presentation made a number of admissions of the gaps in the Draft Code and the need to come out with a new document. UCSFC maintains its past position that the Draft Code is a good framework and we just need to plug in the detail and then test how it works for the individual homeowner, small businessman, small developer, medium developer, large developer, neighborhood association, homeowners' association and the County.

10/26/2012	whitecelt@aol.com	Jamie	Howard		zoning map	zoning map	<p>After reviewing the Proposed Zoning Districts 10-4-12 we are not in agreement with the zones laid out for the Cedar Grove area. The zone labeled Public/Institutional (blue) on your map is not even defined anywhere in your documents. This area is up for sale and the zoning had been changed to Community Services Facility in Nov. 2010 from Ag/Ranch. Our understanding is that if this land was not developed within 5 years this land zone designation would revert back to Ag/Ranch. This land is currently not officially a Community Services facility zone either until development has occurred so it is still pending. Since it is up for sale at this point, we believe it makes more sense to return it to its original zone of Ag/Ranch or Rural which is compatible with the surrounding zones..</p> <p>To re-label this zone and this particular property as Public/Institutional would mean another zone change before that 5 year period is up. Any public or institutional use of this land will be fought by this community for all of the same reasons we fought the NM Boys & Girls Ranch Master Plan. We feel that this is just another example of the County being influenced by special interests rather than looking at options that would be in the best interest for the residents here in Cedar Grove.</p> <p>I am sure that when the rest of the community gets wind of this zoning you will receive lots of feedback. The Independent Newspaper also stated that Edgewood residents have been encouraged to develop their own community plans but have not done so. Since 2010, Cedar Grove has</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	dmathew@aol.com	Debra	Matthew	Starlight Ranch	zoning map	zoning map	This letter is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, and to say that this "blue area" should remain as it's original Ag/Ranch zoning.

During the 2009/2010 time frame, owners of that "blue" property requested county approval of a community services facility (CSF) development rezoning/master plan. Based on many technical and environmental issues, that development met with massive disapproval by residents of the Cedar Grove community as well as many Edgewood residents. When the Board of County Commissioners approved the rezoning/master plan request, the Cedar Grove community filed an appeal against that decision on the basis that the county did not follow legal process regarding rezoning of the property. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." And, therefore, the community's appeal was lost. Bottom line is that the CFS use was approved, but there was NO rezoning of the property.

So, two points :

1. For the SLDC to change the zoning of the "blue" area to "Public/Institutional" from its current Ag/Ranch zoning would be to change the zoning without there having been a request by the community or approval by the community to change the zoning. One of the arguments used during the community's

Date Email First Name Last Name Organization Chapter Section Comment/Question

appeal of the BCC decision was based on the case of "Miller v. City of Albuquerque, 89 N.M. 503, 554 P.2d 665 (1976), in which the New Mexico Supreme Court confirmed that initial zoning determinations are presumed correct, but in cases involving interference with a zoning plan the burden of proof shifts to the local public body to show that a rezoning was necessary as a result of a mistake in the original zoning or a change in conditions in the neighborhood". Since there was no mistake in the original zoning of Ag/Ranch and there has not been a change in conditions of the neighborhood, the current zoning of Ag/Ranch should not be changed by the SLDC.

2. The Cedar Grove community was assured by Santa Fe county that if the Boys and Girls Ranches of New Mexico (The Ranches) did not develop their CSF within 5 years of approval of their Master Plan they would lose the CSF use approval and the property's use would revert back to Ag/Ranch. The Ranches have declared that they will not pursue development of their CSF and the property is currently listed for sale. Should a new owner want to develop a CSF on that property they would need to begin a new process for development approval. We are now 2 years into the 5 year period. It is totally unlikely that development of the proposed CSF or a different CSF would begin in the next 3 years. Therefore, the original Ag/Ranch zoning should stay in effect for that "blue" area. Changing the zoning to "Public/Institutional" (whatever that means) would be breaking faith with the Cedar Grove community. If the property is sold, and the

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>new owner wishes to develop some kind of "Public/Institutional" facility, then they can begin the process of requesting a change of zoning. A reasonable development request, that would be in the interest of the community, would likely be approved by the community.</p> <p>Therefore, this is to OPPOSE the proposed zoning of "Public/Institutional" (blue area) in Cedar Grove area, and to say that this "blue area" should remain as it's original Ag/Ranch zoning.</p>

10/26/2012	brownp52@yahoo.com	Todd	Brown	Las Candelas de Los Cerillos	1	1.4-1.4.1	<p>Concerning the streamlining of the time frame in the processing of applications, throughout the SLDC "time limits" should only apply were mandated by state law. We are otherwise concerned about how streamlining and fast-tracking could work against the health and general welfare of the county, and undermine sustainability of our diminishing ecological resources.</p> <p>Developments of Countywide Impact (DCI) applications (11.1.) should also not be time-limited in any way that puts limits upon consideration by the Board of County Commissioners, Administrators, etc.</p>

10/26/2012	brownp52@yahoo.com		Brown	Las Candelas de Los Cerillos	7	7.16.4	As erosion in NM can quickly reveal new cultural sites, there should be no exemptions from surface surveys for cultural artifacts for areas that have been previously surveyed.
10/26/2012	brownp52@yahoo.com		Brown	Las Candelas de Los Cerillos	8	8.9	There seems to be some confusion regarding whether and how much industrial uses can be placed in this zone. Regarding the zoning map: we're very concerned that a large area has been randomly misplaced on the draft zoning map that would block the beautiful vistas just south of the penitentiary along the Turquoise Trail Byway. We also question the need for more industrial activities like the similarly zoned area along 599 that includes piles of sand & gravel and is very disruptive.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	brownp52@yahoo.com		Brown	Las Candelas de Los Cerillos	8	8.11.5	We note that the Sustainable Growth management Plan (SGMP) has excellent directives concerning the need for overlay zones (5.5, 17.3.1.) and that the SLDC should better reflect the need to sustain our special county's qualities. We request that the Environmental and Resource Protection and Historic Preservation overlays be expanded (8.11.5.3.) to better reflect the SGMP; that overlays for wildlife corridors, cultural landscapes, & scenic resources (all neglected in the SLDC PRD) be recognized and mapped in a dynamic process to insure that these irreplaceable county resources are not placed subservient to speculation and lost to the short term benefit of the few.
10/26/2012	brownp52@yahoo.com		Brown	Las Candelas de Los Cerillos	10	10.19	This should be completely moved to Chapter 11 as a DCI as directed by the SGMP. Sand and Gravel should be placed under the mining ordinance or regulated under statutes comparable in strength as the mining ordinance.

10/26/2012	cscott709@yahoo.com	Cheri	Scott		zoning map	zoning map	<p>After reviewing the Proposed Zoning Districts 10-4-12 we oppose one of the proposed zones laid out for the Cedar Grove area, specifically the zone labeled Public/Institutional (blue) on your map. This Public/Institutional zoning is not even defined anywhere in your documents. This particular "blue" piece of property on your map has been zoned Ag/Ranch. During a contested Board of County Commissioners (BCC) decision of November 2010, the BCC approved the use of that land for a community service facility (CSF). The South Mountain Neighborhood Association of the Cedar Grove area filed an appeal of that BCC decision. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." Therefore, though the BCC approved the use of the land for a CSF, the zoning was NOT changed. Therefore, the SLDC should NOT change this land's current zoning and show that land as the original zoning of Ag/Ranch. Additionally, the organization that had planned for the CFS use has decided not to pursue that use or build on that land. This area is up for sale. Since no development has been started, this land use is still Ag/Ranch and not a Community Services Facility. Our understanding is that if this land is not developed within 5 years this land use designation would revert back to Ag/Ranch. Since it is up for sale at this point, we believe it makes more sense to remain as its original zoning of Ag/Ranch or Rural which is compatible with the surrounding zones.</p>

a zone change before that 5 year period is up. Any institutional use of this land will be vigorously fought by this community for all of the same reasons we fought the NM Boys & Girls Ranch Master Plan. We feel that this is just another example of the County being influenced by special interests rather than looking at options that would be in the best interest for the residents here in Cedar Grove.

The additional traffic and noise and light a public/institutional facility would cause to this area would be totally incompatible with the quiet rural homes that border this land. The challenges of water/waste water drainage and disposal would put the surrounding private wells at risk I believe. This land was originally zoned for 1 residence per 20 acres because of the challenges the geography and geology of the land create. Nothing has happened to change those conditions.

The Independent Newspaper also stated that Edgewood residents have been encouraged to develop their own community plans but have not done so. Since 2010, Cedar Grove has requested the help by the county to setup our own community plan but were told to wait until this plan was complete. Now, without that community plan we cannot protect the land use in this community. We look to you, our elected officials, to represent us. The needs of rural southern Santa Fe County are not met by changing this zoning. Only a few miles south on Hwy. 344 there is a corridor where public/institutional buildings and facilities can be located without disrupting rural neighborhoods and where waste water

The South Mountain Neighborhood Association of the Cedar Grove area filed an appeal of that BCC decision. Judge Singleton, District Judge of the First Judicial District of Santa Fe County ruled that "The Action of the BCC in zoning the land as a community service facility was not a rezoning of the land." Therefore, though the BCC approved the use of the land for a CSF, the zoning was NOT changed. Therefore, the SLDC should NOT change this land's current zoning and show that land as the original zoning of Ag/Ranch. Additionally, the organization that had planned for the CFS use has decided not to pursue that use or build on that land. This area is up for sale. Since no development has been started, this land use is still Ag/Ranch and not a Community Services Facility. Our understanding is that if this land is not developed within 5 years this land use designation would revert back to Ag/Ranch. Since it is up for sale at this point, we believe it makes more sense to remain as its original zoning of Ag/Ranch or Rural which is compatible with the surrounding zones.</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

To re-label this zone and this particular property as Public/Institutional would mean a zone change before that 5 year period is up. Any institutional use of this land will be fought by this community for all of the same reasons we fought the NM Boys & Girls Ranch Master Plan. We feel that this is just another example of the County being influenced by special interests rather than looking at options that would be in the best interest for the residents here in Cedar Grove.

The Independent Newspaper also stated that Edgewood residents have been encouraged to develop their own community plans but have not done so. Since 2010, Cedar Grove has requested the help by the county to setup our own community plan but were told to wait until this plan was complete. Now, without that community plan we cannot protect the land use in this community. We would appreciate any explanations you may have for this zoning designation within Cedar Grove.

10/25/2012	ranidog@q.com	Honorio	Andres		8;	zoning map	I attended the SLDC meeting on zoning in Edgewood and want to register my reaction.

Most of the time was spent discussing water issues. Several of the people in attendance appeared to have considerable expertise regarding the subject and had been involved in monitoring the water situation in southern Santa Fe County and in the Moriarty area for many years. They provided considerable information regarding the geology, hydrology, and history as well as current anecdotal reports pertinent to this area.

It is apparent that the proposed zoning in this area of the County is predicated upon twenty-five-year old data which does not reflect the current or future status of water availability, drawdown, and replenishment.

So, I ask: How can anyone assign zoning based upon questionable data has no legitimacy? The zoning seems to be based on old and inconclusive data.

I understand that the purpose of these meetings is to gather information and perspectives, but when faced with the suggestion that the County conduct surveys, speak with EWWA and local people who drill, install, and monitor the current water situation in this part of the County, and conduct hydrology studies to determine what the actual current and projected situation is, especially in view of the drought and its probable continuation for years to come, those running the meeting would offer no

Date Email First Name Last Name Organization Chapter Section Comment/Question

positive suggestions for what the County can do to gather information necessary to support any zoning decisions for the future.

It does not make sense that you do not ascertain valid and verifiable data upon which the decisions about infrastructure, population density assignments, etc, should be based and not rely on dated obsolete data.

Another issue is the exception to zoning requirements currently afforded to community service entities. Apparently, such organizations can build anywhere in the state regardless of zoning. That also seems to be the intention of the proposed zoning code. In addition, based upon Cedar Grove residents' experience with the County and its certification/licensing agencies, it would appear that the rules and restrictions which local rural-fringe homeowners have had to observe and adhere to would not have applied to the Girls and Boys Ranches of New Mexico's proposed development, which the neighborhood fought in court.

If the purpose of zoning is to direct and restrict the types of development to conform to established as well as County-assigned neighborhood area standards (rural residential, ag/ranch, rural,mixed use, etc.) giving a waiver to one category of developer obviate the entire rationale for zoning. The neighborhood fought the Girls and Boys Ranches of New Mexico and apparently we will have to fight again if the implementation as presented is approved.

							<p>What I'm pointing out here is the illogicality of present and proposed County plans regarding zoning as part of the SLDC. If you actually intend to institute a realistic and effective zoning process which plays a major role in guiding land development in Santa Fe County, doesn't it make sense that it be based upon valid data and be inherently, rationally consistent?</p> <p>These issues need to be addressed now, not in another two years when this interminable solicitation of resident opinion may finally be concluded, some actual decisions are made, and a County code is implemented.</p>

10/25/2012	recelcogburn@gmail.com	Robert	Racel			zoning map	zoning map	<p>We are opposed to zoning The Ranches property to Public/Institutional. This is just another way to get The Ranches into our neighborhood. We were opposed to The Ranches when the commission originally heard their proposal and remain so today because it doesn't fit into the style and character of our local neighborhood. How many times do we have to say this: The Ranches is incompatible with our neighborhood/area.</p>

10/25/2012	jwjansens@gmail.com	Jan-Willem	Jansens	Ecotone	7	7.13.1.1	These points need more consideration! I think that it is very useful to anticipate in the code a sub-set of dwellings and developments that are very advanced in their water recycling and savings methods, that use primarily rain water from roof catchments, etc., and don't have to adhere to the requirement to have a well, to be on a water system, or to consume 0.25 af/y. We already have hundreds (perhaps thousands) of such homes in the Madrid-Cerrillos area and other areas in SF County, and they need to be rewarded as an example in this regard, because they are truly sustainable. That there are perhaps other concerns regarding these kinds of dwellings (or their location or land use patterns) needs to be addressed in a different manner.

10/25/2012	jwjansens@gmail.com	Jan-Willem	Jansens	Ecotone	7	7.13.2.3	As with water system requirements, the code should take into consideration the very sustainable, low-cost, low impact on-site waste water systems that are pioneered by certain off-the grid homeowners and small communities in the County, and include provisions that allow such systems to exist and to be installed.

10/25/2012		Richard	Hughes	Bonanza Creek Ranch	zoning map	zoning map	<p>I have been aware that County staff has been working diligently for some time now on the Sustainable Growth Management Plan and Development Code. However, it was just recently brought to my attention that Santa Fe County is now fast-tracking a major revision to the zoning and subdivision regulations, a revision that will greatly impact my property. When I reviewed the Preliminary Draft Zoning Map dated October 4, 2012, I was surprised to see zoning designations that were totally different from what I had anticipated and very different from what had been discussed with Jack Kolkmeier over the past few years. Bonanza Creek Ranch has been in my family for 60 years and mcludes over 13,000 acres of land. Over the years my family has been very cooperative with Santa Fe County, and I have personally met with planning staff on numerous occasions and have provided input into the preliminary planning. Our level of cooperation has included access and utility easements across our land to facilitate the waste water pump station, and accommodations for the firing range in the North-14 area.</p> <p>Note that in 2010, the County's Draft Land Use Plan identified Bonanza Creek Ranch as a combination of "mixed use non-residential" and "rural fringe residential," and it further designated the ranch as an "Opportunity Center." My discussions with Jack Kolkmeier about the "Opportunity Center" included mixed uses , higher density cluster development, open space treatment, flexibility in development standards, etc. Unfortunately I do not see any designation</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>for an Opportunity Center on this zoning map. The current zoning and subdivision regulations allow for 1 DU/2.5 acres (with water conservation measures), for most of the ranch. However this is not the case with the proposed zoning map. What concerns me is that the underlying zoning for the majority of the usable portions of my property is now shown as "Rural Residential," allowing for only 1 DU/0 acres.</p> <p>Furthermore, a large portion of the ranch is now shown as Ag Ranch, allowing for 1 DU per 160 acres. This is clearly a "down-zoning" across most of the ranch, meaning a loss of value for my property. I understand that it is difficult for County staff to contact and consult with all landowners; however it seems that an extra effort should be made to meet with land owners controlling significant parts of the County. I have attached a sketch map showing the location of my family's ranch for your reference (See attachment) . My intent is to restore the previous zoning designations (such as the capability for a density of IDU/2.5 acre for the areas previously mapped that way), with mixed use allowable where appropriate. In addition, I would like staff to consider a designation providing for higher densities for the most northerly tract of 270 acres . This is a unique and separate tract of land, which is just south of an existing mobile home park, north of the State Prison and is just east of the Carlsen Subdivision. This 270 acre tract has access to the wastewater treatment plant and County water. And finally Bonanza Creek Ranch would like to have the opportunity to be considered for their own community planning district. This</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>district, involving approximately 13,000 acres, would consider areas of mixed use development (commercial and residential), areas of cluster development, single family lots, and open space treatment, etc. It is my objective to be sensitive to the natural characteristics of the land, while also meeting the needs of future buyers. This includes maintaining grazing in appropriate areas and providing for the preservation of open space. Understanding that the period for public comment ends on October 26, I hereby submit these comments and my strong objection to the draft zoning map. Furthermore, I request a meeting as soon as possible to discuss appropriate zoning for my property.</p>

10/25/2012		Al	Lilly	Santa Fe Planning Group Inc.	zoning map	zoning map	<p>On September 14,2012, Karl Sommer and I met with you to discuss the Sustainable Land Use Plan and the proposed zoning designations for the County. As discussed during our meeting, Santa Fe Center (the 330 acre property at the intersection of RT 599 and Cam. La Tierra) has had quite a history of land use planning, which contemplated commercial zoning.</p> <ol style="list-style-type: none"> 1. Earlier general plans for Santa Fe County had designated this property as a major commercial node and the SNAC (Santa Fe Northwest Advisory Council) Sector Plan identified this land as a commercial center. 2. OnJan. 9, 1986 the EZA granted approval of a request for a special exception and preliminary development plan for residential and non-residential uses on the 390 acres. This required dedication of the ROW for RT 599, working with the City to extend to resolve sewer issues and required the developer to obtain an extension of the water service area boundary extension. 3. On Feb. 13, 1986 the EZC granted preliminary plat approval for the 390 acres with the condition that the applicant work with the City to extend to resolve sewer issues and to obtain an extension of the water service area boundary extension. This same approval was with the condition that the applicant/developer dedicate right-of-way and interchange area for the Santa Fe Relief Route (area shown on the final plat). 4. On Mar. 20, 1986 the developer entered into a Development Agreement with the City, which included the extension of water and sewer to the 390 acres, as well as dedication of the land for the ROW. This

Date Email First Name Last Name Organization Chapter Section Comment/Question

Development Agreement also identified the commercial and residential land uses of the master plan approved by the EZA and EZC.

5. City-County Ordinance No. 1986-4 Providing for the Extension of the Service Area Boundaries of the Regional Water System was ordained by the governing bodies of the City and County of Santa Fe. This was adopted and approved on Mar. 26, 1986.

6. Acting in good faith in accordance with the County approvals received and as per the terms of the Development Agreement, the developer in 1993 dedicated 60 acres of land for the ROW for the Santa Fe Relief Route (RT 599). The Santa Fe County Preliminary Draft Zoning Map dated October 4, 2012 indicates that the subject property is to be zoned as Residential Estate, allowing for residential uses at a density of 1DU/2.5 Acres. Based on the history of the 330 acres known as Santa Fe Center, we hereby object to this zoning designation. We respectfully request a meeting at your earliest convenience to discuss a mixed use zoning designation for this property, allowing for a mix of commercial and residential uses. Since the subject property also has approvals for all utilities, we also request a change in the Sustainable Development Area designation from SDA-2 to SDA-1. I look forward to hearing from you.

10/26/2012		Philip	Baca		zoning map	zoning map	<p>I have reviewed the SLDC, which designates our family's property as Mixed Use. I am offering the following comments and requesting the changes to this designation as described below.</p> <p>1) In 1996 the Baca family entered into a settlement agreement with Santa Fe County after lengthy litigation that involved a state court decision related to the condemnation of our property that is now part of the landfill. The settlement agreement contains several provisions that are impacted by the draft SLDC, including provisions that the county will rezone portions of our property as Industrial Property. I am requesting that the SLDC incorporate language that reflects the language within the settlement agreement. Specifically, that Baca property on the north half of the Cieneguilla grant adjacent to and north of the Santa Fe Airport, and portions of a separate property located on the north side of State Road 599 to the north east of the Santa Fe River be designated in the SLDC as industrial property.</p> <p>2) While the Mixed Use designation is suitable for the Baca's 480 acre parcel immediately the south of the landfill, the other lands not described in item number 1, but located between the 480 acre parcel and County Road 56 should instead be identified as Rural Residential with 2-5 dwellings per acre, which will require proper waste water disposal. The property is in close proximity to the village center identified as La Cieneguilla, which has largely been developed exclusively as residential, and it is our belief that the Rural Residential designation is more suitable for the development that may occur in the</p>

------	-------	------------	-----------	--------------	---------	---------	------------------

future.

3) Lastly, the properties located upon the volcanic escarpment north of La Cieneguilla consist of a 620 acre Baca owned property and federal Bureau of Land Management and State Land Office property leased to the Baca family as part of our ranching operation. I believe these properties would be better served with an Agricultural property designation in the SLDC.

Attached with this correspondence is a map of the referenced area depicting the changes described in the comments above.

Thank you for the opportunity to comment on the draft SLDC. I will continue to monitor the plan as the process continues and reserve the right to amend or augment the comments above at a future date depending upon the changing circumstances.

10/25/2012	dancersandy@gmail.com	Sandy	Rasich		7	7.14	The Public Review Draft of the Sustainable Land Development Code is an improvement as we plan for our future. We can not stress energy efficiency enough. I know that people of low income are just as concerned as anyone and don't believe that higher standards will be problematic in home purchases. analysis has been done showing that even though there is a slight increase in the mortgage, when the reduced cost of utilities created by energy efficiency is combined with the mortgage, even the first month of living in the home is cheaper than if the house had not been built for energy efficiency. We also can feel assured that utility bills will go up in the future, making this even more important.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	12	12	The Santa Fe Association of REALTORS® recommends that the County revise Chapter 12 of the Draft SLDC to eliminate redundancy in the various growth management strategies, and better coordinate them to ensure that new development is encouraged in desired growth areas and is not overburdened with unfair costs or requirements. In particular, the County should revise the requirement for entering into a development agreement for virtually all projects, and it should eliminate the provision that suggests future development fees can be applied to remedy existing deficiencies in public facilities and services. The County should also revise the requirement for financing adequate public facilities to properly credit the tax revenues associated with a development project as part of the funding available for the public facilities needed by that development. The County should also ensure that the growth management techniques better relate to the goals of the SGMP, by modifying these requirements to encourage development in priority growth zones as well as development that satisfies other County growth objectives. Lastly, the County should reconsider levying new development impact fees on residential construction in light of the current economic climate. The association asserted this view in public comments to the County's Affordable Housing Committee in October of 2011. In fact, both the Cities of Santa Fe and Albuquerque have recently placed a moratorium on impact fees for residential developments to encourage new projects. The association believes the

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>increased costs resulting from impact fees make it harder for low-and-moderate income households to afford to purchase residential units in new developments. Impact fees can also result in higher prices for existing homes, thus making all homes less affordable. PLEASE SEE ATTACHMENT FOR FURTHER DETAIL</p>
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4	<p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to clearly define the scope of discretionary decision-making authority granted to the Administrator. More specifically, the County should revise the Draft SLDC to narrow the categories of projects over which the Administrator has discretionary decision-making authority and to incorporate standards to guide the Administrator's exercise of discretion. Such revisions are in the County's best interests, both to facilitate the administration of the Draft SLDC and to reduce the potential for legal challenges based on arbitrary decision-making. PLEASE SEE ATTACHMENT FOR FURTHER DETAIL</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	7	7	<p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to modify the Sustainable Design Standards that are not consistent with the County’s sustainable development goals. Specifically, the minimum parking requirements should be modified to require fewer parking spaces for certain uses and to provide for additional flexibility in applying parking requirements to sustainable design approaches, such as mixed use, that provide the potential for reduced parking demand. In addition, the County should reconsider its roadway design paving requirements, perhaps by consolidating requirements for bike lanes and sidewalks (where appropriate) or by allowing the use of unpaved surfaces to meet the requirements. Furthermore, the County should consider creating additional flexibility in the Draft SLDC to allow for modifications to the Sustainable Design Standards where it can be demonstrated that such modifications promote the County’s sustainable design objectives. The County should, of course, establish standards to guide the appropriate decision-making body in evaluating such waivers or modifications. PLEASE SEE ATTACHMENT FOR FURTHER DETAIL</p>

10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	zoning map	zoning map	Recommendation: The Santa Fe Association of REALTORS® recommends that the County's draft zoning map be available for public review and that it extend the public comment period long enough to allow for review of the map in conjunction with the text. In addition, the County should prepare supplemental materials to explain its rationale for applying the Draft SLDC's zoning districts to land within the County and, most importantly, to describe the impact that the application of the zoning districts will have on property. Specifically, the County should identify any resulting changes that impact development capacity or property values or that will result in the creation of nonconformities. PLEASE SEE ATTACHMENT FOR FURTHER DETAIL

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4/Appendix A	4.2.; 4.4.1.8.	The Draft SLDC uses several terms to refer to a project approval (or denial). There are references to the County issuing a “development order,” a “development approval,” a “development permit,” and a “final decision.” The following are examples of the use of these different terms (emphasis added):

In the context of Approvals:

Sections 4.2. No change in use shall be made ... unless all applicable development approvals and the appropriate development order are obtained in accordance with this chapter. Development orders are required for land division, subdivision, construction, land alteration, land use or development activity to ensure compliance with the Draft SLDC, other County ordinances and regulations and applicable state and federal laws and regulations.

Section 4.4.1.8. [Generally, the procedures for all applications have these common elements...] Issuance of a development order approving, approving with conditions, or denying the application, together with written findings describing and supporting the action adopted;

Section 4.4.11. Written notice of a final decision of the Administrator to approve or approve with conditions pursuant to NMSA 1978, Sec. 39-3-1.1 shall constitute the issuance of the permit.

Section 4.8.2. A development permit is a written document that authorizes a development in accordance with the Draft SLDC.

In the context of Appeals:

Section 4.4.1.9. [Generally, the procedures for all applications have these common elements:] Any appeal of the development order;

Section 4.5.4. Any party with standing may appeal a final decision of the Planning Commission to the Board.

With reference to these examples, there are several instances in which the terms are used interchangeably, suggesting that they have the same meaning. For example, in the outline of general procedures, Section 4.4.1 states that a “development order” is issued to approve or deny a project. Later, the more detailed procedures in section 4.5 refer to the issuance of a “final decision.” Table 4.1, however, identifies “Development Permit” as one of the County’s approvals.

In contrast, Section 4.2 states that: “No change in use shall be made, no land division, subdivision, construction, land alteration, land use or development activity and no building or structure shall be erected, added to, or structurally altered, or occupied unless all applicable development approvals and the appropriate development order are obtained in accordance with this Chapter.” This section suggests that there is a distinction between a “development approval” and a “development order” but the chapter does not contain any explanation of this distinction. Nor does it address the regulatory implications of each type of approval.

The definitions of these terms in Appendix A of the Draft SLDC do not provide any clarification:

Development Approval: authorized action that grants, or grants with conditions, an application for approval of development.

Development Order: the written decision of the Board, Planning Commission or Administrator with respect to the granting, granting with conditions, or denial of an application for development approval.

Development Permit: any development order granting development approval of an application.

As defined, these terms do not appear to be mutually exclusive; it is not clear from the text of the Draft SLDC why their meanings overlap.

The Draft SLDC's imprecise and inconsistent use of these terms makes the development approval and appeal process unclear, which may confuse and frustrate property owners seeking project approvals and hinder efficient implementation of the Draft SLDC by County staff.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County should revise Chapter 4 (and any related references in other chapters) to clarify the approval process and use terms consistently throughout the Draft SLDC. If there are meaningful distinctions between the terms

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							identified above, those distinctions should be clearly explained.

10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	1	1.4.2.1	<p>Comment: This purpose and intent statement appears to require that capital facilities and services be in place and available to a development prior to a development approval being issued. It overlooks instances in which, through a development agreement, an applicant makes provisions to provide the capital facilities and services at the established levels of service as part of a project.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to modify this purpose and intent statement accordingly.</p>

10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.4.4.8.	<p>Comment: A mediation for the concerns raised during a pre-application meeting is completely unnecessary. While this section suggests that it is discretionary on the part of the applicant, the inclusion of this provision in the Draft SLDC is likely to be used by disgruntled neighbors to exert leverage on the applicant by claiming that an applicant is not being cooperative if the applicant does not conduct a mediation to address neighbor concerns.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County remove the provision referencing the possibility of mediating concerns raised at a pre-application meeting.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.4.6.2.	<p>Comment: The requirement to act within a “reasonable period of time” is too subjective. For a process as simple as a completeness review, the Administrator should be required to act within a set, relatively quick, timeframe, such as five or ten business days.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section of the Draft SLDC to impose a specific timeframe (five or ten business days) by which the Administrator shall issue a completeness review.</p>
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.5.4	<p>Comment: It is unclear whether the reference to the “recordation” of the final development order is the same as when the filing of the final decision with the County Clerk, which appears to be the operative date for final decisions of the Planning Commission in Section 4.4.12.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise this section to use clear and consistent terminology for these procedures.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.7.1.4.	<p>Comment: Verbatim minutes are likely to be costly, and are not necessarily useful for the review of proceedings. The requirement for verbatim minutes would therefore appear to be excessive, and would likely be a burden for the County to provide. It is also likely that the County would shift the costs of providing verbatim minutes to an applicant, thereby increasing the costs of development in the County. It would be more reasonable if the County required that “detailed” minutes be prepared.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that The County remove the requirement for “verbatim” minutes and substitute it with a requirement for “detailed” minutes, perhaps with the additional requirement for making and preserving an audio recording of each hearing.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.9.6.8.	<p>Comment: This section omits any reference to an amendment for a decrease in project size, density or intensity. Perhaps the County's intent is that no formal approval of such a project change is required; however, if so, it would be helpful to have this clarified. In addition, the Draft SLDC remains unclear as to the required process if a decrease in project size, density or intensity results in some other changes to the project site. It is unlikely that the County would not seek to retain some form of post-approval review of these changes.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to include a statement that any project change that results in a decrease in the project size, density or intensity does not require formal review and approval through an amendment or any other process. Alternatively, to provide additional clarity in the event that the project change results in some alterations to the site design, the County may want to revise the Draft SLDC to indicate that such changes require nondiscretionary review by the Administrator.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.9.7.4.	<p>Comment: This section is poorly drafted, as there is an “and” between #1 and #2, as well as between #3 and #4, but not otherwise. While the intent of the drafters is, presumably, that all five criteria must be met for the granting of a variance, the imprecise drafting could lead to confusion in the application of these decision-making criteria.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to state that “The planning commission may grant a variance request if all the five following criteria are met”. In addition, the criteria should be stated more formally, separated by a semi-colon, with “and” being used only between criteria 4 and 5.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.9.8	<p>Comment: This section of the Draft SLDC creates a new administrative requirement that must be “exhausted” prior to a property owner bringing a regulatory takings claim against the County. Often, local governments impose this type of process solely to introduce an additional procedural layer of defense against takings claims. Property owners are forced to bear the additional procedural costs associated with the BUD review in order to make their claim “ripe” for judicial review.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that this BUD procedure either be eliminated, or a provision added that requires the County to pay an applicant’s legal fees if a developer or owner applicant establishes that the application of a SLDC regulation or SGMP or area policy to its project requires some form of relief.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.9.9.3	<p>Comment: This section is also poorly drafted. For one, it is unclear what practical distinction is intended between #1 and #2, as both seem to refer to similar situations with different wording. Also, presumably, #4 is a mandatory requirement, although there is no “and” or “or” linking it to the earlier numbers, possibly creating the potential for an inconsistent interpretation.</p> <p>Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to consolidate the situations in #1 and #2 and to state that “The use of land, use of a structure, or a structure itself ... shall be deemed to have nonconforming status when the use, structure or land meet all of the following criteria:”. In addition, the criteria should be separated by a semi-colon, with “and” being used only between criteria 3 and 4</p>

10/24/2012	donna@sfar.com	Donna	Reynolds	Santa Fe Association of REALTORS	4	4.9.9	<p>Comment: The caption of this section is “Nonconforming Uses”; however it also addresses nonconforming structures and lots and the caption should be modified accordingly. In addition, the section would benefit from a subsection that addresses nonconforming development features, such as parking, landscaping, or other features, with provisions allowing reasonable modifications of these features. An example of this approach can be found in Will County, Illinois’ Zoning Ordinance, which contains the following provisions:</p> <p>155-15.50 Nonconforming Development Features</p> <p>155-15.50-A. Description A nonconforming development feature is any aspect of a development—other than a nonconforming lot, nonconforming use, nonconforming structure or nonconforming sign—that was lawfully established, in accordance with zoning regulations in effect at the time of its establishment but that no longer complies with one or more standards of this zoning ordinance. Common examples of nonconforming development features are off-street parking or loading areas that contain fewer spaces than required by current standards or otherwise do not comply with applicable regulations, and sites that do not comply with current landscaping and screening requirements.</p> <p>155-15.50-B. General Nonconforming development features may remain except as otherwise expressly stated</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

in this zoning ordinance, but the nature and extent of nonconforming site features may not be increased except as otherwise expressly stated in this zoning ordinance.

The standard that Will County applies to modifications (i.e. no increase to the extent of the nonconformity) is clear and it permits reasonable modifications to existing sites. A similar standard could be included in the Draft SLDC to accommodate development features that are made nonconforming by the newly imposed Sustainable Design Standards of the Draft SLDC.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the section caption. In addition, it should add a section that addresses nonconforming development features. It should affirmatively state that the nonconforming development features may be continued and that modifications to these features are permitted if the modifications would not increase the extent of the nonconformity.

10/26/2012	paulwhitesf@gmail.com	Paul	White		7	7-17	If someone has a well and the County water system comes within a certain distance of their property does that landowner have to hook up to the system? What about being compensated for their well and water rights? Same for septic systems and a wastewater utility.
10/26/2012	paulwhitesf@gmail.com	Paul	White				Will people have to get wells if infrastructure is not available in SDA 1 and 2 areas?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	paulwhitesf@gmail.com	Paul	White				I'm suggesting a contingency plan for development if no water is available due to drought or priority calls on San Juan Chama water. Something along the lines of no wells allowed and no County water delivery. Growth could continue but developers and home owners would have to install water collection systems for drinking water, black water reuse and grey water reuse so they would not have to rely on wells or hookups. The County should be encouraging this kind of development as the primary kind of development in any event. Perhaps an incentive such as lower application fees or lower impact and tax rates for properties that will not be using those County utilities.
10/26/2012	paulwhitesf@gmail.com	Paul	White				State should not permit new wells if the aquifer and river are over-allocated. SF County should support legislative change. I know this isn't a code issue but I thought I'd bring it up.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7-17	Table 7-17 places an unfair burden on residential single family development outside of SDA-1. If a water line is within a quarter of a mile from a proposed water line in SDA 2 or within half a mile in SDA-3, an individual home builder would have to pay between \$200,000 and \$400,000 to bring a pipeline to his building site. This effectively eliminates any individual building in the SDA-2 and SDA-3 areas that are within the proscribed distance to a County waterline.

Let's take, for example, the recent line extension to the Turquoise Trail Charter School. This roughly one mile extension was done with federal monies and upgraded to a larger diameter line with County funds. Under this rule, any new construction in the Turquoise Trail subdivision would be required to hook up to the new line, even though the owners of property in that subdivision had no say in the line extension. Would all of the residents of a vested subdivision be required to participate in a PID or other vehicle to assist in the expansion of the final hook-ups to the newly defined "service area", or do these properties fall under Chapter 1.11.3 "vested rights" or chapter 4.9.9 "non-conforming use"?

perhaps these cases can be handled under variance, as clearly the requirement puts an insurmountable burden on individual home builders with affected areas.

The Table also requires development "within a service area to wait for water services that may or may not be built but are recorded in

Date Email First Name Last Name Organization Chapter Section Comment/Question

the County's CIP. Is this meant to discourage building in areas not yet served by the County system or is it meant to encourage developers to provide connections (growth) to the County system at either their expense or at the expense of future home owners?

If a Major subdivision in SDA-3 puts in a connection to the County water and sewage system, how will that affect all subsequent residential and minor subdivisions within 2,640 feet of the new lines? What are the implications of such a scenario? How does that affect PID requests? Would all land owners between the "end" of the water system and the end of the proposed pipeline (possibly many miles) be required to participate in increased taxes even if the benefit only initially favors the land developer at the end of the line?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7-18	<p>Seems to me that a proposed development of 24 lots on 2.4 acre plats in an SDA-2 or 3 area should be required to create a community water system and not submit development plans for individual wells. The developer would then have to prove sufficient water is available for the subdivision, and not just for individual lots. The first builder might prove sufficient water for plot one, but by the time all 24 lots have been developed, there may not be sufficient water for any of the lots.</p> <p>Also, consider this: Assuming that the zoning map permits this as a RES-E zone, and the zone sits in SDA-2, an existing forty acre plot divided into sixteen 2.5 acre plots, would not require a community water system. Should this proposed development fall under a “shared well” or under the more stringent “community well” requirement. Perhaps a “community well” system should be a requirement for “planned development zoning districts”. There is some confusion as to the applicability of water connection requirements to PDZ districts (see 8.10.2.7.2 Table 7-17 and Table 7-18 in Chapter 7).</p> <p>There does not appear to be any mechanism for a community to gain knowledge of a proposed extension to the County Water System if that extension is paid for through grants or Federally appropriated funds. What is the process for either public assessment of the extended “service area”, or county assessment of the affects of such a publicly funded extension?</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7.20.1	The term "solid waste" needs to be defined either in the apprndix or by reference to the appropriate ordinance. Reference needs to be made to the County's Solid Waste Management Plan (Resolution 2011-6) and any associated ordinance.
10/26/2012	waltwait@q.com	Walter	Wait		7	7.20.2.1	Is this legal? Why shouldn't county residents be permitted to use transfer stations. You are essentially imposing a tax on SDA-1 residents. The County does not have a curbside collection service. Collection services cost about \$600 annually. Transfer station Permits cost \$70.00. Can the County force it's residents to use a private, for profit service? I don't think that this is defensible.
10/26/2012	waltwait@q.com	Walter	Wait		7	7.20.2.4	"Proper disposal" needs to be defined

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7.20.2.	While this appears in other County Ordinance, I believe that there needs to be a provision stating that it is prohibited to discard solid waste in unauthorized dumps, arroyos, along roadways, or in any fashion not authorized by either this section or by County ordinance.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7.20.2.5	<p>When is a manure pile considered “waste” and when is it considered “compost”. Why are horses singled out? How about cows? In agricultural areas of the County, there are several options with dealing with manure: First, leave it in place and let it decompose and be trampled upon, and 2) clean the corrals and place the manure in piles. 3) Spread the manure on the land as needed as fertilizer. In the first instance, there is no County requirement since manure becomes soil. In the second, you have to remove it monthly.</p> <p>In SDA-1, will the county provide for the removal of animal waste as well as other solid waste with its collection service? A single horse creates a wheelbarrow of waste every three days. Ten wheelbarrows worth a month. How will the county establish whether or not “monthly” pick up has been accomplished.</p> <p>As I understand it, the county Solid Waste management Office would rather not deal with animal waste and would love to close down the only composting site (Eldorado) other than at BART. Does the County expect Edgewood residents to spend three hours a month moving manure to BART, just so that they can keep a single horse?</p> <p>Perhaps language stating that “unsightly Manure piles” may be considered as violations of the County’s Anti-Liter ordinance , rather than trying to build a largely unmanageable statement into the Land Use Code.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		7	7.23.6.3	Does the proposed code provide any procedures (process) to deal with a situation where a home-owners association ceases to function, no longer has a functioning board, or is otherwise unable or unwilling to continue its role as "steward"? At what point does the County assume responsibility for public areas should the HOA fall into default-or does it? If not, how will public access areas be maintained? If homeowners will be assessed, what is the mechanism? It doesn't appear in Section 1-4 as a function of the administrator.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8	<p>I have fielded numerous comments that would seem to indicate that some consideration should be made for residents who bought 40 acre parcels based on hydrological “zoning” (current code) because they did not wish to have close neighbors. They wished to see the draft zoning map incorporate boundaries that would match these pre-existing hydrological zones as much as possible.</p> <p>Why is a “single room occupancy” treated as an accessory use in RUR-F-20 but not in RUR-R-10 and lower. What distinguishes this cut off? Similar questions concerning similar “cut-offs” to other Appendix B determinations. What are the justifications. It would appear that there needs to be an additional chapter to better explain decisions made over Appendix B.</p> <p>It is not clear that lots that were legally platted prior to the “new code” and after 1980 are considered as “conforming”, even though they may not conform to the new zoning standards.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8/Appendix B	8/Appendix B	<p>Page 321 states that “dwelling Unit” includes single family, two family, and multi-family dwellings, manufactured homes and mobile homes. Therefore “dwelling” as defined in Chapter eight, refers to any of these types of dwellings.</p> <p>“Dwellings, multifamily” is defined on page 321, Appendix A, as “ a dwelling or group of dwellings on one lot”.</p> <p>A dwelling, two family (duplex) is found in the use table as permitted “conditional”. It is not an “accessory dwelling unit”.</p> <p>Table 8-4 conditional use permit (chapter 10) is required for Duplex structures and multi-family dwellings (Appendix B use Table).</p> <p>Table 8-4 says see chapter 10 for conditional use. There is no mention in chapter 10. Conditional use requirements are found in Table 4-1. These are:</p> <ul style="list-style-type: none"> b. pre-application meeting c. pre-application neighborhood meeting “as needed” d. Agency Review “as needed” e. Approval by a hearing officer and the Planning Commission” <p>Conditional Use requires all studies and reports as determined by the TAC meeting on an “as needed” basis (Table 6-1) with the exception of a TIA. TIA’s are only required if the project generates more than 100 trips a day.</p> <p>A “Dwelling” that covers two families is not mentioned at all in chapter 8 zoning except in 8.7. “permitted uses”, which states that appendix B “contains a list of all permitted, accessory, and conditional uses allowed within the various zoning districts However,</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

page 322, definition of a “dwelling, two family (Duplex) only mentions a detached house “designed and occupied by not more than two families. It does not, as in “Dwelling, Multifamily” explicitly state that the dwellings could be a “group”.

So then, there does not appear to be any possibility of having a two family detached dwelling, but you can have a multi-family (3 or more).

Since all tables in Chapter 8 are based on a per-dwelling unit”, how do you fit in two family duplexes and three or more houses into a zoning plan that appears to be based on the assumption of a single family residence that cannot be leased to non-family members.

Since you can have multi-family houses on a single lot as long as you go through the conditional use application, why can you not have a guest-house as a rental for non-family members. Whatever the rationale is for this, it doesn’t appear to hold water.

Since the Approved San Marcos District plan allows for guest-house rentals as part of its plan to provide affordable housing, it would appear that the code, as written, is putting itself in conflict with that plan. How then, if that is what the community wants, can the two be reconciled and any re-write of the District Plan become “consistent” without removing this very important element? Does the San Marcos Plan have to eliminate “guest houses” in its entirety and draw on the multi-family house instead?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8.5.2.2	This is silly. We have base maps that show all property boundaries. Lets make the zoning reflect real boundaries. A property on the tax rolls as of the initiation of the code is either in or out of a specific zone. Don't make zoning more difficult than it needs to be. There should never be a zoning district boundary dividing already platted property.
10/26/2012	waltwait@q.com	Walter	Wait		8	8.5.3.	In the absence of a zoning map, all land in the county would be classified as A/R. Correct me if I'm wrong, that means that no subdivision below 160 acres would be allowed without "re-zoning" (8.7.1). Another reason why the code cannot be released without a zoning map at-tached.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8.10.2.1	There is nothing in Section 8.10 that describes how the process might “protect adjacent properties”. As seen below, If I am in an area zoned for one house on five acres, and a developer wishes to place five house on an adjacent five acre plot and applies for a PD district, there is nothing in this section that would indicate that an administrator would reject such an application due to neighborhood incompatibilities.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8-15	<p>What does 2/5 or 2/12 mean? I take it that it means that I could apply for as few as two houses or as many as five houses on a five acre plot as long as the underlying zoning permits it. If so, by applying for a PD district, I could increase the zoning density by 500% before I take any of the affordable housing or TDR incentives? Since there is no minimum lot sizes (8.10.2.5.3)., all I would have to do is meet open space and other subdivision requirements. To apply for this subdivision, would I have to apply under "Planned Development District Rules", or "Minor Subdivision" rules in Table 4-1). Table 6-1 states that I would have to produce all Required Studies and Reports with the possible exception of an EIS, but there is no discussion of process under Chapter 5. Under 5.5 my application for a "Planned Development District" would fall under "minor subdivision" (Table 5-1). 8.10.2.2. States that every PD zone application will be accompanied by a master site plan and a preliminary subdivision plat. 5.3.1 states that the Subdivision rules apply to any division into two or more parcels, so it would appear that a PD district falls under the Minor Subdivision rules. However, Minor subdivision rule in Table 4-1 does not require a pre-application neighborhood meeting, and can be approved by the administrator without any public hearing. Table 6-1 does not require a minor subdivision to produce either a FIS, WSAR OR an EIS report. What to do? What to do? In my way of thinking this is an example of the havoc that can result when legal loop holes are built into zoning requirements.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8	<p>So then. I have a twelve acre lot in SD-1. Through the minor subdivision application I can subdivide this lot into two 6 acre lots without creating a WSA report, an FIS or an EIS, without a pre-application Neighborhood meeting, without discretionary review and without any hearings. The application would be reviewed within 5 days and the administrator has thirty days to approve the application. I could also split it into two parcels by family transfer (exempt). Now I take my two six acre lots and apply for a Planned development Zoning District to place 12 houses on the property. This requires re-zoning so I will have to wait till either January or June to go forward. I will need a master site plan and I will have to go through the quasi-judicial process. I will have to demonstrate substantial changes to the current zoning - however current zoning under the plan has already been abrogated by past development missteps.</p>

10/26/2012	waltwait@q.com	Walter	Wait		8	8.11.2.	<p>Rural Commercial Overlay (O-RC) if applied for in AR, RUR, RUR-F and RUR-R districts on State or County arterial or Collector Roads would appear to promote commercial sprawl. Was this the plans intent? A rural commercial Overlay district can be applied for through application to the administrator. It is considered an application for re-zoning. A development permit could be issued under what criteria? A condition use permit (as required under 8-11.2.4) only requires a pre-application neighborhood meeting on an “as needed” basis. Who decides “as needed”. The “as needed” category in Table 4-1 needs to be changed to “yes” or “no” to prevent arbitrary interpretation of the ordinance and costly legal battles.</p> <p>As it stands, it would appear that aRC-O can be applied for as either under “Overlay Zone” in Table 4-1 or as a “conditional use” in Table 4.</p>

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8.11.2.4	This is very confusing. 8.11.2.4. sits under 8.11 "Overlay Zones" and one must assume that an application would be subject to Table 4.1 "overlay Zone" procedural requirements. How does Conditional use procedural requirements fit into such an application. At face value, an applicant could argue that the need for a pre-application neighborhood meeting is at the discretion of the administrator.

10/26/2012	waltwait@q.com	Walter	Wait		8	8.11.3.3	If a community plan calls for zoning in a specific area within its plan that is greater than that shown on the official zoning map does that make it "inconsistent" to the plan? For example, if the base zoning in the code is 2.5 acres, but the community plan calls for five acre zoning, which works. From a legal standpoint, I could turn to 8.11.3.3. and argue that the County code's (law) intent was to prohibit any increase in zoning dimensions.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8.11.3.4 .1	Section 1.15 does not provide any procedures for an organization acting on behalf of a approved community plan, to submit a community overlay district. It only states that such an overlay district zone must be approved by a legislative hearing and not a quasi-judicial hearing. Furthermore 1.15.2.1 does not include community organizations as entities able to petition for a zoning change. Who then makes the request? How is it determined that a community organization speaks for an approved plan? Does this require another legislative approval similar to the original process that sets up a community planning organization? It seems that that would bog down any community plan and ordinance revision for years. The planning dept does not and will not have the staff to deal with all of the current community plan updates in a concurrent manner. If any process identified in the code needs stramlining, this one does.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		8	8.11.3.4 .2	<p>It would appear that each community plan must go through a new round of regulatory process in order to establish an overlay district. It was my understanding that existing community plans and boundaries would be incorporated into the zoning map up front.</p> <p>There is no process in any chapter that governs how an existing community plan and ordinance would be re-written in order to accommodate the establishment of a community overlay district. Would this be the responsibility of planning? Who and how does an existing community plan get revised? Suppose an existing community ordinance is at odds with the new code. Does this mean that the community must defend its plan all over again. What occurs if, because of the new code, the Commission rejects these established and approved community requirements. There is nothing in the draft that speaks to the rejection of an existing community plan and ordinance.</p> <p>Since we do not yet have a zoning map, we cannot see what underlying zoning does to community planning. I believe that any community plan with a defined boundary should be placed on the zoning map as "subject to community planned zoning".</p>

10/26/2012	waltwait@q.com	Walter	Wait		12	12-1	<p>Table 12.1 cannot work. Totaling all LOS creates an unworkable and mathematically unstable equation. In addition the numbers do not reflect local conditions. Most facilities are concentrated near population centers. If this is to work, you would need separate LOS for each SDA areas and separate calculations for each LOS.</p> <p>Table 12.1 and the method to determine LOS is unworkable as described. There is no direction as to how a countywide impact area is to be calculated. If the calculation is based on different sets of assumptions, LOS will be calculated differently.</p> <p>Let us assume for a moment that the following formula applies: Countywide refers to the total population of the County minus the population of both the City of Santa Fe and the City of Edgewood. The 2011 census lists the total population of the County at just under 146,000. The City of Santa Fe at 68,000 and the City of Edgewood at roughly 4000. That places "countywide" unincorporated population of Santa Fe County at 74,000 residents.</p> <p>Using this estimate the following Adopted Levels of Service would apply:</p> <p>Fire Employees = 68.82 Fire Vehicles $2.12 \times 50 = 106$ Fire Facilities $2,673 \times 50 = 133,650$ Sheriff Personnel = 66.6 Sheriff Vehicles $2.4 \times 50 = 120.00$ Sheriff Facilities $120 \times 50 = 6,000$ Parks = 92.5 Trails = 74 Trail heads = 26.64</p>

Date Email First Name Last Name Organization Chapter Section Comment/Question

Open Space = 6290

Even without calculating Roads and water LOS as those would require boundaries dictated by the development's boundaries, it is clear that when the numbers are totaled as is dictated in 12.3.4.4.2a, only the Fire Facilities figure is meaningful.

Mathematically none of the other LOS calculations would make a difference. What does this mean? It means that as long as there are sufficient fire station square footage, the LOS calculation is satisfied. 12.3.4.4.2b. don't count in the calculation of APFA = even if calculated.

This as an apples and oranges situation whereby it is not possible to add square feet of facilities and numbers of vehicles.

The key to determining what "countywide" means can be found in 12.11.5.11. That section de-fines "countywide" as unincorporated area of the County. This section should be cited in the footnotes for Table 12.1 or "countywide" needs to be defined in the appendix.

Table 12.1 Lists "Water Supply" LOS as a "per residence" impact area. What does this mean? Will the proposed developer calculate the number of homes he plans to build and add them up by 0.25 acre feet? How does this reflect LOS? Shouldn't this LOS reflect impacts to a specific area potentially impacted by increased usage (especially if proposed for an area not within the County Water System service area?) So then, what does "Impact area" mean? Is it

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
							<p>within the property being proposed for development? Within a specified impact area within "N" meters from the wells or water system? Does Impact Area refer to a "Basin?", within "N" miles from a water system or individual wells. How will this boundary be determined and by whom? How could you possibly develop an APFA with this guidance?</p>
10/26/2012	waltwait@q.com	Walter	Wait		12	12-1	<p>There should be a LOS for code enforcement unless code enforcement is considered as part of emergency response. I think that we really need another category in Table 12-1 to insure adequate inspection, enforcement, and legal council for the code</p>

10/26/2012	waltwait@q.com	Walter	Wait		12	12.5.3.2.5	12.5.3.2.5 states that a notice of public hearing in conformity with Chapter 4 but nothing concerning whether or not the "hearing" by the Board would allow objections or that notification includes notification of communities. It would appear that the only appeal is to the district court.
10/26/2012	waltwait@q.com	Walter	Wait		12	12.6.3.4.	This paragraph is inappropriate with the context of CIDS.
10/26/2012	waltwait@q.com	Walter	Wait		12	12.6.4.2.	Who determines that a petition actually reflects 66 2/3% of the total assessed value within a territory to be assigned to a district? Is it the assessor's office? How will this be determined? How long will it take? How is this accommodated in the Chapter 4 "process".

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.1.	To my knowledge, the CIP only exists as a draft document, prepared two years ago by a consultant. If this is true, it has not gone through the complete review process and has not been legally approved by the Board. If the document has been approved by the board then it should not be referred to as a draft, but should be cited as a specific ruling by date.
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.1	In the context of this section it would appear that "Service Area" refers to the three SDA areas (SDA-1,2 and 3). If not, then there needs to be a map showing the CIP service area boundaries. If this section refers to the 2010 draft "development Fees for Santa Fe County" then the appropriate citation needs to be identified. There is a problem here, of course, as that document is still a draft and has not gone through the approval process to make it official. The draft is now two years old. Is it still valid? Anybody looked?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.1.	12.11.5.1. Where will the public find Reports and Analysis prepared by qualified professionals as defined in 12..11.5.1?
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.1.	12.11.5.1. The term “qualified professionals” should be defined in the appendix. Do “qualified professionals” need a degree in the appropriate discipline? Do all reports and studies require that the professional qualifications of the preparers be published with the documents they produce?
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.2.	12.11.5.2. Shouldn’t there be a required link between the administrator who receives applications for development, and the CIP advisory committee - who would determine or “evaluate implementation of the CIP? Perhaps this should be explicitly stated in Chapter four “procedures”. Also the formation, duties, and requirements of the CIP advisory committee should be placed in Chapter three “decision making bodies”.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.3.2.	12.11.5.3.2. And when did the Board make this momentous “finding, and what was the basis for their decision. If, by approving the SGMP, these assumptions have been approved, then the Code needs to refer to the appropriate chapter and verse in the SGMP so the public can likewise, view the assumptions.

10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.3.2.	12.11.5.3.2. What is the mechanism to engage “qualified professionals” Who writes the “scope of work”? Is there any oversight? What type of “qualified professional” is qualified to update the CIP and the Land use Assumptions (LOA) that goes with it. This needs to be defined. If its an Advisory Committeee function, it needs to be spelled out and the level of expertise needed to be a member of the Advisory Committeee needs to addressed.
------------	----------------	--------	------	--	----	--------------	--

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.3.	12.11.5.3. If the Advisory Committee only files its written comments five days before a public meeting, what chance does either the Board or the public have to evaluate the proposed amendments prior to the meeting. Does 12.11.5.3.d. infer that the process allows for a thirty day period between presentation and approval. If this is true, it needs to be stated. In fact the whole process of approving a revised CIP needs to be placed clearly in Chapter Four (Procedures).

10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.6	12.11.5.6 see discussion on Table 12.1. Are these public facility LOS more clearly defined in the 2010 "development Fees for Santa Fe County Draft" (comment # 1188). If this document remains a draft - does it leave the County open to legal challenge?
------------	----------------	--------	------	--	----	-----------	--

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.6.	12.11.5.6. Since the 2010 "development Fees for Santa Fe County Draft" is now two years old, should it still be considered appropriate base-line for LOS. Even the draft code wants an update every two years. Anybody look to see if it is out-of-date? Where can the public find the draft? Has it been published or does one have to find it in the 1000 page first draft of the County Plan?

10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.5.11	This section needs to be referenced in Table 12.1 and in 12.3.4.4.
------------	----------------	--------	------	--	----	------------	--

10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.6.2.1.	12.11.6.2.1. This is confusing language. Does it mean that a developer who wishes to build a road linking a proposed development to a State Highway, for example, where the highway is shown on the official map but not listed in the CIP, would not be subject to Development fees?
------------	----------------	--------	------	--	----	--------------	---

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.7.1.	12.11.7.1. If there is a section in the draft that states the process by which these fees are determined, it needs to be referenced. Who does the “assessing”. What is the process? Can it be found in Chapter 4? What level of “professionalism” is required to create these Development fees. What process is in place to insure that the creation of Development Fees is not abused. Is the imposition of Development fees a function of the Advisory Committee? If so, refer to the appropriate section of the Code that authorizes the committee to do so. How long do “they” have to make a determination? How does this process fit into the process described in Chapter 4 or does it.
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.7.4.	Has a “Fee Schedule” been approved by the Board? If not, what happens until such a fee schedule is approved. If a Fee schedule Has been approved, the Code needs to state a specific document, and date of approval.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.7.4.	12.11.7.4. Where IS the Development Fee Schedule "approved" by the Board. Does it exist. If so, where is it and how does the public access it. Who is responsible for insuring that it is available to the public. If it does not exist, what are the implications?
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.8.2.	12.11.8.2. Who is responsible for keeping track of these four year validations? The Administrator? If so, it must be listed in Chapter 4 as one of the Administrator's duties.

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.10	12.11.10. Does the County financial Officer know of the need to establish separate interest bearing accounts for each new development order. Will the County's accounting software accommodate this additional burden? How will this accounting cost be determined and how will it be referred to the Administrator? Is three percent really enough to maintain this administrative offset? Has accounting been asked?

Date	Email	First Name	Last Name	Organization	Chapter	Section	Comment/Question
10/26/2012	waltwait@q.com	Walter	Wait		12	12.11.13.	12.11.13. If an interested party with standing appeals an assessment, what is the process? Do they have to pay a processing fee? There does not be a well thought out or stated process for this eventuality. If the appeal is not the applicant, does 12.11.13.2 still apply? How does the public gain knowledge of the contents of a development fee decision? At what point does this decision become public? Since this information would surely be part of the application process and the creation of a development order, it would not become public until after the process is over.. That would mean that the public would have no opportunity to appeal an assessment of development fee or lack there-of. (see also Chapter 4.5 "Appeals).

10/26/2012	waltwait@q.com	Walter	Wait		12	12.12.1.	12.12.1. There is no official map "incorporated herein"

ATTACHMENTS FROM MR. SORVIG

I believe there are serious unanticipated consequences that will result from the water and sewer requirements as currently drafted.

Both the water and sewer regulations require existing properties to abandon private water and sewage systems and connect to the County system based strictly on the existence of infrastructure (essentially pipes) within a distance that varies by zone. This raises several serious questions:

1. Connect-if-within-distance commits the County to extending piped services over long distances, without regard to other factors. This can produce a 'mushrooming' effect, in which service to one development, just within the required distance, brings many other developments within distance.
2. The optimal distance is different for water supply and wastewater/sewage systems, from the standpoint of energy, water, and piping efficiencies. Using the same table of distances to decide required connection to these two different systems is likely to cause significant and costly inefficiency.
3. Requiring all existing property-owners to connect to the piped services based on distance alone will place a major burden on existing owners. The desirability of forcing existing owners to abandon private systems is different between water supply and sewage. Private wells are probably going to need to be phased out due to over-commitment of water rights, but those who in good faith have supplied their residences for years should not be unfairly penalized in the process. Sewage treatment on-site is actually very efficient and safe, using carefully sited septic at low densities, and/or such increasingly important "alternative" technologies as composting toilets or constructed wetlands. On-site distributed waste recycling is actually a method of significantly reducing energy and water consumption, while maintaining soil fertility, and is widely recommended as part of sustainable development. The SF Code should not prevent these alternatives.
4. Existing owners, because they are already in place, would be forced to be "early adopters" of County services. This would mean that an existing house, half a mile from a utility line, would bear the cost of installing that half-mile pipe, past undeveloped lots that would then be able to connect with shorter lengths of infrastructure. This places a significant financial penalty on the existing residents of the County; that is the opposite of the oft-stated intention to help retain existing residents in the face of development pressures.
5. The draft contains language stating that developments required to connect will not have to do so until the County is ready and willing. However, this means that developments, including private individuals, who get permission to build in an area not yet served by the County must build a private or community system and then abandon it when the County infrastructure reaches the area. That is manifestly unfair to property owners, and creates major complications for planning by the County. For example, 7.13.2.3.2 requires "capped sewer laterals" to be provided by a development that is so distant that no County service yet exists. In at least a significant percentage of such cases, the County will not yet have detailed plans for sewer expansion into the area, and thus, the laterals will be constructed without full knowledge of the system into which they are supposed to connect, resulting in wasteful construction and/or sub-optimal operations once connected.

I strongly urge that the Code be revised on this point. SF County should:

- require NEW development to connect to County infrastructure, but based on standards of efficiency of service, not merely distance
- if connection is not efficient, require NEW development to provide service to comparable standards (but not necessarily by the same system) as the County systems

would provide, and require a long-range plan showing how and under what circumstances the new development would connect to the County and under what circumstances it would remain a stand-alone entity

- EXEMPT all existing private wells, shared wells, and private septic systems from forced connection, including that owners may repair, refurbish, replace, or redrill a private system without being considered “new development” subject to forced connection
- Permit any existing owner to connect, and, once connected, prohibit reverting to the private system.

Lamp type	Code status	Shielding	Special requirements
LED	Required or preferred	Full	None
Fluorescent & quartz	Permitted	Full	None
Metal halide	Limited	Full with translucent filter	Sports events and special displays, subject to timing devices and restricted hours of operation
High pressure sodium	Limited	Full with translucent filter	Sports events and special displays, subject to timing devices and restricted hours of operation
Halogen	Limited	Full with translucent filter	Sports events and special displays, subject to timing devices and restricted hours of operation
Mercury vapor	Prohibited	--	--
Low pressure sodium	Prohibited	--	--
Other light sources	As approved by Planning Commission	Full	May require Temporary Use Permit or development agreement

Individual lamps producing 900 lumens or less do not require shielding. Groups of such lamps may not produce cumulative lighting levels in excess of those permitted under 7.8.3.6, and may be subject to shielding or other controls if they produce glare or spillover.

A fixture is fully shielded when, as installed, it emits no light rays at angles above a horizontal plane running through the lowest part of the fixture, as certified by the manufacturer's photometric report. Signs constructed of translucent materials and lit from within do not require shielding but may not produce glare, spillover, or illumination levels in excess of those permitted under 7.8.3.6.

From: Richard Hughes, Bonanza Creek Ranch

Re: New Zoning Map and Development Standards

I have been aware that County staff has been working diligently for some time now on the Sustainable Growth Management Plan and Development Code. However, it was just recently brought to my attention that Santa Fe County is now fast-tracking a major revision to the zoning and subdivision regulations, a revision that will greatly impact my property. When I reviewed the Preliminary Draft Zoning Map dated October 4, 2012, I was surprised to see zoning designations that were totally different from what I had anticipated and very different from what had been discussed with Jack Kolkmeier over the past few years.

Bonanza Creek Ranch has been in my family for 60 years and includes over 13,000 acres of land. Over the years my family has been very cooperative with Santa Fe County, and I have personally met with planning staff on numerous occasions and have provided input into the preliminary planning. Our level of cooperation has included access and utility easements across our land to facilitate the waste water pump station, and accommodations for the firing range in the North-14 area.

Note that in 2010, the County's Draft Land Use Plan identified Bonanza Creek Ranch as a combination of "mixed use non-residential" and "rural fringe residential," and it further designated the ranch as an "Opportunity Center." My discussions with Jack Kolkmeier about the "Opportunity Center" included mixed uses, higher density cluster development, open space

treatment, flexibility in development standards, etc. Unfortunately I do not see any designation for an Opportunity Center on this zoning map.

The current zoning and subdivision regulations allow for 1 DU/2.5 acres (with water conservation measures), for most of the ranch. However this is not the case with the proposed zoning map. What concerns me is that the underlying zoning for the majority of the usable portions of my property is now shown as "Rural Residential," allowing for only 1 DU/10 acres. Furthermore, a large portion of the ranch is now shown as Ag Ranch, allowing for 1 DU per 160 acres. This is clearly a "down-zoning" across most of the ranch, meaning a loss of value for my property. I understand that it is difficult for County staff to contact and consult with all landowners; however it seems that an extra effort should be made to meet with land owners controlling significant parts of the County. I have attached a sketch map showing the location of my family's ranch for your reference.

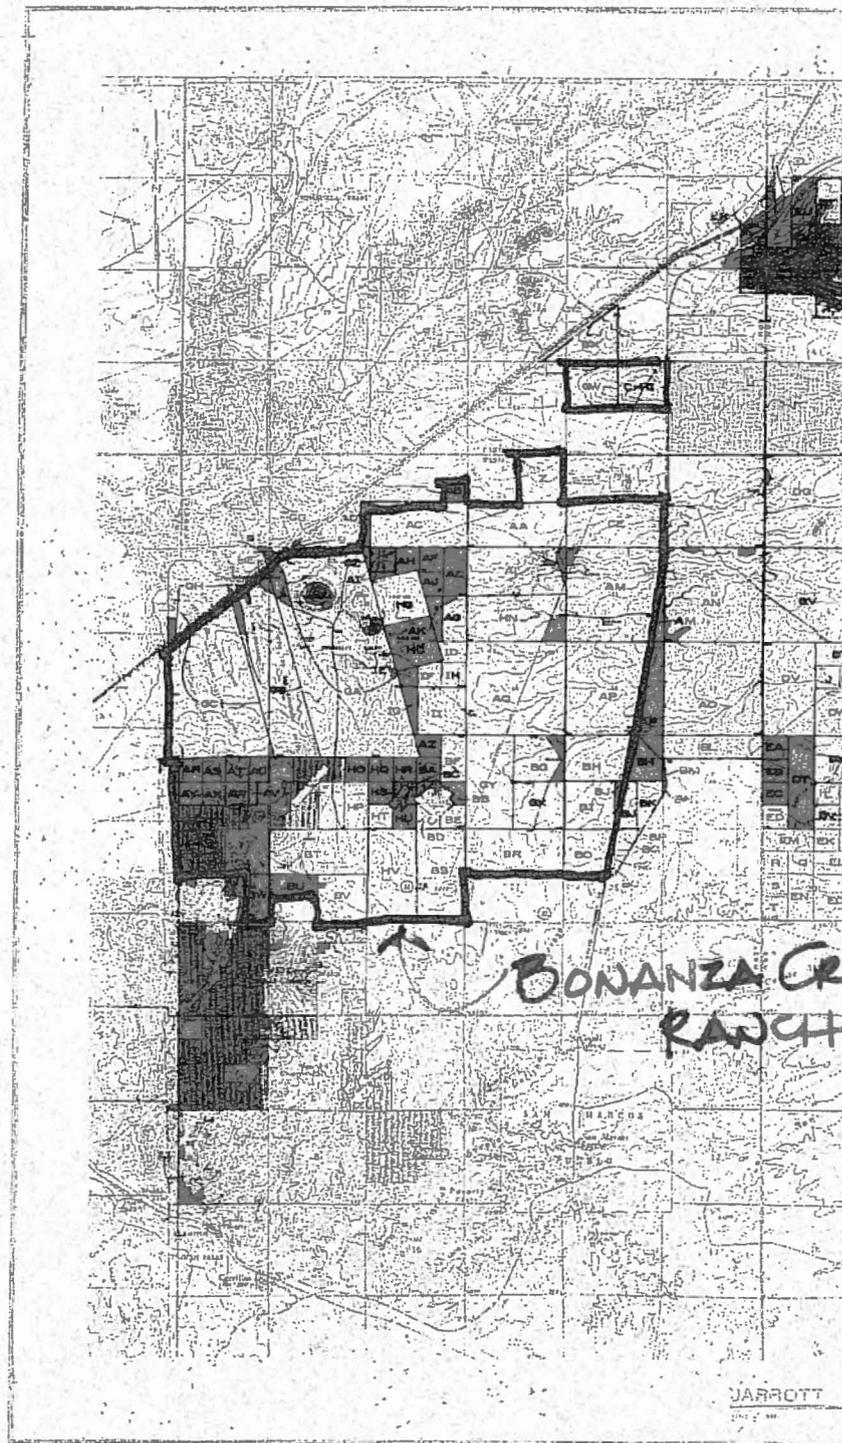

My intent is to restore the previous zoning designations (such as the capability for a density of 1DU/2.5 acre for the areas previously mapped that way), with mixed use allowable where appropriate. In addition, I would like staff to consider a designation providing for higher densities for the most northerly tract of 270 acres. This is a unique and separate tract of land, which is just south of an existing mobile home park, north of the State Prison and is just east of the Carlsen Subdivision. This 270 acre tract has access to the wastewater treatment plant and County water. And finally Bonanza Creek Ranch would like to have the opportunity to be considered for their own community planning district. This district, involving approximately 13,000 acres, would consider areas of mixed use development (commercial and residential), areas of cluster development, single family lots, and open space treatment, etc. It is my objective to be sensitive to the natural characteristics of the land, while also meeting the needs of future buyers. This includes maintaining grazing in appropriate areas and providing for the preservation of open space.

Understanding that the period for public comment ends on October 26, I hereby submit these comments and my strong objection to the draft zoning map. Furthermore, I request a meeting as soon as possible to discuss appropriate zoning for my property.

Sincerely,

Rick Hughes, Owner

RE: Sustainable Land Development Code (SLDC) (PRD) Phase I Comments

Dear Ms. Ellis-Green,

As the designated representatives of the ownership of over 304 contiguous acres just north of the City of Santa Fe in Santa Fe County we are writing comment on the proposed Sustainable Land Development Code (SLDC). Our property is located east of Tano Rd. at the north end of San Rafael Rd. and abutting the west side of the Monte Sereno subdivision. Please reference the enclosed map for an accurate location description. The family ownership of this acreage that we represent is comprised of the following: Welsh Family Limited Partnership III, Welsh Family Limited Partnership IV, Welsh Survivors Trust, Welsh QTIP Trust, Lee A. Welsh, and The Carolyn Jeannette Pickard Family Irrevocable Life Insurance Trust.

Santa Fe Land Planning Group, Inc. informed us of the Santa Fe County Preliminary Draft Zoning Map dated October 4, 2012 and we oppose the proposed rezoning of our property to a "Rural Residential" designation at a density of 1 DU/10 acres. Currently the property is predominantly in the Basin Zone, allowing for lots as small as 2.5 acres, our neighbors to the east in Monte Sereno have lots as small as 1 AC, and abutting our property to the south are 5 AC lots in the County.

We respectfully request that the zoning for our property be designated as "Rural Fringe" allowing for 1 DU/5AC. In our opinion, it does not make sense from a sustainable planning standpoint for the zoning to jump from "Residential Estate" (1.5 AC lots) to "Rural Residential" (10 AC lots) on our property and that a gradual transition of lot density is more appropriate.

This property has been in our family for over 50 years; nobody appreciates the beauty and respects the goals of a Sustainable Land Development Code more than our family. We appreciate the opportunity to comment on Phase I of the SLDC and look forward to working with the County to create a thoughtful zoning code for Santa Fe County.

We would like to schedule a meeting with County staff at your earliest convenience to discuss in more detail and to lay out a plan on how we can work together to achieve all of our goals. We will contact you next week to coordinate a time to meet.

Sincerely,

Lee A. Welsh

Re: Comments on the Public Review Draft of the Sustainable Land Development Code (SLDC) (PRD) September 2012

Dear Mr. Griego:

I have reviewed the SLDC, which designates our family's property as Mixed Use. I am offering the following comments and requesting the changes to this designation as described below.

- 1) In 1996 the Baca family entered into a settlement agreement with Santa Fe County after lengthy litigation that involved a state court decision related to the condemnation of our property that is now part of the landfill. The settlement agreement contains several provisions that are impacted by the draft SLDC, including provisions that the county will rezone portions of our property as Industrial Property. I am requesting that the SLDC incorporate language that reflects the language within the settlement agreement. Specifically, that Baca property on the north half of the Cieneguilla grant adjacent to and north of the Santa Fe Airport, and portions of a separate property located on the north side of State Road 599 to the north east of the Santa Fe River be designated in the SLDC as industrial property.
- 2) While the Mixed Use designation is suitable for the Baca's 480 acre parcel immediately the south of the landfill, the other lands not described in item number 1, but located between the 480 acre parcel and County Road 56 should instead be identified as Rural Residential with 2-5 dwellings per acre, which will require proper waste water disposal. The property is in close proximity to the village center identified as La Cieneguilla, which has largely been developed exclusively as residential, and it is our belief that the Rural Residential designation is more suitable for the development that may occur in the future.

- 3) Lastly, the properties located upon the volcanic escarpment north of La Cieneguilla consist of a 620 acre Baca owned property and federal Bureau of Land Management and State Land Office property leased to the Baca family as part of our ranching operation. I believe these properties would be better served with an Agricultural property designation in the SLDC.

Attached with this correspondence is a map of the referenced area depicting the changes described in the comments above.

Thank you for the opportunity to comment on the draft SLDC. I will continue to monitor the plan as the process continues and reserve the right to amend or augment the comments above at a future date depending upon the changing circumstances.

Sincerely,

A handwritten signature in cursive script that reads "Philip M. Baca".

SANTA FE ASSOCIATION OF REALTORS®

MEMORANDUM

**Santa Fe County, New Mexico:
September 2012, Public Review Draft
of the Sustainable Land Development Code**

October 24, 2012

EXECUTIVE SUMMARY

The Analysis section of this memorandum is divided into two parts. In **Part I**, the association addresses five primary issues and concerns raised by the Draft SLDC. The first express concern is that the Draft SLDC proposes a development review process that appears unduly burdensome for property owners and developers and that may stifle development opportunities, and ultimately growth, in the County. The association then presents an *Illustrative Project* and accompanying *Flow Chart* to explain this point. The association also notes that the Draft SLDC's infrastructure funding mechanisms are unnecessarily redundant and poorly coordinated and will impose excessive costs on development in the County. Issues are then raised that the Draft SLDC gives the Administrator an excessive amount of discretionary authority, and contains insufficient standards to guide the Administrator's exercise of discretion. Next, the association raises the concern that several of the Draft SLDC's parking, access, and roadway requirements would result in the construction of excessive amounts of impervious surface, which is inconsistent with the purported "sustainability" goals of the Draft SLDC. Additionally, the association calls attention to issues surrounding the accessibility and analysis of the Zoning Map regarding individual properties which may undermine the credibility of the whole public review process. Lastly, the association points out that the Draft SLDC development review procedures use inconsistent terminology and are unclear.

Part II of our analysis discusses issues raised by a number of specific provisions of the Draft SLDC and suggests possible improvements from the perspective of the real estate industry.

BACKGROUND

Santa Fe County is proposing to replace its current Land Development Code¹ with the Draft SLDC. The Draft SLDC follows the release of the Santa Fe County Sustainable Growth Management Plan (the "SGMP"), which was adopted by two County resolutions on November 9, 2010 and November 30, 2010.

¹ *Santa Fe County Land Development Code*, Santa Fe County Ordinance 1996-10, as amended.

The Draft SLDC is a very substantial document, consisting of fourteen chapters and two appendices and totaling approximately 350 pages. It contains the substantive provisions that will guide the County's use of land, including the County's Subdivision requirements (Chapter 5), Sustainable Design Standards (Chapter 7); Zoning (Chapters 8, 9, and 10); Growth Management Tools (Chapter 12); and Housing and Affordable Housing requirements (Chapter 13). The Draft SLDC also contains all of the administrative and procedural rules for the County's implementation of the substantive provisions.

ANALYSIS

PART I: PRIMARY ISSUES OF CONCERN WITH THE DRAFT SLDC

Issue: The Draft SLDC Development Review Process: The Draft SLDC proposes a review process that is unduly burdensome for property owners and developers and is likely to stifle development opportunities, and ultimately growth, in the County.

The Draft SLDC creates a very elaborate process for development approvals, particularly for what it deems "*discretionary development approvals*," which include: any non-residential projects (regardless of size), major and minor subdivisions, conditional use permits, variances, and development agreements.²

The process for most development projects in the County will require the following development review steps:

1. Review by the Administrator of the Planning Commission;
2. Preparation of studies, reports, and assessments;
3. Review by a Technical Advisory Committee
4. Review by state, tribal, and County agencies;
5. Appointment of a Hearing Officer and review through a quasi-judicial hearing process;
6. Review by the Planning Commission during a quasi-judicial or legislative public hearing; and
7. Review by the Board of County Commissioners.³

This is a burdensome process, which is not limited to large or complex projects, and is likely to be extremely costly and time-consuming for a property owner or developer. In addition, the Draft SLDC grants the Administrator the discretion to alter the established review process, which has the potential to further complicate the process and add costs and uncertainty.

In order to illustrate the scope and complexity of the County development approval process, we first apply the process to present a hypothetical project. We then focus our analysis on particular issues of concern.

² Table 4-1: Procedural Requirements by Application Type.

³ See, generally, Chapter 4 of the Draft SLDC.

ILLUSTRATIVE PROJECT

To illustrate the County's development review process, we consider a hypothetical *small mixed-use development* consisting of the following characteristics:

- 24 residential housing units,
- 8,000 square feet of retail/commercial space that includes a restaurant
- Located within a Mixed Use zoning district
- Conforms to the dimensional standards for the district
- Previously developed site
- Developer proposes some deviations to the "Sustainable Design Standards" of the Draft SLDC to reduce areas of impervious surface (specifically, reduced number of parking spaces, and reduced parking aisle widths)

In discussing this hypothetical development we refer to it as "the Project." Based on the development review provisions and procedures in the Draft SLDC, the Project would apparently require the following approvals:

- Conditional Use Permit (Discretionary – needed for restaurant use);
- Variances (Discretionary – because of request for reduced parking and roadway width);
- Development Permits (Discretionary – because of non-residential use of Project) – for the following:
 - Construction Permit (for the building)
 - Road/Driveway Permit (for the access)
 - Sign Permit (for the retail/commercial space)
 - Grading Permit (for site grading)
 - Utility Permit (for installation of utilities)

Below are the steps that the Project would need to go through. The *Illustrative Project Development Review Process Flow Chart* accompanying this Memo provides a diagram of this process. **Please refer to this *Flow Chart* (attached at the end of this Memo) as you review the following steps.**

Step 1: Pre-Application Meetings

The Draft SLDC requires that the project applicant conduct both a *pre-application meeting* with the Technical Advisory Committee "TAC" and a *pre-application neighborhood meeting* prior to filing an application for any development approval.⁴ At these meetings, the applicant must present the Project in sufficient detail to allow for a review of the Project and a discussion of applicable Draft SLDC requirements.

⁴ Sections 4.4.3 and 4.4.4 of the Draft SLDC.

After the TAC meeting, the County staff prepares a summary of the issues that need to be addressed in the Project's application. After the neighborhood meeting, the Project applicant must prepare a report summarizing the issues raised at the meeting and how the applicant intends to address them.

Step 2: Preparation of SRAs

The Draft SLDC requires the submittal of Studies, Reports, and Assessments (SRAs) as part of the review of discretionary development approvals. The SRAs are:

- (1) an Environmental Impact Report (EIR);
- (2) an Adequate Public Facilities and Services Assessment (APFA);
- (3) a Water Service Availability Report (WSAR);
- (4) a Traffic Impact Assessment (TIA); and
- (5) a Fiscal Impact Study (FIS).

At the time of the Pre-Application TAC meeting, the Administrator determines the scope of the SRAs that the applicant must submit with the application.⁵ The Project consists of more than 10,000 square feet of development, so it would require the submission of a TIA, APFA, FIS, EIR, and, possibly, a WSAR. Section 7.16 of the Draft SLDC also indicates that for any non-residential or multi-family development, an applicant must also prepare a historical and archaeological reconnaissance survey and report. In addition, as part of the application, the applicant must provide a project description that contains an extensive list of information about a project that includes mapping and analysis extending up to five (5) miles from the project site.

Step 3: Administrator Completeness Review

After preparing the SRAs, the applicant must submit an application to the Administrator. The Administrator reviews it for completeness "within a reasonable period of time."⁶ Presumably, the Administrator also reviews the scope of the SRAs filed with the application to be sure that it is consistent with the scope determined by the Administrator and in accordance with the requirements for these submittals in the Draft SLDC.

Step 4: Administrator Substantive Review

In addition to the completeness review, the Draft SLDC makes the Administrator responsible for performing a substantive review of the application. The Administrator refers applications for review and comment to the following Federal, State, and County agencies:

- 4.4.7.1. Office of the New Mexico State Engineer (OSE);
- 4.4.7.2. New Mexico Environment Department (NMED);
- 4.4.7.3. New Mexico Department of Transportation (NMDOT);
- 4.4.7.4. The applicable Soil and Water Conservation District;
- 4.4.7.5. State Historic Preservation Office (SHPO);
- 4.4.7.6. Tribal Government; and

⁵ Section 6.1.4 of the Draft SLDC.

⁶ Section 4.4.6.2 of the Draft SLDC.

4.4.7.7. Any County Departments and other public agencies that the Administrator deems necessary to assist the Administrator and staff to determine compliance with this and other relevant Ordinances.⁷

After completing this review, the Administrator “may take final action, make the appropriate recommendation to the Planning Commission or the Board, or may take other appropriate action.”⁸

Step 5: Conditional Use Permit Review

The Planning Commission then holds a quasi-judicial⁹ public hearing to review the conditional use permit application. The applicant must provide notice of the hearing to landowners within 500 feet of the Project and it must post notice in the newspaper and at the property. The Draft SLDC does not specify a timeframe for holding the hearing, nor does it specify a time by which a final decision needs to be issued, following the hearing.

Step 6: Variance Review

Because the Project will require one or more variances, the Administrator will refer the application to a Hearing Officer to conduct a quasi-judicial public hearing. The Hearing Officer conducts the public hearing on the variance, make written findings of fact, conclusions of law and recommendations, and file a written report of these findings and conclusions with the Planning Commission or Board for further action.

The Planning Commission will be responsible for taking final action on the variance applications after receiving the report from the Hearing Officer. It is unclear whether the County can consolidate the public hearing processes for the Conditional Use Permit and the Variances, or whether each approval requires a separate process.

Step 7: Discretionary Development Approval Review

In addition to delegating both completeness and substantive review to the Administrator, the Draft SLDC appears to grant the Administrator final approval authority for the “Development Permits” that must be issued for the Project. These permits would consist of a *construction permit*, a *grading permit*, a *road/driveway permit*, a *utility permit*, and a *sign permit*. Because the Project is a mixed use project, the Draft SLDC indicates that the Administrator’s review is *discretionary*, which presumably gives the Administrator the right to *deny* such approvals. In addition, the Administrator may impose conditions:

... as allowed by law and as may be necessary to reduce or minimize any potential adverse impact upon other property in the area or to carry out the general purpose and

⁷ Section 4.4.7 of the Draft SLDC.

⁸ Section 4.4.8 of the Draft SLDC.

⁹ The Draft SLDC does not define the term “quasi-judicial.” The SGMP describes a “quasi-judicial development application” as one that “involves the use of a discretionary standard to an application for discretionary development application that is applicable to specific land in common ownership or to an area of land in which the predominant ownership lies in lands in a single common ownership.” SGMP, p. 250. *See also* Brian W. Blaesser, DISCRETIONARY LAND USE CONTROLS: AVOIDING INVITATIONS TO ABUSE OF DISCRETION (2011 ed.), § 1:18 (Thomson-Reuters/West: 2011) (hereinafter, DISCRETIONARY LAND USE CONTROLS), defining quasi-judicial decisions as judicial-type or adjudicating actions performed by individuals who are not judges.

intent of the Draft SLDC, so long as the condition relates to a situation created or aggravated by the proposed use and is roughly proportional to its impact.¹⁰

After review, the Administrator may take final action, make the appropriate recommendation to the Planning Commission or the Board, or may take other “appropriate action.”¹¹ Alternatively, “the Administrator may, in the Administrator’s discretion, refer an Application that is committed to the Administrator’s authority for review and final action to the Planning Commission or the Board.”¹²

Step 8: Post-Approval Processes – Development Agreement

Approval of the project does not end the administrative process under the Draft SLDC. Because the Project involves a *discretionary* approval that requires an Adequate Public Facilities Assessment (AFPA), it will need to enter into a Development Agreement.¹³ The Development Agreement is drafted by the County Attorney, but, because the Project involves non-ministerial approvals, it requires approval of the Board of County Commissioners.

Step 9: Post-Approval Processes – Development Fee Calculation

In addition, the developer of the Project will need to pay Development (Impact) Fees, which involves a fee calculation by the Administrator, whose decision may be appealed.¹⁴

COMMENTS AND ANALYSIS

The above-outlined development review process required for the Project raises the following issues:

Pre-Application Requirements. The review and approval process outlined above and diagrammed on the *Flow Chart*, is extremely complicated and time consuming. Prior to applying for a permit (or other relief), the Draft SLDC imposes a detailed pre-application process (**Step 1**). The pre-application process is intended to give the County and affected neighborhood input into a project; however the level of detail and analysis that must be provided at these meetings suggests that a developer will need to devote considerable effort in time and money to project planning and design just to be in a position to get this “informal” input.

Onerous Report Requirements (SRAs). The Draft SLDC contains extensive requirements for the submission of SRAs (**Step 2**), even for modest projects. The total cost of preparing these reports is likely to amount to thousands of dollars. While such costs may be justified and feasible for large and complex projects, the cost of preparing SRAs and other reports may be too burdensome for smaller projects. The requirements for SRAs are established by the SGMP. However, it would appear that the County has the ability to establish impact *thresholds* that would trigger the submission of the reports (beyond the extremely low threshold of 10,000

¹⁰ Section 4.4.10 of the Draft SLDC.

¹¹ Section 4.4.8 of the Draft SLDC.

¹² Section 4.4.8 of the Draft SLDC.

¹³ Section 12.4.1 of the Draft SLDC.

¹⁴ Section 12.11.13 of the Draft SLDC.

square feet of development proposed in the Draft SLDC¹⁵). The County could also modify the scope of the reports for projects of a certain type or size. In addition, the County could consider creating additional exemptions from the SRAs requirements. For example, it could exempt certain infill or redevelopment projects that are consistent with the goals of the SGMP. None of these alternative approaches is contemplated in the Draft SLDC.

Review Process Indeterminate in Length and Direction. Once an application is submitted, the Administrator retains an extraordinary amount of discretion in reviewing the applications (**Steps 3, 4 and 7**). The Draft SLDC contains inadequate provisions to guide and control the actions of the Administrator. For example, while the Draft SLDC provides a timeframe within which the Administrator is to complete the review of applications, it does not specify a timeframe thereafter by which the Administrator must take action on an application.¹⁶ The Draft SLDC also vests the Administrator with the discretion to refer such projects to the Planning Commission or Board, introducing a high degree of uncertainty into the review process. The administrator has the power to refer even projects that do not require any special discretionary relief and that would otherwise appear to be appropriate projects for administrative review (assuming reasonable standards of review were added),

Uncoordinated Hearing Requirements. For certain types of relief requiring a quasi-judicial hearing, the Draft SLDC appears to impose a two-tiered process:

- (1) A Hearing Officer oversees a hearing and makes findings of facts and recommendations, and
- (2) The Planning Commission issues a final decision (**Steps 5 and 6**).¹⁷

In the case of this Project, which requires a conditional use permit and a variance, it is not clear whether the Planning Commission will hold separate hearings — one to decide on the recommended decision of the Hearing Officer for the variance, and another to conduct the substantive review of the conditional use permit. Moreover, the Draft SLDC does not require that applications be heard within a specified timeframe. In other words, it appears that the County could delay action on an application for an indefinite period of time.

Post-Approval Review Requirements. Even after Project approval is granted, the Draft SLDC imposes on the Project, and would impose on most projects, additional procedures (**Steps 8 and 9**). While the administrative process associated with the required Development Fee calculation appears reasonable, the procedural requirement that there be a Development Agreement for every project that requires an APFA is not. There are likely to be many projects that trigger the requirement for preparing an APFA, but do not warrant a Development Agreement. This is

¹⁵ See Table 6-1 of the Draft SLDC.

¹⁶ Section 4.4.8 of the Draft SLDC.

¹⁷ We note, however, that the Draft SLDC is unclear in this respect — some sections suggest that a Hearing Officer process would not be required for a Conditional Use Permit, whereas other sections indicate otherwise. See Section 3.5.2.1, identifying the matters that will be referred to a Hearing Officer (which do not include a Conditional Use Permit), and Section 4.9.6.5, stating that the Planning commission shall hold the quasi-judicial hearing for a CUP. Compare to Table 4-1, indicating that a Hearing Officer procedure is required for a Conditional Use Permit.

particularly true when a project need only pay Development Fees in order to maintain the adopted levels of service in the County. Why is the payment of Development Fees not sufficient to meet the Draft SLDC’s Growth Management objectives?

In sum, the development approval process outlined in the Draft SLDC is overly complicated and has the potential to be far too time-consuming and costly for many projects in the County. A review process this extensive and complicated has the potential to discourage new development opportunities and the positive economic development associated with them, and to negatively impact growth in the County.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County should address the comments noted above in the following ways:

- Limit the information required by an applicant for the pre-application meetings and remove the unnecessary reporting requirements associated with these processes.
- Limit the discretion granted to the Administrator during the review process by imposing additional timeframes for action and limit the Administrator’s discretion to refer applications to the Planning Commission and the Board.
- Reduce the filing requirements and broad scope of review for the SRAs, particularly for smaller projects or for those that consist of infill or redevelopment.
- Revise the general review processes for discretionary approvals (Conditional Use Permits, Variances) to add review timeframes and eliminate the need for a Hearing Officer in smaller matters.
- Scale back the post-approval administrative processes and, in particular, eliminate the requirement that every project that requires an APFA also require a Development Agreement.

Without changes to the development approval process, the Draft SLDC’s complicated and time-consuming approval process is likely to stifle development opportunities and undermine the SGMP’s goals for development in the County.

Issue: Draft SLDC Infrastructure Funding Mechanisms: The Draft SLDC’s infrastructure funding mechanisms are unnecessarily redundant and poorly coordinated and will impose excessive costs on development in the County.

Chapter 12 of the Draft SLDC contains the County’s “Growth Management” chapter, whose purpose is to “direct growth to areas most efficiently served by adequate facilities and services using a wide range of techniques including Capital Improvement Plan, development fees, funding mechanisms including public improvement and special assessment districts and development agreements.”¹⁸ The growth management “techniques” presented in Chapter 12 is:

- Capital Improvement Plan
- Adequate Public Facilities Regulations (APFRs)
- Development Agreements

¹⁸ Section 12.1 of the Draft SLDC.

- Public Improvement Districts (PIDs)
- County Improvement Districts
- County Road Maintenance Assessment
- General Obligation Bonds
- Revenue Bonds
- County Highway and Bridge Bond
- Development Fees
- Official Map
- Transfer or Purchase of Development Rights

Of these techniques, several appear to apply broadly, and have the potential to affect many projects proposed within the County. Below we discuss three of these techniques in particular.

Adequate Public Facilities Regulations (APFRs). These regulations are proposed “to ensure sustainable County growth by requiring that adequate public facilities and services are available concurrently with the completion of new development.”¹⁹ The regulations apply to any application for discretionary development approval that requires an APFA,²⁰ which would include any non-residential project (regardless of size). The APFRs require both the analysis of the adequacy of public facilities and services and, if warranted, commitments to construct (aka “advance”) and finance public facilities and services for a 20 year period.²¹

Development Agreements. The Draft SLDC requires that almost every new development project enter into a development agreement.²² It states that the purpose of entering into a development agreement is “to provide a mechanism for the County, owner/applicants and third party governmental entities to form agreements, binding on all parties, successors and assigns, regarding implementation of development orders granting concurrent applications for development approval, including ... mechanisms for financing of all capital facilities and public services.”²³

Development Fees. The Draft SLDC states that development fees are imposed “to finance, in whole or in part, the capital costs of additional or expanded public facilities identified on the County’s capital improvement plan (“CIP”), in order to meet the needs generated by new construction or development (“new development”) pursuant to the Development Fees Act, NMSA 1978 § 5-8-1 et seq.”²⁴ Development fees are “applicable to all new development within the

¹⁹ Section 12.3.1 of the Draft SLDC.

²⁰ Section 12.3.2 of the Draft SLDC

²¹ Sections 12.3.6 and 12.3.7 of the Draft SLDC, respectively.

²² Section 12.4.1 of the Draft SLDC (“This subsection [pertaining to Development Agreements] applies to any application for discretionary development approval that requires an APFA.”). Tables 4-1 and 6-1 essentially provide that any project over 10,000 square feet, and most projects requiring any form of discretionary relief, require the preparation of an APFA.

²³ Section 12.4.2.11 of the Draft SLDC.

²⁴ Section 12.11.1 of the Draft SLDC.

unincorporated jurisdiction of the County, as may be amended in the future, and shall apply uniformly within each service area.”²⁵

Each of these three techniques is intended as a means of requiring and/or paying for public facilities and services within the County, and all three appear to apply to almost any project proposed within the County. As indicated in the table below, the broad application of these three techniques under the Draft SLDC results in regulatory redundancy, which will overburden development projects.

REDUNDANCY OF PROJECT REVIEW			
Key Project Characteristics	Development Fees	APFA	Development Agreement
Residential Development (non-discretionary)	X		
Non-Residential Development ≤ 10,000 s.f. (discretionary)	X		
Non-Residential Development > 10,000 s.f. (discretionary)	X	X	X
Minor Subdivision (non-discretionary)	X		
Major Subdivision (discretionary)	X	X	X
Conditional Use Permit (discretionary)	X	“as needed”*	“as needed”*

*“As needed” is determined in the Administrator’s discretion.

For example, imposing the Development Agreement requirement on a project that is subject to the payment of development fees for project-related public facilities is unnecessary. The payment of the fees pursuant to a Fee Schedule will be sufficient to address the development’s proportionate share of public facilities and there is no apparent benefit to the developer or the County in undertaking the added time and expense required to negotiate a development agreement. Similarly, the APFRs do not indicate that a project proposed within an area where adequate public facilities and services are available at the adopted levels of service is exempt from the requirement to provide 20 years of annual funding for all fire, law enforcement and emergency response services.²⁶ If adequate public facilities and services are available, and a development fee is imposed and paid as a condition of building permit approval, there is no justification for the County imposing further costs on a project to finance these services. Moreover, it appears that the County is attempting to use the APFRs and Development Agreement provisions to impose costs on new development that it could not impose through

²⁵ Section 12.11.3 of the Draft SLDC.

²⁶ See Section 12.3.7 of the Draft SLDC.

development fees. Specifically, based on the language in the Draft SLDC, it would appear that the development agreement can be used as a means by which a developer can be forced to construct public facilities that also address existing County *deficiencies*, a cost category that under general impact fee methodology, and the New Mexico Development Fee Act, cannot be paid for with impact fees.²⁷ It states:

12.3.6.2. Development Agreement Requirements. Advancement of capacity for public facilities and services may be accepted in a development agreement so long as a commitment for construction or advancement of public facilities and services is included as a condition of the development permit and in the development agreement. The commitment shall contain, at a minimum, the following:

... If the planned capital improvement and public service proffered by the applicant provides capacity exceeding the demand generated by the proposed project, but is needed to meet past deficiencies reflected in the lack of overall capacity needed for APF for the project, reimbursement to the applicant for the *pro rata* cost of the excess capacity for the year in which the capital facility or service would have been built as shown in the prioritized CIP from any development fee funds paid by subsequent development projects.²⁸

The problem with this requirement is that the County should either be funding improvements to address the deficiencies first or, if the developer corrects those deficiencies in the improvements it does as part of its mitigation, the developer should be reimbursed for remedying the deficiency. It is not correct or fair to require that the developer wait to be reimbursed from “*development fee funds paid by subsequent development projects.*” Practically, the County may not be able to ensure reimbursement to the developer such future development fees, which may be insufficient or may be allocated to other costs. More importantly, the development fee funds paid by subsequent development projects would be appropriate to use as reimbursement for *extra capacity* of public facilities constructed by a developer, but not for remedying *existing deficiencies*. In fact, as noted in the County’s own consultant-prepared report regarding impact fees, using development fees for the purpose of remedying existing deficiencies is prohibited.²⁹

The Draft SLDC provisions quoted above raise the serious concern that the County may seek to use the requirement to enter into a development agreement to shift the costs of remedying existing deficiencies to private developers as a condition of approval—costs which should be the County’s responsibility to bear.³⁰

In addition, the APFRs would require an applicant to finance certain maintenance and repair costs:

²⁷ See James C. Nicholas, PhD, *Impact Fees for Santa Fe County* (September 27, 2010) (hereinafter, IMPACT FEES FOR SANTA FE COUNTY) at 63, citing the New Mexico Development Fee Act.

²⁸ Section 12.3.6.2.5 of the Draft SLDC. (Emphasis added)

²⁹ IMPACT FEES FOR SANTA FE COUNTY at 63, citing the New Mexico Development Fee Act.

³⁰ The Draft SLDC specifically provides that the “County is responsible for and will meet all capital improvement needs associated with prior deficiencies for existing development in the County as established by the levels of service adopted in the SLDC.” Section 12.11.5.8 of the Draft SLDC.

The applicant for a development project shall provide for annual funding for a period of twenty years of all fire, law enforcement and emergency response services and county road *maintenance and repair*, the need for which is generated by the development project by: advancing the costs of providing such facilities and services; through the creation of a public improvement district or a county improvement district; and/or a county road maintenance assessment.³¹

This financing requirement is extremely burdensome, and unfair, particularly when it ignores the additional County tax revenues associated with the new development project as a means of helping to fund the cost of these services. In the context of development fees, such tax revenues are typically considered a source of revenue that is credited to the developer in the impact fee calculation.³² Apparently, the County wishes to pocket the new tax revenues and require the developer to directly assume all costs for these services through the APFRs. Most importantly, however, requiring the developer to finance the costs of maintenance and repair through *development fees* appears to be prohibited in the context of New Mexico's Development Fee Act,³³ and the County has not provided any justification for why it is an appropriate, or acceptable, to impose this financing requirement on owners/developers under the APFRs.

ILLUSTRATIVE PROJECT

Again consider our hypothetical mixed use development Project: If the APFA prepared for the Project demonstrated that the roadway adjacent to the site was operating at a LOS below the adopted LOS, it might be reasonable for the developer of the Project to offer to construct the roadway improvements that are needed to remedy the existing deficiency and provide additional capacity to serve the Project. In fact, the County would have significant leverage to force the developer to undertake these improvements as a condition of the discretionary approvals.

But the Draft SLDC would also require that the developer enter into a Development Agreement to memorialize this commitment, providing that the developer would be refunded its costs for remedying the deficiency from future development fees. However, if the improvements did not result in the provision of new additional capacity, there would be no future development fees imposed that could be used to refund the developer, leaving the developer without any source of recapture of the cost of these improvements. This is blatantly unfair.

In addition to the potential redundancy of the infrastructure funding mechanisms, it does not appear that Draft SLDC imposes these techniques in a manner calculated to achieve the goals of the SGMP. Specifically, by broadly applying all of these techniques, the Draft SLDC misses an opportunity to steer growth into areas where infrastructure is available (SDA 1 and SDA 2, as

³¹ Section 12.3.7 of the Draft SLDC (emphasis added).

³² Clancy Mullen, Duncan Associates, *State Impact Fee Enabling Acts*, www.impactfees.com, 8/21/2012, at 2.

³³ See IMPACT FEES FOR SANTA FE COUNTY at 63, citing the New Mexico Development Fee Act.

identified in the SGMP). For example, one of the most widely cited concerns about adequate public facilities programs, in particular, is that they have the potential to direct growth away from areas designated for growth and toward areas not intended or appropriate for growth. This result occurs because the areas in which growth is desired lacks sufficient capacity for new development, whereas the areas not planned for growth have available capacity to accommodate the development.³⁴ Similarly, development fees, when imposed on “dwelling unit” basis, may have a disproportionate impact on affordable or workforce housing that is saddled with the same fee as larger homes.³⁵

To address these types of concerns, the Draft SLDC could, for example, apply the APFRs and development agreement requirements only to areas of restricted growth or modify the project threshold for these requirements so they relate to the particular growth area designation (i.e., a higher threshold would apply to a project in SDA-1 than to a project in SDA-3). Similarly, the Draft SLDC could provide a modified development fee schedule within the priority growth areas, or it could allow for the calculation of development fees on a non-dwelling unit basis, for projects seeking to meet workforce housing needs.

To the extent that the County applies its growth management strategies in ways that cause the cost of developing property in the County to increase significantly, it is likely to discourage developers from pursuing opportunities for desirable new development or redevelopment in the County.³⁶ Among other things, this result would undercut other SGMP policies that advocate economic development and the promoting of fiscal responsibility and self-sufficiency. For example, the SGMP contains certain goals for new development, such as supporting mixed-use development and incentivizing a broad mix of housing types to address workforce housing.³⁷ To the extent that the new regulatory processes and restrictions imposed by the Draft SLDC discourage development opportunities or make certain developments impractical, the County may fail to realize desired economic benefits from development, including mixed-use and workforce housing that would otherwise have the potential to support the County’s growth goals.

- **Recommendation:** The Santa Fe Association of REALTORS® recommends that the County revise Chapter 12 of the Draft SLDC to eliminate redundancy in the various growth management strategies, and better coordinate them to ensure that new development is encouraged in desired growth areas and is not overburdened with unfair costs or requirements. In particular, the County should revise the requirement for

³⁴ The National Center for Smart Growth Research and Education at University of Maryland, *Adequate Public Facilities Ordinances in Maryland: Inappropriate Use: Inconsistent Standards and Unintended Consequences*, 20 (2006). See also Thomas G. Pelham, *Transportation Concurrency, Mobility Fees, and Urban Sprawl in Florida*, 42/43 Urb. Law. 105 (2010/2011).

Nelson, et al., *A GUIDE TO IMPACT FEES AND HOUSING AFFORDABILITY* (2008) at 3-4.

³⁶ See Steven H. Ott and Sutin C. Read, *The Effect of Growth Management Strategies: Adequate Public Facilities Ordinances and Impact Fees, A Review of Existing Research* (Working Paper, Center for Real Estate, UNC Charlotte, January 2006), showing that adequate public facilities ordinances and impact fees can potentially limit the availability of affordable housing, reduce undeveloped land values, and encourage development in more remote locations.

³⁷ Policies 8.2 and 8.3 of the SGMP.

entering into a development agreement for virtually all projects, and it should eliminate the provision that suggests future development fees can be applied to remedy existing deficiencies in public facilities and services. The County should also revise the requirement for financing adequate public facilities to properly credit the tax revenues associated with a development project as part of the funding available for the public facilities needed by that development. The County should also ensure that the growth management techniques better relate to the goals of the SGMP, by modifying these requirements to encourage development in priority growth zones as well as development that satisfies other County growth objectives. Lastly, the County should reconsider levying new development impact fees on residential construction in light of the current economic climate. The association asserted this view in public comments to the County's Affordable Housing Committee in October of 2011. In fact, both the Cities of Santa Fe and Albuquerque have recently placed a moratorium on impact fees for residential developments to encourage new projects. The association believes the increased costs resulting from impact fees make it harder for low-and-moderate income households to afford to purchase residential units in new developments. Impact fees can also result in higher prices for existing homes, thus making all homes less affordable.

Issue: Administrator's Discretion: The Draft SLDC grants the Administrator an excessive amount of discretionary authority, and provides insufficient standards to guide the exercise of that discretion.

The Draft SLDC grants a significant amount of discretion to the "Administrator." This discretion extends beyond procedural review processes³⁸ and appears to encompass *substantive* review of "discretionary" projects. Specifically, Table 4-1 of the Draft SLDC provides that development permits for non-residential, mixed use & multi-family projects are subject to "discretionary review" and that the Administrator has approval authority. Based on the language in the Draft SLDC, it appears that this "discretionary" review authority applies to the "Ministerial Development Approvals," listed in Section 4.8.2 of the Draft SLDC. These approvals include *construction permits*, *road/driveway permits*, and *grading permits*. This suggests that the Administrator could exercise his discretion and deny a construction permit, even if the Planning Commission has issued a Conditional Use Permit and/or a Variance to authorize a project. Most importantly, the Draft SLDC does not include any provisions that clearly explain the extent of the Administrator's authority to exercise discretion or the review standards it will apply.

In addition, Section 4.4.10 imposes some restrictions on the extent to which a "decision-making body" (a term that includes the Administrator) may impose conditions on a development approval. It states:

In acting upon an Application, the decision-making body shall be authorized to impose such conditions upon the Application as allowed by law and as may be necessary to reduce or minimize any potential adverse impact upon other property in the area or to carry out the general purpose and intent of the SLDC, so long as the condition relates to a

³⁸ As discussed previously in this memorandum.

situation created or aggravated by the proposed use and is roughly proportional to its impact.³⁹

Other than this rather vague and open-ended limitation, it appears that the Administrator can approve or deny an application for almost any reason, or for no reason at all.

The Draft SLDC gives the administrator a troubling amount of substantive discretion over broad categories of approval. Based on the language in the Draft SLDC, *any* non-residential project can be approved or denied by the Administrator for any reason, even if the project conforms to all use and dimensional requirements of the Draft SLDC. At best this is a serious drafting flaw in the Draft SLDC. At worst, it is a standardless grant of discretionary authority to an administrative official that arguably violates the constitutional principle known as the *nondelegation doctrine*. The nondelegation doctrine restricts the ability of a local legislative body, such as the Santa Fe County Board of County Commissioners, to delegate its legislative or policy-making power to administrative boards or officials. A local legislative body can, however, delegate to an administrative body the authority to exercise discretion provided that the delegation is accompanied by standards and specific procedural guidelines.⁴⁰ The delegation of standardless authority can result in unfair and arbitrary decision-making. It potentially exposes the County to claims based on the constitutional rights to due process and equal protection.⁴¹

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to clearly define the scope of discretionary decision-making authority granted to the Administrator. More specifically, the County should revise the Draft SLDC to narrow the categories of projects over which the Administrator has discretionary decision-making authority and to incorporate standards to guide the Administrator’s exercise of discretion. Such revisions are in the County’s best interests, both to facilitate the administration of the Draft SLDC and to reduce the potential for legal challenges based on arbitrary decision-making.

Issue: Standards Inconsistent with “Sustainability” Goals: Several of the Draft SLDC’s parking, access, and roadway requirements would result in the construction of excessive amounts of impervious surface, which is inconsistent with the purported “sustainability” goals of the Draft SLDC.

The “Purpose and Intent” section of the Draft SLDC includes the following objectives:

1.4.2.20. Ensure that building projects are planned, designed, constructed, and managed to minimize adverse environmental impacts; to conserve natural resources; to promote sustainable development; and to enhance the quality of life in Santa Fe County;

³⁹ Section 4.4.10 of the SLDC.

⁴⁰ See DISCRETIONARY LAND USE CONTROLS, § 1:18.

⁴¹ *Id.*, §§ 1:44; 1:54.

1.4.2.21. Prescribe sustainable design and improvement standards for all public and private buildings, structures and land uses.⁴²

Chapter 7 of the Draft SLDC contains the purported “Sustainable Design Standards” of the Draft SLDC. These set out extensive site design standards that address, among other things, requirements for: setbacks; access; landscaping and buffering; parking and loading; and road design standards. Among these requirements, the “parking and loading” and “road design standards” arguably impose excessive requirements for paved areas, which are inconsistent with the above-quoted objectives of the Draft SLDC.

Minimum Parking

Section 7.10.4 requires that a minimum number of parking spaces be provided in accordance with specific use classifications shown on Table 7-6. The use of minimum parking requirements is generally viewed as an impediment to sustainable development; in fact, prominent sustainable development design advocates and transportation planners argue that minimum parking requirements should be waived altogether, because they encourage excessive driving, reduce development opportunities, and disproportionately affect low-income and renter families.⁴³ Certain of the parking requirements appear excessive, especially the requirement for 1.0 spaces per 200 square feet for all office and retail uses (which equals 5.0 spaces per 1000 square feet). Studies have shown that such 2.0 to 3.0 spaces per 1000 square feet is generally sufficient for such uses.⁴⁴ There are no studies or reference materials identified in either the SGMP or in the Draft SLDC, nor are there any such materials available on the County’s website devoted to the preparation of the plan and code, that support the parking requirements contained in the Draft SLDC. Most importantly, these requirements are not consistent with the sustainable development objectives that would presumably seek to minimize parking areas and avoid the stormwater runoff and “heat island” impacts associated with excessive impervious areas.

Further, the Draft SLDC provides little flexibility to accommodate alternative parking arrangements. This lack of flexibility is apparent from the following sections:

7.10.5 Alternative Parking Requirements. Uses that are either not listed in Table 7-6, or are not reasonably similar to those listed in Table 7-6 shall be determined by applying guidelines of the Institute of Traffic Engineers (ITE) to the specific use contemplated.

7.10.6 Shared Parking. Applicants proposing shared parking shall comply with the requirements of § 7.10.5.

If a property owner were to seek to create a “shared parking” arrangement, the owner would need to conform to the “guidelines of the [ITE].” Unfortunately, however, the ITE is frequently criticized for failing to account for factors affecting parking demand, such as *vehicle ownership*

⁴² Section 1.4.2 of the Draft SLDC.

⁴³ See Steuteville, Robert, et. al. *NEW URBANISM: BEST PRACTICES GUIDE, THE FOURTH EDITION* (New Urban News Publications, Inc., 2009) at 417. See also Donald Shoup, *THE HIGH COST OF FREE PARKING*, (American Planning Association, 2005).

⁴⁴ Stephen Coyle, *SUSTAINABLE AND RESILIENT COMMUNITIES: A COMPREHENSIVE ACTION PLAN FOR TOWNS, CITIES AND REGIONS* (John Wiley & Sons, 2011) at 178.

rates, development density, and affordable housing. One researcher cautions about the use of the ITE guidelines, noting that many of the figures are statistically unreliable and are not intended as recommendations.⁴⁵ In addition, these sections of the Draft SLDC appear to require a *use-based* analysis of parking requirements, which may not allow for any adjustment for mixed-use projects. One of the fundamental benefits of a mixed-use development is that it can result in decreased vehicular use based upon the proximity of housing, jobs, and amenities within walking distance of one another.⁴⁶ To the extent that it defers to ITE guidelines that focus solely on “use” as the factor driving parking demand, the Draft SLDC does not accurately account for the way in which sustainable development approaches, like mixed-use development, can ultimately reduce the overall need for parking.

It is also noteworthy that Section 7.10.4 of the Draft SLDC would prevent a developer from relying upon existing on-street parking for any portion of the minimum parking requirements. This restriction is questionable, as there may be situations in which the presence of existing on-street parking results in a measurable decrease in the need for on-site parking.

Lastly, in addition to the number of minimum parking spaces required in the Draft SLDC, the minimize size of parking spaces (generally, 9 feet x 19 feet) may be excessive in certain situations. Smaller spaces may be an appropriate approach for some projects, particularly where the spaces abut a landscaped area that can accommodate an “overhang.”

Roadway Widths

Table 7-12 and Table 7-13 contain the design standards for urban roads and rural roads, respectively. Several of these provisions would appear to impose excessive requirements for the amount of paved area. For example, for the urban road “sub-collector,” the Draft SLDC requires two 11-foot wide travel lanes, along with two 5-foot wide on-road bike (or non-vehicular) lanes, and two 4-foot wide sidewalks. This equates to 32 feet of roadway paving (for the vehicle lanes and bike/non-vehicular lanes) and 8 feet of paved sidewalks, for a total of 40 feet of paved area. In comparison to “Low Impact Development” (“LID”) sustainable design standards, whose advocates include the U.S. Environmental Protection Agency and many other federal, state and local agencies, these roadway pavement widths would be considered excessive.⁴⁷ Prince George’s County, Maryland, an early-adopter of LID, modified its roadway design standards to reduce required pavement widths from 36 feet to 24 feet, resulting in a 33% decrease in pavement width.⁴⁸ Requiring a paved sidewalk on only one side of a street is another suggestion that may reduce the area of pavement.⁴⁹ Similar to the excessive parking requirements, the

⁴⁵ Urban Land Institute and the National Parking Association, *THE DIMENSIONS OF PARKING* (5th ed.) at 11.

⁴⁶ *GROWING COOLER* at 94, 153

⁴⁷ See, for example, USEPA. *Reducing Stormwater Costs through Low Impact Development (LID) Strategies and Practices* (Dec 2007 - EPA 841-F-07-006), which contains several case studies of local governments having reduced pavement width requirements to reduce the impacts of stormwater.

⁴⁸ Prince George's County Maryland Department of Environmental Resources Programs and Planning Division, *Low Impact Development Design Strategies: An Integrated Design Approach* (June 1999), p. 2-11.

⁴⁹ *Id.*

arguably unnecessary extra roadway pavement has the potential to result in more significant heat island and stormwater impacts.⁵⁰

Another fundamental concern with the Sustainable Design Standards is that the Draft SLDC does not appear to provide an appropriate procedure by which to vary from these standards. Specifically, there are no “waiver” provisions that would allow design flexibility to accommodate projects that seek to further sustainability goals. This flexibility is clearly needed in the areas of parking and roadway design, but it may also be appropriate for certain landscaping or other design requirements. In the absence of a “waiver” provision, it would appear that any deviation from the Sustainable Design Standards in Chapter 7 would necessitate the issuance of a variance.⁵¹ Given the strict standards that must be met to obtain a variance, a variance is unlikely to be granted to accommodate minor design modifications. There needs to be a separate design modification procedure through which relief may be obtained.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to modify the Sustainable Design Standards that are not consistent with the County’s sustainable development goals. Specifically, the minimum parking requirements should be modified to require fewer parking spaces for certain uses and to provide for additional flexibility in applying parking requirements to sustainable design approaches, such as mixed use, that provide the potential for reduced parking demand. In addition, the County should reconsider its roadway design paving requirements, perhaps by consolidating requirements for bike lanes and sidewalks (where appropriate) or by allowing the use of unpaved surfaces to meet the requirements. Furthermore, the County should consider creating additional flexibility in the Draft SLDC to allow for modifications to the Sustainable Design Standards where it can be demonstrated that such modifications promote the County’s sustainable design objectives. The County should, of course, establish standards to guide the appropriate decision-making body in evaluating such waivers or modifications.

Issue: Recent Release of Zoning Map Accompanying Draft SLDC Text: The County has only recently released a draft Zoning Map to accompany the Draft SLDC limiting the ability of property owners to determine its impact in conjunction with the test and no analysis has been forthcoming to show how the new zoning districts will impact existing property owners.

The Draft SLDC appears to establish a very different framework for zoning than the existing Land Development Code. Under the existing Land Development Code, all areas in the County are zoned for residential and agricultural uses and commercial districts are established through a

⁵⁰ We also note that the current draft of the Draft SLDC does not contain any standards for stormwater management that may apply under the U.S. Environmental Protection Agency’s National Pollutant Discharge Elimination (NPDES) program (Section 7.19 is entitled “NPDES” and is listed as reserved). The addition of stormwater requirements to the Draft SLDC is likely to add further costs to development, particularly given the Draft SLDC’s excessive paving requirements.

⁵¹ We note that Section 4.9.7 of the Draft SLDC (Variances) states that “This section pertains specifically to the provisions of the Draft SLDC relating to height, area and yard requirements,” and it does not reference design standards. The Draft SLDC, however, does not appear to contain any other provisions that suggest alternative forms of relief are available for modifications to the design standards.

master plan process.⁵² The Draft SLDC, on the other hand, proposes a more traditional zoning scheme, proposing several Base Zoning Districts, as well as Planned Development Districts and Overlay Zones. The zoning districts proposed in the Draft SLDC consist of:

- Eight residential districts;
- Two non-residential districts,
- One mixed-use district
- Six Planned Development districts; and
- Six different overlay zones.

While the County has provided a zoning map and several documents to explain and justify the proposed changes to the County's zoning,⁵³ it has failed to make available any detailed documentation that shows how it is applying the new SLDC's zoning districts to land within the County, and what effect this will have on individual property owners. The establishment of new zoning districts will likely result in the creation of a substantial number of nonconforming uses and structures, which may affect owners' ability to use and modify their property. For example, the current code permits residential uses anywhere in the County, while the Draft SLDC would prohibit single family uses within a Commercial or Industrial District. This means that any such existing single family residential uses in these new districts would become nonconforming.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County's draft zoning map be available for public review and that it extend the public comment period long enough to allow for review of the map *in conjunction* with the text. In addition, the County should prepare supplemental materials to explain its rationale for applying the Draft SLDC's zoning districts to land within the County and, most importantly, to describe the impact that the application of the zoning districts will have on property. Specifically, the County should identify any resulting changes that impact development capacity or property values or that will result in the creation of nonconformities.

Issue: Inconsistent and Unclear Development Review Terminology: The Draft SLDC development review procedures use inconsistent terminology and are unclear.

The Draft SLDC uses several terms to refer to a project approval (or denial). There are references to the County issuing a "development order," a "development approval," a "development permit," and a "final decision." The following are examples of the use of these different terms (emphasis added):

In the context of *Approvals*:

⁵² Santa Fe County website: "*Building and Development Services FAQ*", available at: http://www.santafecountynm.gov/growth_management/building_development_services/building_development_services_faq.

⁵³ *Sustainable Land Development Code: Proposed Zoning/Density Framework*, Nov-11, available at: http://www.santafecountynm.gov/userfiles/Draft_SLDC/zoning_density_11102011.pdf.

- **Sections 4.2.** No change in use shall be made ... unless all applicable *development approvals* and the appropriate *development order* are obtained in accordance with this chapter. *Development orders* are required for land division, subdivision, construction, land alteration, land use or development activity to ensure compliance with the Draft SLDC, other County ordinances and regulations and applicable state and federal laws and regulations.
- **Section 4.4.1.8.** [Generally, the procedures for all applications have these common elements...] Issuance of a *development order* approving, approving with conditions, or denying the application, together with written findings describing and supporting the action adopted;
- **Section 4.4.11.** Written notice of a *final decision* of the Administrator to approve or approve with conditions pursuant to NMSA 1978, Sec. 39-3-1.1 shall constitute the issuance of the *permit*.
- **Section 4.8.2.** A *development permit* is a written document that authorizes a development in accordance with the Draft SLDC.

In the context of Appeals:

- **Section 4.4.1.9.** [Generally, the procedures for all applications have these common elements:] Any appeal of the *development order*;
- **Section 4.5.4.** Any party with standing may appeal a *final decision* of the Planning Commission to the Board.

With reference to these examples, there are several instances in which the terms are used interchangeably, suggesting that they have the same meaning. For example, in the outline of general procedures, Section 4.4.1 states that a “*development order*” is issued to approve or deny a project.⁵⁴ Later, the more detailed procedures in section 4.5 refer to the issuance of a “*final decision*.”⁵⁵ Table 4.1, however, identifies “*Development Permit*” as one of the County’s approvals.

In contrast, Section 4.2 states that: “No change in use shall be made, no land division, subdivision, construction, land alteration, land use or development activity and no building or structure shall be erected, added to, or structurally altered, or occupied unless all applicable *development approvals* and the appropriate *development order* are obtained in accordance with this Chapter.”⁵⁶ This section suggests that there is a distinction between a “development approval” and a “development order” but the chapter does not contain any explanation of this distinction. Nor does it address the regulatory implications of each type of approval.

The definitions of these terms in *Appendix A* of the Draft SLDC do not provide any clarification:

Development Approval: authorized action that grants, or grants with conditions, an application for approval of development.

⁵⁴ Sections 4.4.1.8 of the Draft SLDC (emphasis added).

⁵⁵ Sections 4.5.11 and 4.5.12 of the Draft SLDC (emphasis added).

⁵⁶ Section 4.2 of the Draft SLDC (emphasis added).

Development Order: the written decision of the Board, Planning Commission or Administrator with respect to the granting, granting with conditions, or denial of an application for development approval.

Development Permit: any development order granting development approval of an application.

As defined, these terms do not appear to be mutually exclusive; it is not clear from the text of the Draft SLDC why their meanings overlap.

The Draft SLDC's imprecise and inconsistent use of these terms makes the development approval and appeal process unclear, which may confuse and frustrate property owners seeking project approvals and hinder efficient implementation of the Draft SLDC by County staff.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County should revise Chapter 4 (and any related references in other chapters) to clarify the approval process and use terms consistently throughout the Draft SLDC. If there are meaningful distinctions between the terms identified above, those distinctions should be clearly explained.

SUMMARY OF ISSUES CONCERNING SPECIFIC PROVISIONS IN THE DRAFT SLDC

Section	Issue	Comment
§1.4.2.1	Purpose and Intent – Provision of Capital Facilities and Services.	This purpose and intent statement does not account for instances in which an applicant provides the capital facilities and services at the established levels of service as part of a project.
§1.15.7.3.3	Draft SLDC Text Amendments or Zoning Map – Subsequent Applications	The two year restriction on subsequent applications is excessive.
§3.5	Decision-Making Bodies – Hearing Officer	Chapter 3 incorrectly suggests that a Hearing Officer is a decision-making body.
§4.4.4.8	Pre-Application Neighborhood Meetings	A mediation for the concerns raised during a pre-application meeting is completely unnecessary.
§4.4.6.2	Completeness Review	The requirement to act within a “reasonable period of time” is too subjective.
§4.5.4	Appeal of a Final Decision of the Planning Commission	It is unclear whether the reference to the “recordation” of the final development order is the same as when the filing of the final decision with the County Clerk,
§4.7.1.4	Planning Commission Hearing – Minutes	The requirement for <i>verbatim</i> minutes would appear to be excessive, and would likely be a burden for the County to provide.
§4.9.6.8	Conditional Use Permit – Amendments	This section omits any reference to an amendment for a decrease in project size, density or intensity.
§4.9.7.4	Variance – Review Criteria	This section is poorly drafted.
§4.9.8	Beneficial Use and Value Determination	This section creates a new administrative requirement that must be “exhausted” prior to a property owner bringing a regulatory takings claim against the County, imposing additional costs to property owners.
§4.9.9.3	Nonconforming Status	This section is poorly drafted.
§4.9.9.8.3	Nonconforming Structures – Reconstruction	There does not appear to be any provision addressing the reconstruction of a nonconforming nonresidential structure.
§4.9.9.10.3	Nonconforming Lot – Prohibition on Reduction of Size	This section does not contain any exception for situations in which a nonconforming lot is reduced in size by third party action, such as a land taking by a public entity.
§4.9.9	Nonconforming Uses	This section is inaccurately titled, and it would benefit from a subsection that addresses nonconforming <i>development features</i> .
§6.2.1	SRAs – Applicant Prepared	The requirement that consultants disclose conflicts of interest is odd and inappropriate for applicant-funded SRAs.

Section	Issue	Comment
§6.6.4.1	Traffic Impact Assessment – Traffic Service Standards	It is not clear how the standard for the V/C ratio will relate to the Level of Service (LOS) standard.
§7.6.3.1.2.c	Landscaping and Buffering – Significant Trees	This restriction on the removal of “significant trees” is another example of a restriction in the Draft SLDC that requires a means for some flexible relief.
§7.15.3.1	Open Space – Neighborhood Parks	It is unclear how the Draft SLDC will determine the number of residents in a neighborhood and for what is meant by “per subdivision.”
§7.17.6.2	Terrain Management – Grading and Clearing	The Draft SLDC does not define what is meant by “mass grading,” which could potentially lead to arbitrary interpretations and result in disputes.
§7.17.6.6	Terrain Management – Grading and Clearing	This section unnecessarily restricts grading up to a property line.
§7.17.8	Terrain Management – Cuts and Fills	It is unclear how “cut and fill slopes” differ from other forms of grading.
§7.22.1	Financial Guaranty	It is unusual for a local government to require financial guarantys for the construction of private site improvements.
§7.22.9	Financial Guaranty	This provision provides another example of excessive discretion being given to the Administrator.
§13.2.1	Affordable Housing Requirements	The referenced map, Map 14-1, does not appear to be included within the Draft SLDC.
§13.2.1.1	Affordable Housing Requirements	The Draft SLDC does not define the terms “Major Project” or “Minor Project” as used in this Chapter.

ISSUES CONCERNING SPECIFIC PROVISIONS IN THE DRAFT SLDC

Issue: Purpose and Intent – Provision of Capital Facilities and Services.

Section 1.4.2.1. [The Draft SLDC shall:] Require that no new development approval shall be granted unless there is adequate on and off-site provision of capital facilities and services available to the development at levels of service established in the SGMP, the Capital Improvement and Services Program (“CIP”) and the Official Map established pursuant to the SGMP;

Comment: This purpose and intent statement appears to require that capital facilities and services be in place and available to a development prior to a development approval being issued. It overlooks instances in which, through a development agreement, an applicant makes provisions *to provide* the capital facilities and services at the established levels of service as part of a project.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the Draft SLDC to modify this purpose and intent statement accordingly.

Issue: Draft SLDC Text Amendments or Zoning Map – Subsequent Applications

1.15.7.3.3. Denial. No application for an SLDC text or map amendment shall be received or filed with the Administrator within two (2) years after the County has denied an application for an SLDC text or map amendment with regard to any portion of the same property.

Comment: The two year restriction on subsequent applications is excessive.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this provision to restrict the filing of subsequent applications for only a one year period.

Issue: Decision-Making Bodies – Hearing Officer

3.5 (General)

Comment: Chapter 3 is entitled “Decision-Making Bodies.” Its purpose is “to establish the authority of the Board, Planning Commission, Administrator and Hearing Officer.”⁵⁷ Despite the title of the chapter, it is clear that the Hearing Officer is not a “Decision-Making Body.” The role of the Hearing Officer is strictly limited to assisting the Board and the Planning Commission (and possibly the Administrator) with their duties by conducting public hearings and making recommended written findings of fact and conclusions of law.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the chapter to clarify that the Hearing Officer is not a “Decision-Making Body.”

Issue: Pre-Application Neighborhood Meetings

4.4.4.8. The applicant may hold a mediation to address concerns from the neighborhood pre-application meeting.

Comment: A mediation for the concerns raised during a pre-application meeting is completely unnecessary. While this section suggests that it is discretionary on the part of the applicant, the inclusion of this provision in the Draft SLDC is likely to be used by disgruntled neighbors to exert leverage on the applicant by claiming that an applicant is not being cooperative if the applicant does not conduct a mediation to address neighbor concerns.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County remove the provision referencing the possibility of mediating concerns raised at a pre-application meeting.

⁵⁷ Section 3.1 of the Draft SLDC.

Issue: Completeness Review

4.4.6.2. Completeness Review Determination. The Administrator shall issue a written determination on completeness after review of application and attachments within a reasonable period of time. The Administrator shall transmit such determination to the owner/applicant.

Comment: The requirement to act within a “reasonable period of time” is too subjective. For a process as simple as a completeness review, the Administrator should be required to act within a set, relatively quick, timeframe, such as five or ten business days.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section of the Draft SLDC to impose a specific timeframe (five or ten business days) by which the Administrator shall issue a completeness review.

Issue: Appeal of a Final Decision of the Planning Commission

4.5.4. Appeal of a Final Decision of the Planning Commission. Any party with standing may appeal a final decision of the Planning Commission to the Board. The application seeking an appeal of a decision of the Planning Commission must be filed with the Administrator. An appeal from a decision of the Planning Commission must be filed within thirty (30) working days of the date of the decision *and recordation* of the final development order by the Planning Commission.

Comment: It is unclear whether the reference to the “recordation” of the final development order is the same as when the filing of the final decision with the County Clerk, which appears to be the operative date for final decisions of the Planning Commission in Section 4.4.12.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise this section to use clear and consistent terminology for these procedures.

Issue: Planning Commission Hearing – Minutes

4.7.1.4. Minutes. Written minutes shall be prepared and retained with the evidence submitted at the Planning Commission hearing. *Verbatim minutes* shall be prepared for all applications for which the Planning Commission has final authority and for which a timely appeal has been filed.

Comment: Verbatim minutes are likely to be costly, and are not necessarily useful for the review of proceedings. The requirement for verbatim minutes would therefore appear to be excessive, and would likely be a burden for the County to provide. It is also likely that the County would shift the costs of providing verbatim minutes to an applicant, thereby increasing the costs of development in the County. It would be more reasonable if the County required that “detailed “minutes be prepared.

Recommendation: The Santa Fe Association of REALTORS® recommends that The County remove the requirement for “verbatim” minutes and substitute it with a requirement for

“detailed” minutes, perhaps with the additional requirement for making and preserving an audio recording of each hearing.

Issue: Conditional Use Permit – Amendments

4.9.6.8. Amendments. An amendment is a request for any enlargement, expansion, greater density or intensity, relocation, or modification of any condition of a previously approved and currently valid CUP.

Comment: This section omits any reference to an amendment for a decrease in project size, density or intensity. Perhaps the County’s intent is that no formal approval of such a project change is required; however, if so, it would be helpful to have this clarified. In addition, the Draft SLDC remains unclear as to the required process if a decrease in project size, density or intensity results in some other changes to the project site. It is unlikely that the County would not seek to retain some form of post-approval review of these changes.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to include a statement that any project change that results in a decrease in the project size, density or intensity does not require formal review and approval through an amendment or any other process. Alternatively, to provide additional clarity in the event that the project change results in some alterations to the site design, the County may want to revise the Draft SLDC to indicate that such changes require nondiscretionary review by the Administrator.

Issue: Variance – Review Criteria

4.9.7.4. Review criteria. A variance may be granted only where a literal enforcement of the SLDC provisions would result in unnecessary hardship for the landowner, which typically involves the deprivation of rights commonly enjoyed by other properties in the same zoning district. The planning commission may grant a variance request:

1. Where the request is not contrary to the public interest; and
2. Where, owing to special conditions, a literal enforcement of the code will result in unnecessary hardship;
3. So that the spirit of the SLDC is observed and substantial justice done; and
4. So that the goals and policies of the SGMP are implemented.
5. In addition, the planning commission must find that the applicant’s request represents a minimum easing of the code requirements to make possible the reasonable use of the land, building or structure.

Comment: This section is poorly drafted, as there is an “and” between #1 and #2, as well as between #3 and #4, but not otherwise. While the intent of the drafters is, presumably, that all five criteria must be met for the granting of a variance, the imprecise drafting could lead to confusion in the application of these decision-making criteria.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to state that “The planning commission may grant a variance request if all the five following criteria are met”. In addition, the criteria should be stated more formally, separated by a semi-colon, with “and” being used only between criteria 4 and 5.

Issue: Beneficial Use and Value Determination

4.9.8. Beneficial Use and Value Determination (BUD).

Comment: This section of the Draft SLDC creates a new administrative requirement that must be “exhausted” prior to a property owner bringing a regulatory takings claim against the County. Often, local governments impose this type of process solely to introduce an additional procedural layer of defense against takings claims. Property owners are forced to bear the additional procedural costs associated with the BUD review in order to make their claim “ripe” for judicial review.

Recommendation: The Santa Fe Association of REALTORS® recommends that this BUD procedure either be eliminated, or a provision added that requires the County to pay an applicant’s legal fees if a developer or owner applicant establishes that the application of a SLDC regulation or SGMP or area policy to its project requires some form of relief.

Issue: Nonconforming Status

4.9.9.3. Nonconforming Status. The use of land, use of a structure, or a structure itself, including but not limited to substandard parcels or structures not complying with applicable dimensional standards, shall be deemed to have nonconforming status when the use, structure or land:

1. does not conform to the current regulations prescribed in the district in which such use, structure or land is located; or
2. does not conform to the minimum lot size and use by right to develop under the base zoning district in which such lot, parcel or division is located; and
3. was in existence and lawfully constructed, platted, located and operating prior to, the regulations that made such use, structure or land nonconforming.
4. The nonconforming use, structure or land has been operating since the time that the use, structure or land first became nonconforming without abandonment.

Comment: This section is also poorly drafted. For one, it is unclear what practical distinction is intended between #1 and #2, as both seem to refer to similar situations with different wording. Also, presumably, #4 is a mandatory requirement, although there is no “and” or “or” linking it to the earlier numbers, possibly creating the potential for an inconsistent interpretation.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to consolidate the situations in #1 and #2 and to state that “The use of land, use of a structure, or a structure itself ... shall be deemed to have nonconforming status when the use, structure or land meet all of the following criteria:”. In addition, the criteria should be separated by a semi-colon, with “and” being used only between criteria 3 and 4.

Issue: Nonconforming Structures – Reconstruction

4.9.9.8.3. Nonconforming Residential Structures. A residential structure that was established in accordance with all regulations in effect at the time of establishment shall not be deemed nonconforming solely due to the fact that it does not comply with the maximum density standards of the SLDC. If such a structure is destroyed by accidental means, it may be rebuilt provided that the number of dwelling units does not exceed the number that existed prior to destruction or the maximum density limit of the subject zoning district, whichever is greater.

Comment: This section contains the requirements applicable for the reconstruction of a nonconforming residential structure. There does not appear to be any provision addressing the reconstruction of a nonconforming nonresidential structure.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County add a provision that addresses the reconstruction of a nonconforming nonresidential structure.

Issue: Nonconforming Lot – Prohibition on Reduction of Size

4.9.9.10.3. Prohibition on Reduction of Size. A nonconforming lot may not be further reduced in size.

Comment: This section does not contain any exception for situations in which a nonconforming lot is reduced in size by third party action, such as a land taking by a public entity.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County add an exception to this prohibition for reductions in lot size that result from land takings.

Issue: Nonconforming Uses

4.9.9 (General)

Comment: The caption of this section is “Nonconforming Uses”; however it also addresses nonconforming structures and lots and the caption should be modified accordingly. In addition, the section would benefit from a subsection that addresses nonconforming development features, such as parking, landscaping, or other features, with provisions allowing reasonable modifications of these features. An example of this approach can be found in Will County, Illinois’ Zoning Ordinance, which contains the following provisions:

155-15.50 Nonconforming Development Features

155-15.50-A. Description

A nonconforming development feature is any aspect of a development—other than a nonconforming lot, nonconforming use, nonconforming structure or nonconforming sign—that was lawfully established, in accordance with zoning regulations in effect at the time of its establishment but that no longer complies with one or more standards of this zoning ordinance. Common examples of nonconforming development features are off-street parking or loading areas that contain fewer spaces than required by current

standards or otherwise do not comply with applicable regulations, and sites that do not comply with current landscaping and screening requirements.

155-15.50-B. General

Nonconforming development features may remain except as otherwise expressly stated in this zoning ordinance, but the nature and extent of nonconforming site features may not be increased except as otherwise expressly stated in this zoning ordinance.⁵⁸

The standard that Will County applies to modifications (i.e. no increase to the extent of the nonconformity) is clear and it permits reasonable modifications to existing sites. A similar standard could be included in the Draft SLDC to accommodate development features that are made nonconforming by the newly imposed Sustainable Design Standards of the Draft SLDC.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise the section caption. In addition, it should add a section that addresses nonconforming development features. It should affirmatively state that the nonconforming development features may be continued and that modifications to these features are permitted if the modifications would not increase the extent of the nonconformity.

Issue: SRAs – Applicant Prepared

6.2.1. Applicant prepared. Except for DCIs, an applicant for discretionary development approval shall prepare their own SRAs as required in this Chapter. All such consultants shall disclose any information as to conflict of interest, financial interests, or other disqualifying interest that would prevent their ability to provide to the County fair and independent SRAs. The applicant shall deposit, as determined in the Fee Schedule approved by the Board, cash, a certified check, bank check or letter of credit, to cover all of the County’s expenses in reviewing the SRA, including engaging consultants and for a Hearing Officer where required.

Comment: The requirement that consultants disclose conflicts of interest is odd for applicant-funded SRAs. If the applicant is procuring the consultant services, it presumably results in financial interest for the consultant. This interest, however, should not automatically disqualify the consultant or suggest that the consultant cannot provide a fair and independent review.

In addition, we note that the underlined section is poorly drafted – the reference to “such consultants” is unclear, as the immediately preceding sentence does not refer to consultants.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County remove this requirement for the disclosure of contrary interests, as it would not be reasonable to apply it to applicant-funded SRAs. The County should also revise the imprecise reference to “such consultants.”

⁵⁸ Will County Zoning Ordinance, Effective October 1, 2012 (section referenced noted).

Issue: Traffic Impact Assessment – Traffic Service Standards

6.6.4. Traffic Service Standards. The standards for traffic service that shall be used to evaluate the findings of traffic impact assessment are as follows:

6.6.4.1. V/C ratio. A volume-to-capacity (V/C) ratio of 0.80 shall not be consistently exceeded on any highway, and a V/C ratio of 0.90 shall not be consistently exceeded on any arterial or collector road. “Consistently” means that the V/C ratios are exceeded based on average daily peak-hour traffic counts, projections, or estimates.

Comment: It is not clear how the standard for the V/C ratio will relate to the Level of Service (LOS) standard. Do both standards need to be met? If so, the County should be prepared to justify situations in which the applicant meets the LOS requirements, but the project cannot be approved.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County clarify the relationship between the V/C ratio and the LOS standard.

Issue: Landscaping and Buffering – Significant Trees

7.6.3.1.2.c. Significant trees shall not be removed from the slopes greater than thirty percent (30%).

Comment: This restriction on the removal of “significant trees” is another example of a restriction in the Draft SLDC that requires a means for some flexible relief. It is possible that a project may require the removal of one significant tree on such a slope, and the Draft SLDC does not appear to allow for a waiver from this requirement.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this restriction (and others like it) to allow applicants greater flexibility to modify the sustainable design standards.

Issue: Open Space – Neighborhood Parks

7.15.3.1. Neighborhood Parks.

1. A neighborhood park shall be provided at one acre for every 200 residents provided that no park shall contain less than one (1) acre per subdivision.

Comment: It is unclear how the Draft SLDC will determine the number of residents in a neighborhood, particularly for new construction. It is also unclear what is meant by “per subdivision.”

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise this requirement to either put it in terms of the number of dwelling units, or provide a standard for projecting the number of residents per unit for particular housing types. The County should also clarify what is meant by the “per subdivision” reference.

Issue: Terrain Management – Grading and Clearing

7.17.6.2. Mass grading of a site is prohibited.

Comment: The Draft SLDC does not define what is meant by “mass grading,” which could potentially lead to arbitrary interpretations and result in disputes.

Recommendation: The County should define the term “mass grading.”

Issue: Terrain Management – Grading and Clearing

7.17.6.6. No grading is permitted within one foot of a property line, except for roads driveways and utilities.

Comment: If a property owner has the permission from the abutting property owner to grade up to the property line, there is no reason for the County to restrict it.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County modify this section to require that grading within one foot of a property line may take place with the consent of the abutting property owner.

Issue: Terrain Management – Cuts and Fills

7.17.8.1. All development, including roads, buildings, parking areas, and driveways shall be located so as to minimize areas of cut and fill. Fill slopes shall not exceed a 3:1 ratio and cut slopes shall not exceed a 2:1 ratio unless designed by a New Mexico Professional Engineer.

7.17.8.2. Cut and fill slopes combined shall not exceed 20 feet.

7.17.8.3. Retaining walls shall not exceed ten feet in height

7.17.8.4. All cut and fill slopes shall not be less than three (3) feet from property lines.

Comment: It is unclear how “cut and fill slopes” differ from other forms of grading. In general, all grading consists of either cuts or fills.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County clarify what situations it intends to regulate with this cut and fill restriction, and how they differ from other types of grading.

Issue: Financial Guaranty

7.22.1. Financial Guaranty Required. Prior to the recording of a final plat or issuance of a development permit for non- residential or multi-family development over 10,000 square feet, the applicant shall submit for approval to the Administrator financial guarantys for construction of any required public or *private site improvements* or reclamation in accordance with the requirements of this section, as applicable.

Comment: It is unusual for a local government to require financial guarantys for the construction of private site improvements. It is unclear what the County’s rationale is for

requiring such guarantys, particularly when the County will presumably have other means of recourse (permit revocation and civil enforcement, for examples) if improvements are not constructed as required.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County remove this requirement for the submission and review of guarantys for private site improvements.

Issue: Financial Guaranty

7.22.9. Demand on Financial Guarantee. If the Administrator determines that the Applicant will not construct any or all of the improvements in accordance with all required specifications, the Administrator may demand on the collateral of such funds as may be necessary to construct the improvements in accordance with the specifications.

Comment: This provision provides another example of excessive discretion afforded to the Administrator. This section lacks any procedure for obtaining relief in the event that an applicant disagrees with the Administrator’s determination.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County revise this section to provide an applicant with the ability to appeal the Administrator’s determination.

Issue: Affordable Housing Requirements

13.2.1. Applicability. This Chapter shall apply to each Project within the unincorporated areas of central and northern Santa Fe County shown on Map 14-1.

Comment: Map 14-1 does not appear to be included within the Draft SLDC.

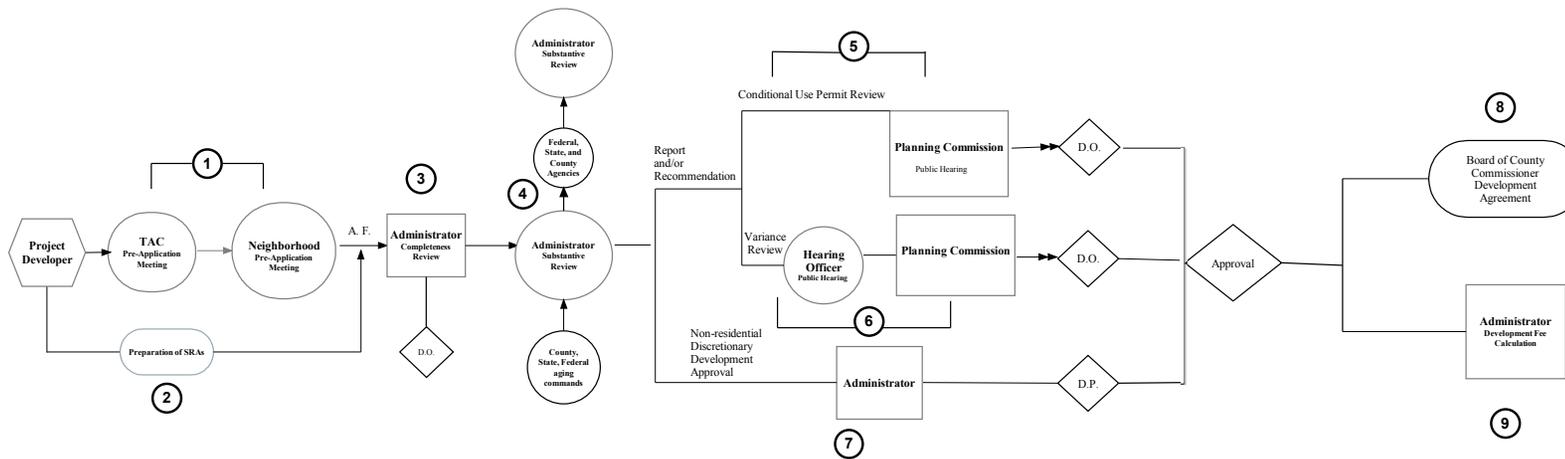

Recommendation: The Santa Fe Association of REALTORS® recommends that the County either incorporate the referenced map into the Draft SLDC or it should provide a full reference to the map and how to obtain it.

Issue: Affordable Housing Requirements

13.2.1.1. Major and Minor Projects. Of the total housing provided in any Major Project, no less than fifteen percent (15%) shall be Affordable Housing as defined herein. Of the total housing provided in any Minor Project, no less than eight percent (8%) shall be Affordable Housing as defined herein.

Comment: The Draft SLDC does not define the terms “Major Project” or “Minor Project” as used in this Chapter.

Recommendation: The Santa Fe Association of REALTORS® recommends that the County define these terms accordingly.

2.1.4. Community Plans.

2.1.4.1. A Community Plan provides specific planning, design and implementation for a traditional, contemporary or other geographic community. A community plan may be implemented either through the zoning map or through creation of a community district overlay zone.

2.1.4.2. It is the intent of this subsection to permit communities to create a community planning process, directed by County planning staff. The community planning process is intended to provide diversity of representation during the planning process and provide consistency with the goals and policies of the SGMP and SLDC.

2.1.4.3. The Community Plan is intended to identify development and growth impacts for an area and provide strategies and land use recommendations including a future land use plan consistent with the SGMP.

2.1.4.4. A Community Plan is intended to permit communities to recommend adoption of particular land use regulations based on the needs and goals of the community and shall conform to the procedures set forth in the SLDC, and to subsequently update plans as necessary due to changing circumstances.

2.1.4.5. Community Planning Process.

1. The community planning process is initiated by filing a letter of application with the Administrator. Alternatively, the Administrator may initiate the planning process sua sponte. The application shall include:

a. A list of members who are proposed to be the initial members of the planning committee, which shall include residents, property owners and business owners who are generally representative of the community;

b. An explanation of the conditions that justify undertaking the community planning process, or an explanation of conditions that justify amending an existing community plan; and

c. A map of the proposed community boundary, or, in the case of an application for amendment of an existing plan, a map of the existing community boundary.

2. The application shall be reviewed by the Administrator for completeness and referred to the Board of County Commissioners. If the application is approved, the Board shall, by resolution, establish the planning committee and, if the application is for a new planning area, establish the planning area. The Board shall approve the planning committee upon recommendation of the Administrator. Once the committee is approved, County planning staff may initiate planning activities. Additional persons may participate as members of the planning committee throughout the planning process without the necessity of appointment by the Board.

3. All planning sessions and activities shall be open to the public and advertised throughout the community and coordinated by County planning staff. Open discussion and diversity of opinion shall be encouraged. The community plan shall document resident, property owner and business owner participation and representation.

4. County planning staff in coordination with the planning committee shall develop a public participation plan that assures representation of a diverse cross section of the community. The public participation plan may include public meetings, surveys, establishment of topic specific subcommittees, outreach to community groups and interested parties.
5. County planning staff shall provide planning expertise and administrative support to the planning committee. The planning committee shall determine the planning process to be used and the basic guidelines for consensus decision-making.
6. The planning committee shall work closely with County planning staff to develop and draft a community plan or amendment that is consistent with the SGMP.
7. To develop the community plan, the planning committee with support and guidance from County staff, shall accomplish each of the following tasks:
 - a. Compile an initial list of issues, present the list to the community, and take note of all feedback. Analyze all such feedback and make appropriate amendments to the list;
 - b. Describe and analyze the planning framework;
 - c. Develop community profile and provide demographic data of plan area;
 - d. Prepare a community vision statement, which must be a clear statement of the desired future of the community;
 - e. Prepare a description of how the community fits within the development patterns within the context of the overall County;
 - f. Analyze the existing land use and zoning within the community and create a map depicting existing land uses and development patterns;
 - g. Analyze the local cultural and natural resources, including water quality and availability;
 - h. Examine the local infrastructure, including utilities, telecommunications, roads and traffic; and
 - i. Develop a land use plan and implementation strategies which includes a future land use map, proposed zoning and design standards (as applicable).

2.1.4.5. 8 AMENDING A COMMUNITY PLAN

2.1.4.5.8.1. Proposals to amend an existing Community Plan may be made :

- a. at the direction of the BCC or Planning Commission
- b. by County Planning acting upon a public request for amendment
- c. by a planning committee approved by the BCC
- d. by a CPO approved by the BCC for the specific geographic area encompassed by the Community Plan.

2,1,4,5,8,2, COMMUNITY PLANNING AMENDMENT PROCESS

The amendment process is initiated by either a written directive to the Administrator by the BCC or through the filing of a proposal application to the administrator by any of the entities listed in 2.1.,4.5.8.1.

The proposal Application must :

A. Clearly identify the entity that is proposing the amendment. If the proposed amendment is being submitted by Planning as part of a public request, the identity of the requester must be clearly stated and any corporate affiliations or links identified.;

B .state the date that the amendment proposal has been submitted;

C..List the organizations, entities, and Agencies that the proposed amendment has been provided to for comment.

D. Include Any responses received

E. Present all proposed amendments to the existing plan, together with any existing language, charts, maps, and/or numbered sections that have relevance to the proposed changes.

F. state an explanation that justifies the proposed amendments,

G. provide a map of the existing community plan boundaries.

2.1.4.5.9. The Administrator will review the application for completeness and notify all parties listed in 2.1.2.5.8.1 and any organization with standing that an application for a community plan amendment has been received.

2.1.4.6. Review and Adoption of Community Plan Amendments.

1. County planning staff shall review and analyze the proposed amendment for consistency with the SGMP.

2. The Administrator shall make a determination of consistency before the adoption process begins.

2. The Administrator shall refer the proposal to appropriate County staff and outside review agencies for independent review..

3. Proposed amendments originating with County Staff shall be reviewed by either the Community Plan's "planning Committee" or by its approved CPO and any organization with standing.

4. All reviews shall be incorporated into the public record by the Administrator. and shall be made available to the public at any subsequent public hearing.

4. The Administrator shall hold either a legislative or quasi-judicial public hearing upon the proposed amendment, as described in Chapter 4, or shall request that the BCC conduct such a public hearing.

5. Notice of the public hearing shall be provided by publication once a week for two consecutive weeks in a newspaper of general circulation within the community, and by posting notices for at least two weeks prior to the public hearings in a conspicuous place in the community. [Notice will also will be placed on the County Web-Site, and sent via E-mail to all organizations with standing.](#)

6. Following the completion of the public hearings, the Administrator shall review all comments received during the public hearings and make a recommendation on the proposed amendment to the Planning Commission and the Board of County Commissioners .

7. The Board may approve the community plan amendment as submitted, approve with amendments, or deny.

2.1.4.7. Status of Community Plans. After approval by the Board, a community plan amendment shall constitute an amendment to the SGMP.

2.1.4.8. Implementation. Following approval of a community plan [amendment](#), County staff shall develop the appropriate overlay district(s) changes to implement the Community Plan [amendments](#).

2.1.4.9. Periodic Review. Each community plan will be reviewed periodically by [either](#) a planning committee or County staff. The review will be made for recommendations for appropriate amendments and shall include at least one public meeting in the community. The recommendations of the planning committee and any recommendations received during the public meeting, and a recommendation of the Administrator, shall be presented to the Board of County Commissioners. [The BCC shall approve or reject recommendations for amendments to a Community Plan following the process described in 2.1.4.5.8.](#)

2.1.5. Plan Amendments.

2.1.5.1. The Board, the Planning Commission or the Administrator may initiate proposed amendments to the Community Plans. Proposed amendments to a community plan shall be accomplished through the procedure set forth [in 2.1.4.5.8.](#)

2.1.5.2. No amendment to the Community Plan or the zoning map, involving a majority of the land within a single tract or parcel of land in the same ownership shall be adopted unless it is demonstrated that there has been a substantial change in the condition of the area surrounding the owner's property, or there was an error or mistake made in the adoption of the future land use or zoning map. An application to amend any plan described in this chapter shall be processed according to the procedures set forth in Chapter 4.

2.1.5.3. An application to amend any plan described in this chapter shall be filed with the Administrator.

2.1.5.4. The Administrator shall review the application and shall determine if the application is complete pursuant to the provisions of §4.4.6. The Administrator shall inform the applicant of the status of the completeness of the application. If the Administrator determines that the application is incomplete, the application shall be returned to the applicant. The applicant shall be instructed in writing as to the reasons for the incompleteness of the application.

s2.1.5.6. In determining whether a proposed amendment shall be approved, the Planning Commission and Board shall consider the factors set forth in the SLDC, New Mexico judicial decisions and statutes. No SGMP amendment, Area, District or Community plan amendment or SLDC zoning map amendment

will be approved unless it is consistent with the SGMP or the applicable Area, District or Community Plan.

2.1.5.7. The applicant, and any person that could have proposed a plan amendment under this chapter, may appeal the decision of the Planning Commission to the Board so long as the person or the applicant files a written notice of appeal with the Administrator within ten (10) days of the date of the Planning Commission's development order or decision.

2.1.5.8. Approval of an amendment to the Community plan does not authorize the use, occupancy, or development of property. The approval of a plan amendment shall require the applicant to apply for development approval pursuant to the provisions of the SLDC, which may occur concurrently with the plan amendment process.

2.1.5.9. The Board, Planning Commission or the Administrator shall initiate a county-wide review of the Community plan, and the zoning map, every three (3) to five (5) years. [All recommended amendments shall be processed as described in 2.1.5.8.](#)

2.1.6. Consistency. The SLDC and all amendments thereto shall be consistent with the SGMP and applicable Community Plans, the CIP and the Official Map.

12.13.2. TDRs or PDRs.

- The goal of the TDR program is to preserve:
sensitive lands such as agricultural land, wetlands, wildlife preservation areas, conservation areas, areas requiring cultural preservation, areas within traditional communities, open space, trails, and other significant preservation areas identified on the Official Map.
 - Sending areas are set aside for non-impacting uses
 - Receiving areas purchase a density bonus within limits
 - The county would manage a TDR bank to facilitate sale and transfer.
- Denominations of TDRs are in "dwelling units".

12.13.2.1. A transfer or purchase of development rights for a specific parcel, tract, lot, or trail segment to the County land bank may be authorized by the Board, consistent with a development order granting BUD relief, or may be created by the issuance of "a TDR certificate by the Administrator as part of a development order. TDR certificates for trail creation may be created without any subsequent division of property and will not affect the remaining property's zoning status.

12.13.1.1.1. Transfer of Development Rights or TDR's may be considered a vehicle leading to the retirement of a property owner's right to develop a specific piece of land in Santa Fe County. A land owner who retires a property by transferring those rights may no longer utilize that property for any development that requires a development review, development plan, or building permit.

The retired property, still owned by the owner of record, may utilize the retired property for the following uses:

- ranching
- agriculture
- parkland
- trails
- wetland preservation
- wildlife preservation
- open space
- grazing
- hunting
- fishing
- any other non-land impacting use not specifically outlawed by statute.

Property retired through the use of a TDR is owned by the deed holder, and no transfer of title has taken place. A PDR, on the other hand transfers the title of a designated property to a new owner, with permanent restrictions as listed in 12.13.1.1.1. in place in perpetuity.

12.13.1.1.2 Property listed as “retired” after a TDR has been issued may be transferred by the owner. However, retired property cannot be developed by any subsequent owner, as dictated in 12.13.1.1.1. Property listed as “retired” through the issuance of TDR Certificates may be purchased by the County Land Bank from a willing seller, or presented to the County Land Bank as part of an approved Level of Service (LOS) plan, its associated Land Use Development Order or as part of any approved subdivision application.

12.13.1.1.3 The deed for the property within which a portion has been retired is annotated by the County Clerk upon notification of the County Land Bank Administrator. The location of the retired portion and the number of the certificates being provided by the County Land Bank Administer is attached to the deed, and like an easement, “goes” with the deed. Property retired through the use of the TDR process cannot be bought back through the use of the TDR process.

12.13.1.1.3. Property acquired by the County Land Bank as part of the TDR Process may be incorporated into the County Open Space, Parkland and Trail System and may be opened for public use.

12.13.2.2. Once a transfer or purchase of development rights is approved, the Administrator shall issue to the owner of the receiving parcel a certificate assigning to the receiving parcel, and all present and future heirs, successors and assigns, the development rights that the receiving parcel is entitled to through the transfer or purchase of development rights. The certificate shall be promptly recorded with the County Clerk. Such certificate shall describe the development rights transferred, refer to the deed transferring the development rights, and the certificate shall have a copy of the deed attached.

12.13.2.2. Once a transfer or purchase of development rights is approved. the Administrator shall issue to the owner of the parcel a certificate or certificates equal to the acreage being retired from development.

The deed for the property within which a portion has been retired is annotated by the County Clerk upon notification of the County Land Bank Administrator. The location of the retired portion and the number of the certificates being provided by the County Land Bank Administer is attached to the deed, and like an easement, “goes” with the deed.

The “retired” property is recorded in the “Retired Properties” data base and is recorded to the land use map database, and with the County Assessor.. Once a parcel of land has been retired through the TDR process, the administrator shall issue a development order to the retired property owner , all present and future heirs, successors, and assigns stating that all development rights to the described parcel have been retired except for those specifically described in Section 12.13.1.1.1. The certificate shall be promptly recorded with the County Clerk. Such certificate shall describe the development rights transferred, refer to the deed transferring the development rights, and provide the serial numbers of the TDR Certificates issued by the Administrtaor as compensation for the retirement of the development rights attached.

12.13.2.3. Once a transfer or purchase of development rights is approved, the owner of the sending parcel shall record a certificate prepared by the Administrator in the chain of title of the sending property a certificate that clearly states that all development rights inherent in the sending parcel have been voluntarily ,surrendered in perpetuity. Such certificate shall include a copy of the “TDR certificate or certificates signed by the property owner.

12.13.2.4, The TDR Certificate:

The TDR Certificate, issued upon acceptance of an application for the transfer of development rights to a specific property, is a controlled document, produced by the land bank, issued according to the following formula:

Retired Acres/Base Density.

To clarify this, a donor wishes to retire one acre of land and generate a TDR certificate in an area zoned 160 acres, the One acre divided by 160 would generate a .00625 Dwelling Unit TDR certificate. A Transfer of Development Rights for 160 acres would generate a TDR certificate worth 1 dwelling unit.

If the same TDR was created in an area zoned at 20 acres per dwelling, the TDR certificate would equal .05 dwelling units. Transferring development rights to twenty acres would generate a certificate worth one dwelling unit.

The certificate can be traded, much like the papers of a registered quarter horse or a Registered vehicle. A valid certificate is produced for the owner of the retired property in the amount determined by the approved application to the Land Bank. When the certificate is sold to a third party, it is signed over to the new owner, who must likewise register the document and pay a transfer fee based on the purchased value of the certificate. A new certificate is issued to the new owner. When a certificate is needed for an actual transfer to a new, “receiving” property, it must be turned in to the land bank, where it would be retired once the necessary approvals have been granted. Retired certificates and records of “active” certificates would be held by the Land Bank as proof that specific properties in Santa Fe County have indeed been retired. A database linking numbered certificates with retired properties will be maintained by the Land Bank Administrator.

The Value of a TDR Certificate

The value of a third party transfer of a development certificate will largely be set by supply and demand. TDRs purchased by the land bank directly from willing sellers could not exceed 2/3 the appraised value of the property or 100% of the assessed value of the complete parcel divided by the retired portion. Available TDR certificates would be sold by the Santa Fe Land Bank at a price determined by the average of all certificates sold in a specific period (ie. Six months).

Developers may negotiate for TDR’s with willing sellers of any property that is within a designated sending area. Upon agreement, buyer and seller will apply to the Land Bank for TDR certificates equal to the dwelling units required in the development order. Once all

other sub-division requirements are met, and the proposed development has been approved, the Land Bank Administer will:

1. retire the development rights for the identified property
2. issue the TDR certificate(s) for the sending property to the buyer
3. collect fees for the transfer.
4. The new owner will then retire these certificates with the County Land Bank.

12.13.2.4. Application. A TDR or PDR is granted through the BUD process and an application for a BUD is an application for the TDR or PDR or the TDR or PDR is granted through development agreement between the County and the Landowner.

12.13.2.5. Application to DCIs. Owners or lessees of property applying for an overlay zoning district classification for a development of countywide development (DCI) shall only be authorized to transfer or sell development rights to the County Land Bank.

12.13.3. Receiving or Sending Properties.

12.13.3.1. No property shall be designated as a receiving or sending property for a TDR or PDR from or to a DCI, unless the Board has concurrently granted to both the sending and such receiving properties by development order.

12.13.3.2. Sending areas shall be limited to properties that have been classified by the Hearing Officer and the Board upon the issuance of a development order in a beneficial use determination proceeding. Sending areas may also consist of areas earmarked for preservation or sensitive lands such as agricultural land, wetlands, wildlife preservation areas, conservation areas, areas requiring cultural preservation, areas within traditional communities, open space, trails, and other significant preservation areas identified on the Official Map. Sending areas are also those identified in Ordinance No. 2001-07, as amended. Sending Areas may also include areas in Traditional Communities and preferred open space areas as indicated on the Official Map or areas designated as trail easements identified in an applicants response to LOS requirements.

12.13.3.3. A property identified as a sending area may develop the property consistent with then-applicable zoning regulations, or record a permanent easement preserving it without development in perpetuity (see 12.11.1.1.1).

12.13.3.4. Receiving areas shall be located in approved planned districts. Receiving areas shall be entitled to a bonus incentive as follows:

SDA-1: TDR Certificates may be utilized anywhere in SDA-1 at a density of 2 times the underlying zoning unless prohibited by this code, the zoning map, or community plan, or with an approved development order for a major subdivision. In this case, TDR certificates may be utilized by a developer for up to 3X the underlying density. Using TDR Certificates in SDA-1 where the underlying zoning is one house per 2.5 acres, a one dwelling unit TDR would permit a second house to be built.

SDA-2: TDR Certificates may be utilized anywhere in SDA-2 at a density of 2 times the underlying zoning unless prohibited by this code, the zoning map, or community plan, or with an approved development order for a major subdivision. In this case, TDR certificates may be utilized by a developer for up to 3X the underlying density. Using TDR Certificates in SDA-2 where the underlying zoning is one house per 20 acres, a one dwelling unit TDR certificate would permit a second house to be built.

SDA-3: TDR Certificates may be utilized anywhere in SDA-3 unless prohibited by this code, the zoning map, or community plan on a 2X the underlying zoning density, or with an approved development order for a major subdivision. In this case, TDR certificates may be utilized by a developer for up to 3X the underlying density. Using TDR Certificates in SDA-3 where the underlying zoning is one house per 160 acres, 1 one dwelling unit Certificate would permit a second house to be built.

The receiving area shall, as appropriate, apply to amend its final subdivision plat or final site plan to accommodate the TDRs or PDRs. Developers applying for approved planning districts must purchase TDR certificates sufficient to cover dwelling unit certificates equal to the zoning requirement for each additional housing unit planned. For example; A development planned for a Residential Fringe Zone (1 dwelling per twenty acres) could apply for a second dwelling unit with the purchase and retirement of of a 1 dwelling unit TDR certificate, or certificates totaling 1 dwelling unit.

12.13.4. Notification of the County Assessor. The County shall notify the County Assessor of the transfer or purchase of development rights within thirty (30) days of any of the following:

12.13.4.1. the approval a TDR or PDR;

12.13.4.2. the issuance of a certificate for the TDRs and PDRs;

12.13.4.3. purchase of development rights by the County for the County Land Bank;

12.13.4.4. the receipt by the County or the County Land Bank of a donation of development rights; and

12.13.4.5. the sale, lease or conveyance of development rights by the County Land Bank.

The Assessor shall adjust the valuations for purposes of the real property tax of the sending parcel and of the receiving parcel or parcels, if any, appropriately for the development rights extinguished or received.

12.13.5. Establishment of the County Land Bank.

12.13.5.1. The Board will establish a development rights bank, otherwise referred to as the “County Land Bank,” to be administered by the Administrator, subject to approval by the Board.

12.13.5.1.1 The Santa Fe County Land Bank Shall:

Purchase TDRs for property in any designated “sending area” at 2/3 the appraised value of the property, when directed by the BCC.

Purchase TDRs for property in any designated “sending area” at the assessed value of the property, upon direction by the BCC.

Accept donations of Property TDRs, designated as “open space” through development agreements.
Accept donations of property TDR’s from land owners wishing to alter the assessed value of property so “retired”.
Create TDR certificates for property that the County purchases for open space or is donated to the County fee simple.
Produce trackable TDR Certificates in 1,5,10,20,50,100 acre denominations.
Sell TDR certificates to the public.
Develop and Administer the TDR Certificate program
Issue TDR certificates to willing landowners who desire to “retire” property in designated “sending areas”
maintain the San Fe County “Retired land” database
Administer programs to track valid ownership of TDR certificates.
accept TDR certificates as part of the land use process

12.13.5.2. The Administrator shall have the power and authority to negotiate a purchase of development rights, subject to the approval of the Board.

12.13.5.3. The County Land Bank may, for conservation or other purposes, hold indefinitely any development rights it possesses.

12.13.5.4 Duties of the Land-Bank Administrator

The Santa Fe Land Bank will be administered by the Santa Fe Land Bank Administrator. The Administrator shall be appointed by the Board of County Commissioners.:

12.13.5.4.1. The Santa Fe Land Bank Administrator shall:

Maintain the Santa Fe County Land Bank
Administer funds generated by the Land Bank
Produce Santa Fe County TDR Certificates
Maintain the Land bank database, including mapping software that will:
locate all property that has been retired by the issuance of a TDR certificate”
locate all “sending” and receiving areas
Track certificate ownership
Track certificate links to specific land parcel
Track all notification and provide updates to the County land use map.
Generate monthly TDR Certificate average value report
Serve as a central contact point for re-assessment of retired properties in conjunction with the County Assessor.
Insure that retired properties are as noted on County deeds with restrictions indicating that development rights have been retired
Serve as the County Code Enforcement arm to insure that deed restrictions on retired properties are enforced.
work with the assessor’s office to define a “retired Development Rights’ category for tax purposes.

Set a monthly value for the sale of County Owned TDR Certificates based on average price paid for Certificate transfer from one owner to another.

12.13.6 TDR or PDR certificates are required when:

12.13.6.1. As part of the Development Review process, TDR certificates are required by any development that requires a variance from the Santa Fe County Code. Certificates must be presented to the Land Bank equal to twice the area requested for variance.

12,13,6,2. for any development that requires a lot-split, in any area, and for any Guest House or compound that rental status has been applied for. In these instances, Certificates must equal the total land area affected. For example, a request to make a guest house that sits on a ten acre plot a rental would require a certificate for 10 acres to be transferred to the land bank.

12.13.6.3. TDR Certificates would be issued TO the Land Bank when property is designated as “open space” by a developer as part of a development agreement.

12.13.6.4. An applicant desires to bring a non-conforming property to “conforming” status (see 12.13.7)

12.13.6.4 As part of the LOS requirement for Trails, whereby the subdivision application must indicate a specified trail segment to meet its requirement for approval (see Table 12.1). The identified trail segment would generate a TDR or PDR certificate once the subdivision is approved.

12.13.6.4. As part of a LOS requirement for Parks or Open Space.

12.13.7. TDR’s and non-conforming or “antique” subdivision

12.13.7.1 Non-conforming subdivisions are any parcel of land that was platted prior to the establishment of the New Code’s zoning Ordinance, and does not conform to the conditions set by the New Code.

In order for an owner of a non-conforming parcel to establish conformity with the codes zoning, the owner may elect to purchase Transfer of development Right (TDR) certificates equal to the number of acres needed to establish conformity. As an example, a developer that owns an undeveloped five acre lot in a zone that requires ten acres (Rural Residential) to be in conformance, may purchase five acres of TDR certificates. This would essentially transfer sufficient development rights to the property (in this case $5 + 5 = 10$) to create a conforming lot. Presented to the administrator as part of an application for a building permit, the developer would not have to apply for a variance and could receive a building permit with ministerial approval. The Land bank Administrator would issue a certificate of conformance that would be attached to the deed filed with the County Assessor.

Walter Wait

Recommendation to apply the strict language used for sexually oriented businesses to sand and gravel extraction.

10.20.1.5. There is convincing documented evidence that gravel mining businesses, because of their very nature, have a deleterious effect on both the existing businesses around them and the surrounding residential areas adjacent to them, causing increased crime and the downgrading of property values;

10.20.1.6. It is recognized that gravel mining businesses, due to their nature, have serious objectionable operational characteristics, particularly when they are located in close proximity to each other, thereby contributing to blight and downgrading the quality of life in the adjacent area;

10.20.1.7. The Board desires to minimize and control these adverse effects and thereby protect the health, safety, and welfare of the citizenry; preserve the quality of life; preserve property values and the character of surrounding neighborhoods and deter the creation of blight;

10.20.1.8. The Board has determined that locational criteria alone do not adequately protect the health, safety, and general welfare of the people of the County;

10.20.3.1. It is unlawful:

- 1.** For any person to operate a gravel mining business without a valid gravel mining business license issued by the County pursuant to this section.
- 2.** For any person who operates a gravel mining business to employ a person to work for the gravel mining business who is not licensed as a gravel mining business employee by the County pursuant to this section.
- 3.** For any person to obtain employment with a gravel mining business without having secured a gravel mining employee license pursuant to this section.

10.20.3.2. An application for a license must be made on a form provided by the County. All applicants must be qualified according to the provisions of this section.

10.20.3.3. The application shall be notarized and shall include all information required in this section, *including the following:*

- 1.** The full true name and any other names used in the preceding five (5) years, address, social security number and date of birth;
- 2.** The current business address;
- 3.** A set of fingerprints suitable for conducting necessary background checks pursuant to this section;
- 4.** If the application is for a gravel mining business license, the name, business location, legal description, business mailing address and phone number of the proposed gravel mining business;
- 6.** The issuing jurisdiction and the effective dates of any license or permit held by the applicant relating to a gravel mining business, and whether any such license or permit has been denied, revoked or suspended, and if so, the reason or reasons therefore.

7. If the application is for a gravel mining business license, the name and address of the statutory agent or other agent authorized to receive service of process.

10.20.3.4. Information provided pursuant to licensing shall be supplemented in writing by certified mail, return receipt requested, to the Administrator within ten (10) working days of a change of circumstances which would render the information originally submitted false or incomplete.

10.20.3.6. If the person who wishes to operate a gravel mining business is an individual, he or she shall sign the application for a license as applicant. If the person that wishes to operate a gravel mining business is other than an individual (such as a corporation), each officer director, general partner, or other person who will participate directly in decisions relating to management of the business shall sign the application for a license as the applicant. Each applicant must be qualified under the section entitled "Issuance of License," and each applicant shall be considered as a licensee if a license is granted.

10.20.3.7. A person who possesses a valid business license is not exempt from the requirement of obtaining any required gravel mining business license. A person who operates a gravel mining business and possesses a business license shall comply with the requirements and provisions of this section, where applicable.

10.20.3.8. The information provided by an applicant in connection with the application for a license under this section shall be maintained by the Administrator.

10.20.4. Issuance of License.

10.20.4.1. Upon the filing of a completed application for a gravel mining business license or a gravel mining business employee license, the Administrator shall issue a Temporary License to the applicant, which Temporary License shall expire upon final decision. Within twenty (20) days after the receipt of a completed application, the Hearing Officer shall either issue a license or issue a written notice of intent to deny a license to the applicant. The license shall be issued unless one or more of the following is found to be true:

1. The applicant is less than eighteen (18) years of age.
2. The applicant is delinquent in the payment to the County of taxes, fees, fines, or penalties assessed against or imposed upon the applicant in relation to a gravel mining business.
3. The applicant has failed to provide the information as required by this section for issuance of the license.
4. The applicant has been convicted of a Specified Criminal Activity. The fact that a conviction is being appealed shall have no effect under this Subsection. For the purposes of this subsection, "convicted" means a conviction or guilty plea, and includes a conviction of any business entity for which the applicant had, at the time of the offense leading to the conviction for a Specified Criminal Activity, a management responsibility or a controlling interest.
5. The required license application fee has not been paid.
6. The applicant has falsely answered a question or request for information on the application form.

7. The proposed gravel mining business is in a zoning district other than a district in which gravel mining businesses are allowed to operate, or is not in compliance with the location restrictions established for gravel mining businesses in the appropriate zoning district(s).

10.20.4.2. An applicant that is ineligible for a license due to §10.20.4.1.4 may qualify for a gravel mining business license only when the applicable time period has elapsed:

1. more than two (2) years have elapsed since the date of conviction or the date of release from confinement imposed for the conviction, whichever is the later date, if the conviction is of a misdemeanor offense;
2. more than five (5) years have elapsed since the date of conviction or the date of release from confinement for the conviction, whichever is the later date, if the conviction is of a felony offense; or
3. more than five (5) years have elapsed since the date of the last conviction or the date of release from confinement for the last conviction, whichever is the later date, if the convictions are of two or more misdemeanor offenses or combination of misdemeanor offenses occurring within any twenty-four (24) month period.

10.20.4.3. The license, if granted, shall state on its face the name of the person or persons to whom it is granted, the number of the license issued to that applicant, the expiration date, and whether the license is for a gravel mining business. A gravel mining business employee license shall contain a photograph of the licensee. The gravel mining business license shall be posted in a conspicuous place at or near the entrance to the gravel mining business so that it may be easily read at any time. A gravel mining business employee shall keep the employee's license on his or her person or on the premises where the licensee is then working or performing, and shall produce such license for inspection upon request by an authorized County official.

10.20.5. Fees. The non-refundable initial license fee and annual renewal fee for a gravel mining business license or a gravel mining business employee license shall be set by the Board at an amount determined to be sufficient to pay the cost of administering this program.

10.20.6. Inspection.

10.20.6.1. For the purpose of ensuring compliance with this section, an applicant, operator or licensee shall permit the Administrator and any other federal, state or county agency in the performance of any function connected with the enforcement of this ordinance, normally and regularly conducted by such agencies, to inspect, at any time the business is occupied or open for business, those portions of the premises of a gravel mining business which patrons or customers are permitted to occupy.

10.20.7. Expiration of License.

10.20.7.1. Each license shall expire one (1) year from the date of issuance and may be renewed only by making application as provided above. An application for renewal shall be made at least thirty (30) days before the expiration date, and when made less than thirty (30) days before the expiration date, the expiration of the license will not be affected.

10.20.7.2. When the County denies renewal of a license, the applicant shall not be issued a license for one (1) year from the date of denial. If, subsequent to the denial, the County finds that the basis for denial

of the renewal license has been corrected or abated, the applicant shall be granted a license if at least ninety (90) days have elapsed since the date that the denial became final.

10.20.8. Suspension The Administrator shall issue a written intent to suspend a license for a period not to exceed thirty (30) days if it determines that a licensee or an employee of a licensee has:

10.20.8.1. Violated or is not in compliance with any portion of this section;

10.20.8.2. Refused to allow an inspection of the gravel mining business premises as authorized by this section.

10.20.9. Revocation.

10.20.9.1. The Administrator shall issue a written statement of intent to revoke a gravel mining business license if a cause of suspension occurs and the license has been suspended within the previous twelve (12) months.

10.20.9.2. The Administrator shall issue a written statement of intent to revoke a gravel mining business license if the Administrator determines that:

1. The licensee gave false or misleading information in the material submitted during the application process;
2. The licensee has knowingly allowed possession, use, or sale of controlled substances on the premises;
3. The licensee has knowingly allowed prostitution on the premises;
4. The licensee knowingly operated the gravel mining business during a period of time when the licensee's license was suspended;
- 5.

10.20.9.3. The fact that a conviction is being appealed shall have no effect on the revocation of the license.

10.20.9.4. When, after the notice and hearing procedure described in this section, the Administrator revokes a license, the revocation shall continue for one (1) year and the licensee shall not be issued a sexually oriented business license for one (1) year from the date of revocation becomes effective, provided that, if the conditions for a provisional license are met, a provisional license will be granted. If, subsequent to revocation, the Administrator finds that the basis for the revocation found in §10.20.9.2.1 or §10.20.9.2.4 has been corrected or abated, the applicant shall be granted a license if at least ninety (90) days have elapsed since the date the revocation became effective.

10.20.10. Hearing; License Denial, Suspension, Revocation; Appeal.

10.20.10.1. If the Administrator determines that facts exist for denial, suspension, or revocation of a license under this ordinance, the Hearing Officer shall notify the applicant or licensee (respondent) in writing of the intent to deny, suspend, or revoke the license, including the grounds therefore, by personal delivery, or by certified mail. The notification shall be directed to the most current business address on file with the Hearing Officer. Within five (5) working days of receipt of such notice, the respondent may provide to the Administrator, in writing, a response that shall include a statement of reasons why the license or permit should not be denied, suspended, or revoked. Within three (3) days of the receipt of

respondent's written response, the Administrator shall notify respondent in writing of the hearing date on respondent's denial, suspension, or revocation proceeding.

10.20.10.2. Within ten (10) working days of the receipt of respondent's written response, the Administrator shall conduct a hearing at which respondent shall have the opportunity to be represented by counsel and present evidence and witnesses on his or her behalf. The Administrator shall issue a written opinion within five (5) days of the hearing. If a response is not received by the Administrator in the time stated or, if after the hearing the Administrator finds that grounds as specified in this ordinance exist for denial, suspension, or revocation, then such denial, suspension, or revocation shall become final five (5) days after the Administrator sends, by certified mail, written notice that the license has been denied, suspended, or revoked. Such notice shall include a statement advising the applicant or licensee of the right to appeal such decision to a court of competent jurisdiction.

10.20.10.3. If the Administrator finds that no grounds exist for denial, suspension or revocation of a license, then within five (5) days after the hearing, the Administrator shall withdraw the intent to deny, suspend, or revoke the license, and shall so notify the respondent in writing by certified mail of such action and shall contemporaneously issue the license.

10.20.10.4. When a decision to deny, suspend, or revoke a license becomes final, the applicant or licensee (aggrieved party) whose application for a license has been denied, or whose license has been suspended or revoked, shall have the right to appeal such action to a court of competent jurisdiction. Upon the filing of any court action to appeal, challenge, restrain, or otherwise enjoin the County's enforcement of the denial, suspension, or revocation, the County shall immediately issue the aggrieved party a Provisional License. The Provisional License shall allow the aggrieved party to continue operation of the sexually oriented business or to continue employment as a sexually oriented business employee, as the case may be, and will expire upon the court's entry of a judgment on the aggrieved party's action to appeal, challenge, restrain, or otherwise enjoin the County's enforcement.

10.20.11. Transfer of License. A licensee shall not transfer his or her license to another, nor shall a licensee operate a gravel mining business under the authority of a license at any place other than the address designated in the application.

10.20.12. Location of gravel mining Businesses.

10.20.12.1. A person commits a misdemeanor if that person operates or causes to be operated a gravel mining business in any zoning district other than a district in which gravel mining businesses are allowed to operate.

10.20.12.2. A person commits a misdemeanor if that person causes or permits the operation, establishment, substantial enlargement, or transfer of ownership or control of a gravel mining business within one-hundred (100) feet of another gravel mining business. For purposes of this section, the distance between any two gravel mining businesses shall be measured in a straight line, without regard to the intervening structures or objects or political boundaries, from the closest exterior wall of the structure in which each business is located.

10.20.12.3. A person commits a misdemeanor if that person causes or permits the establishment or maintenance of more than one gravel mining business in the same property

10.20.12.4. A person commits a misdemeanor if the person operates or causes to be operated a gravel mining business within one-thousand (1,000) feet of the following. For the purpose of this section, measurement shall be made in a straight line, without regard to the intervening structures or objects, from

the nearest portion of the building or structure used as the part of the premises where a sexually oriented business is conducted, to the nearest property line of the premises of a use listed below. The presence of a County, City or other political subdivision boundary shall be irrelevant for purposes of calculating and applying the distance requirements of this Section.

1. A church, synagogue, mosque, temple, or building which is used primarily for religious worship and related religious activities;
2. A public or private educational facility including, but not limited to, child day care facilities, nursery schools, preschools, kindergartens, elementary schools, private schools, intermediate schools, junior high schools, middle schools, high schools, vocational schools, secondary schools, continuation schools, special education schools, junior colleges, and universities; school includes school grounds, but does not include facilities used primarily for another purpose and only incidentally as a school;
3. A boundary of a residential zoning district;
4. A public park or recreational area which has been designated for park or recreational activities, including, but not limited to, a park, playground, nature trails, swimming pool, reservoir, athletic field, basketball or tennis courts, pedestrian/bicycle paths, wilderness areas or other similar public land within the County which is under the control operation, or management of the County park and recreation authorities;
5. The property line of a lot devoted to a residential use;
6. An entertainment business which is oriented primarily towards children or family entertainment;
- 7.

10.20.13. Non-conforming Use.

10.20.13.1. Any gravel mining business lawfully operating on the date of adoption of this ordinance, which is in violation of §10.20.12 shall be deemed a nonconforming use. The nonconforming use will be permitted to continue for a period not to exceed one (1) year, unless sooner terminated for any reason or voluntarily discontinued for a period of thirty (30) days or more. Such nonconforming uses shall not be increased, enlarged, extended, or altered except that the use may be changed to a conforming use.

10.20.13.2. If two or more gravel mining businesses are within 100 feet of one another and otherwise in a permissible location, the gravel mining business which was first established and continually operating at a particular location is the conforming use and the later established business(es) is/are nonconforming.

10.20.13.3. A gravel mining business lawfully operating as a conforming use is not rendered a nonconforming use by the location, subsequent to the grant or renewal of the gravel mining business license, of a use listed in §10.20.14.4, within 1,000 feet of the gravel mining business. This provision applies only to the renewal of a valid license, and does not apply when an application is made for a license after the applicant's previous license has expired or been revoked.

10.20.18. Hours of Operation. No gravel mining business, may remain open at any time between the hours of ten o'clock (10:00) p.m. and eight o'clock (8:00) a.m. on weekdays and Saturdays, or on Sunday.

Comments submitted by Walt, 10/16/2012

LEVEL OF SERVICE (LOS) FOR SANTA FE COUNTY TRAILS

Table 12-1 states that the Trails have a 1.0 mile requirement for every 1,000 residents, where the impact area is “countywide”. What does this mean?

First, lets try to define “Countywide” The 2011 US Census states that Santa Fe County has 145,648 people, The City of Santa Fe has 68,500 (2012 estimate) and the City of Edgewood has 3,735 (2010) Deduct the City Population and you have the County’s population. This would be 73,413. This would give us a total of 73.4 miles of trail as the “level of Service” needed. Figure 6-1 in the Santa Fe County n Sustainable Growth Management Plan states that the County currently owns 34.00 Miles of trails. That would mean that in order to achieve the County LOS for trails we would have to create about 40 more miles of trail, countywide. If you looks at Map 6-1 in the SFSGMP you would immediately note that this figure would not even come close to matching the proposed “regional” trail routes listed on the map.

There is something wrong with Table 12-1 LOS for trails. First, it is currently based on the Rutgers University 2010 draft report which based its numbers on existing trails, mostly found around the City of Santa Fe. It did not address the differing needs of the more rural parts of the County. Because of that, there is virtually no way to create new trails in the SDA-3 areas. Our LOS numbers for trails are simply too low.

One of the big questions concerning land use is how to preserve what are now informal rural trail systems, when development and subdivision overrun a largely agrarian community. Trail systems are the first thing to disappear with increased density.

I would propose that the LOS requirements for Trails be based on SDA area. Use population numbers of 1000 as a base for SDA-1, 200 in SDA-2, and 250 for SDA-3. Couple these numbers with the base zoning requirements.

Let’s see how this would work:

SDA-3 would require 1 mile of trail for every 250 residents in Ag/Ranch Zoning. If we assume 4 residents for house, and zoning that permits one house per 160 acres (in general), then LOS requirements would require 4 miles of trail for every 10,000 acres of newly developed land. At a zoning of 160 acres, 10,000 acres equals 62.5 houses (roughly 15 square miles) . This is roughly 4 square miles and 4 miles of trail. That’s enough to require development of at least one trail segment that would transverse the property. Trails that go from one edge of a property to another mean that eventually, trail segments would link up and form the basis for a County-wide trail system in sparsely populated portions of the County.

SDA-2 and 3 would require 1 Mile of trail for every 200 residents in RUR areas (40 acres). That works out to fifty houses on 2000 acres or 3.1.miles square (three sections). This would require 1 mile of trail to match the Required Level of Service.

SDA-2 would require 1 mile of trail for every 250 residents in Rural Fringe zoning (20 acres) and 500 residents in Rural Residential (10 acre) zones.

250 residents, where 4 residents per house, equals 62.5 houses. 62.5 houses times 20 acres equals 1,250 acres, or a LOS of one mile of trail for every 1.95 sections.

500 residents, where 4 residents per house, equals 125 houses. 125 houses times 10 acres equals 1,250 acres, or a LOS of one mile of trail for every 1.95 sections.

The same arguments can be applied to each of the zones

TRAILS AND THE TDR CERTIFICATE

I have described in the suggested TDR certificate program (Section 12.13), that TDR's form the basis for identifying a county-wide trail system. If LOS requires the identification of trail segments that cross a proposed subdivision, then TDR certificates, issued as part of a development order, lock in the easements for future trails. The trail "segments" become "sending" units and the developer is issued TDR certificates for the acreage contained in the segment. As described in the TDR, the acreage is not "public" nor is it open to the public. TDR trail segments are "easements" only.

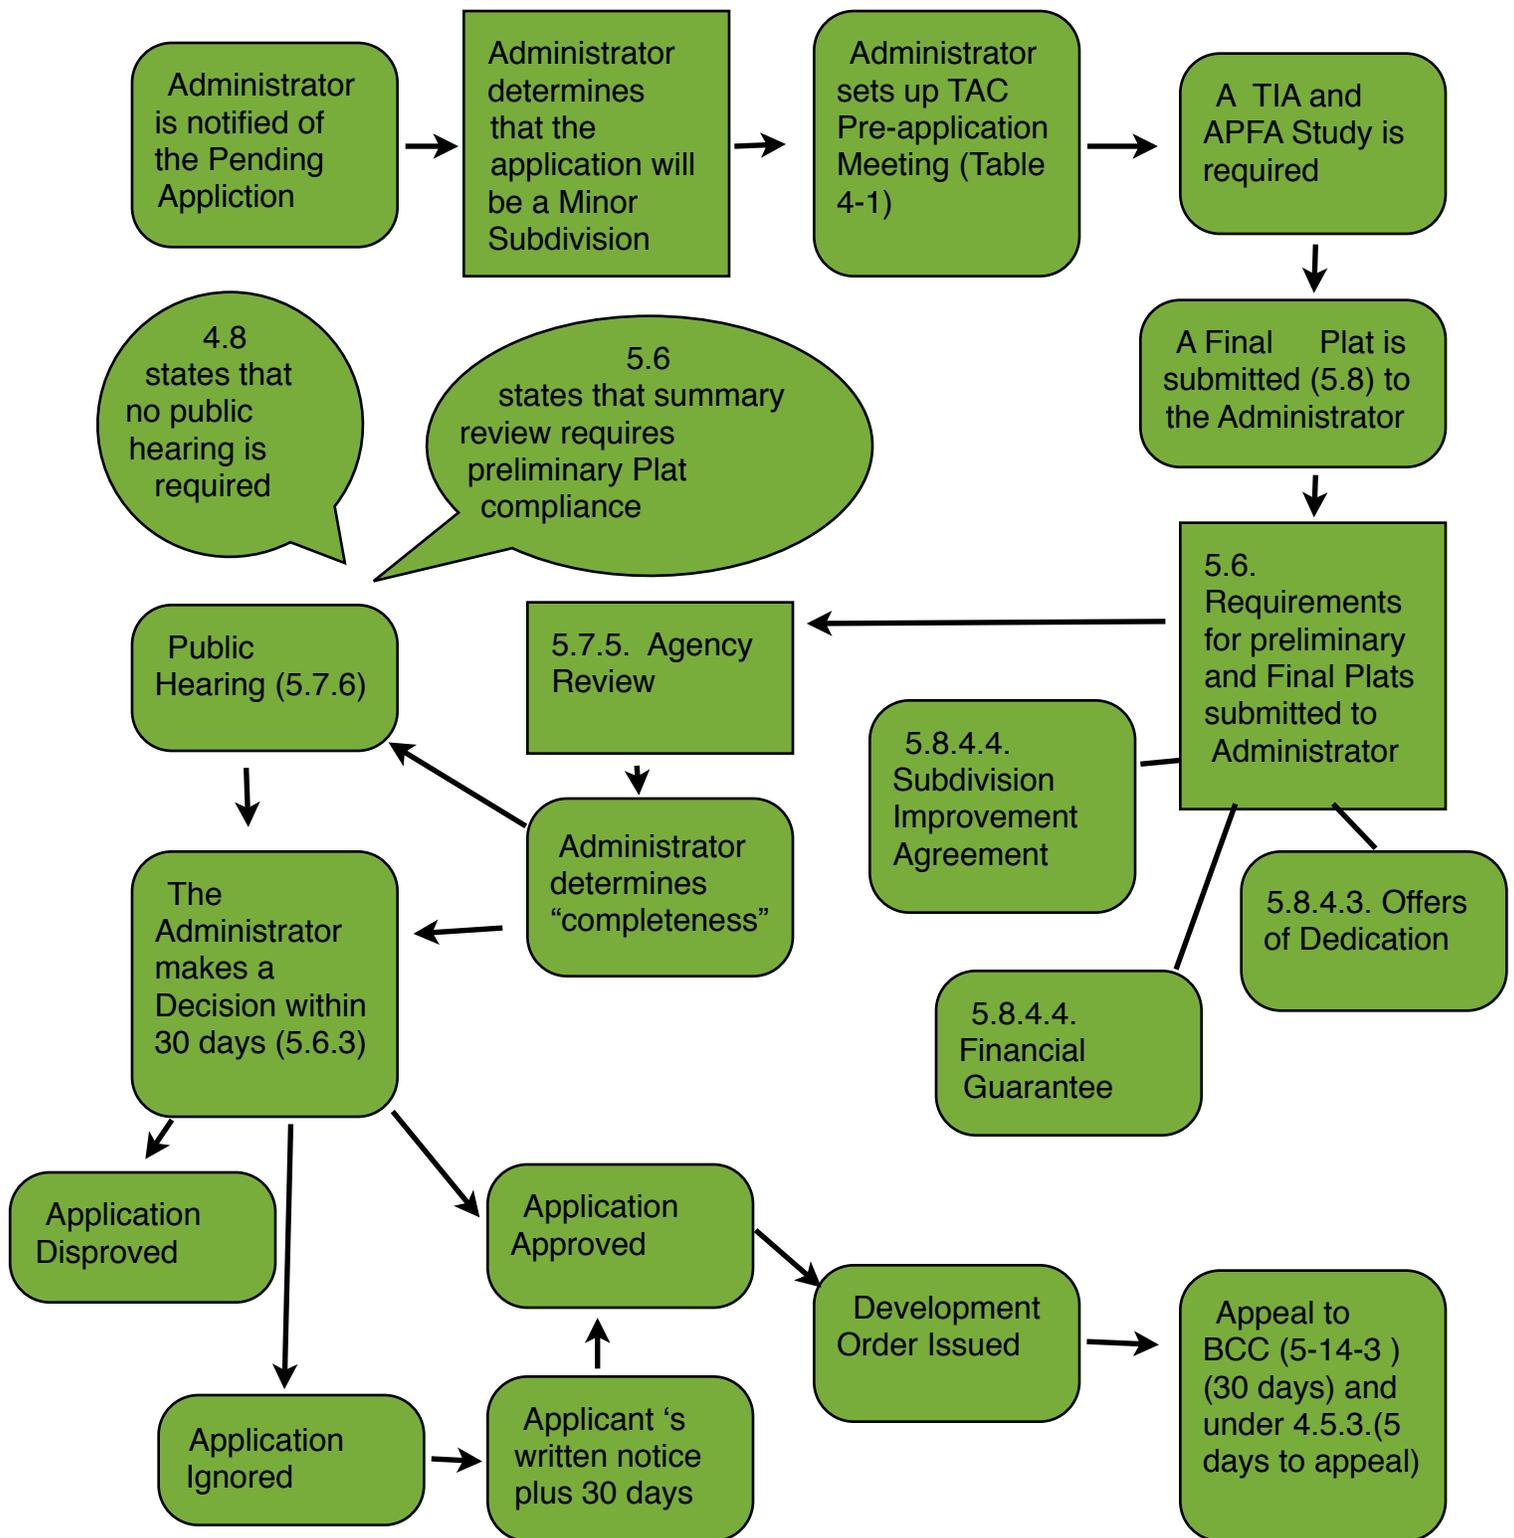

Property that has been retired with the issuance of a TDR may not be separated from its "parent" property of record with the following exceptions:

- a) The identified trail segment is recorded on any deed of record that would result in the subdivision of the parent property. The "retired" property "goes with the land, and is subject to the following :
- a) A TDR Trail Segment may be sold to the Santa Fe County Land Bank or to a non-profit corporation that creates and maintains trails for public use.
- b) A TDR Trail Segment may be given to the Santa Fe County Land Bank as part of a Development Agreement or as part of an LOS agreement, to create public trails, open space or parks..
- c) A TDR Open Space property may be sold to the Santa De County Land Bank or a non-profit Corporation that creates and maintains open space or parks for public use.
- d) A TDR Open Space property may be given to the Santa Fe County Land Bank or a non-profit Corporation that creates and maintains open space or parks for public use, as part of a development agreement.

Santa Fe County as a right to purchase TDR trail and open space segments by either negotiation with a willing seller, as part of a development agreement, or as part of a BUD process.

SUMMARY REVIEW OF MINOR SUBDIVISION APPLICATION

Scenario 1. Application to approve a Minor Subdivision of 24 parcels, on 240 acres, each ten acres in size, in SDA.2, where zoning is 10 acres.

What is required by the Administrator to determine “completeness”.

1. An Application for a final Subdivision Plat Approval which includes the following:

All requirements listed for the preliminary Plat found in 5.7.3., and final plat 5.8.4.

A copy of the report of the Pre-application TAC meeting.

All studies and Reports required in Table 6.1. These are a) Traffic Impact Assessment (FIA), and b) Adequate Public Facilities and Services Assessment (APFA)(Chapter 12) Compliance with sustainable Design Standards of Chapter 7.

A deposit to cover review costs and hearing officer fees, as determined by the Administrator. (6.2.1)

A Development Agreement (12.4)

An Affordable Housing plan approved by the Affordable Housing Administrator. (13.3).

A development order for any TDR or CDR issued by the TDR Administrator (12.13)

A report by the Administrator stating that the application is complete.

What is required to obtain a development order

All Agency and Tribal Government Review found in 4.4.1.5., and in 5.7.5.

A Quasi-judicial public hearing as required in 4.4.1.7, 4.4.1.8., Table 4.1, and 5.7.6.

The issue of a development order by the administrator.

Problems: The document is unclear on how requirements demanded of preliminary plat approvals are compressed into a “complete” application that only requires a final plat. 5.6 states that Summary review of a minor subdivision requires that the application “comply with all requirements of the SDLC including the requirements and submittals imposed on both preliminary and final plats”. It is implied, therefore, that minor subdivision must tender all of the information required under 5.7 Preliminary Plats (Major Subdivision) and must be subject to a public hearing.

This must be made clear, as in the absence of a Water Service Availability Report (WSAR) the only reference to water planning can be found under section 5.7.3.1., and in the standards found in Section 7.13. There does not appear to be any requirement that the applicant produce any documentation indicating that the County Utility is ready and able to hook up the subdivision - as a necessary part of the “completeness” study.

There is no opportunity for public input into the process except for the “public meeting”. Since this application is decided by the administrator (5.6.2). one would have to assume that the public meeting would be handled by a hearing officer.

Chapter 4.8 appears to contradict 5.7.6 and 5.6.1.. as it clearly states that a minor subdivision approval is strictly a ministerial process (4.8.3). If this is the case. then no

public meeting is required. and the public has no input whatsoever, except during an appeal.

4.5.3 states that there is only a five day window to appeal a summary review decision. 5.14 states that there is a thirty day window to appeal Administrative decisions “of a delegate of the Board”. Which is it? A five day window as in 4.5.3. is not enough time to grant notice to either the applicant or parties with standing. The five day window of appeal is in conflict with 4.6.6. (Notice of Administrative action) which requires a fifteen day posting of any development permit. One would assume that the posting is done to give residents an opportunity to object to the development order

Scenario 2:

The Administrator rejects the application described in Scenario one because with roads factored into the final plat, the subdivision failed to match the Table 5-1 Type Five Minor Subdivision rules of each parcel being greater than 10 acres in size. Also the final plat did not provide sufficient detail concerning how the parcel’s would be hooked up to the County Water System.

Rather than re-survey the property to include fewer ten acre lots and re-submit the application, the developer opts to design and submit a Planned Development zoning district containing 200 houses on a tightly clustered 40 acres, leaving the remaining acreage as dedicated open space. The Application is diagrammed as follows:
