

## **Public Trails**

*Public lands and trails within and surrounding Tesuque Valley are valued by the community and broader region. These amenities also generate visitor use impacts that may be managed more appropriately than they are at present.*

Goal: Manage visitor use impacts associated with public trailheads.

Strategy: The Tesuque Valley Community Association will work with Bishop's Lodge to explore the possibility of creating parking spaces and trailhead signage on the public right of way north of the entrance to Bishop's Lodge and/or within the Bishop's Lodge facility, as appropriate, in order to provide additional parking for bikers using the Winsor trail and alleviate parking congestion at existing trailheads.

Strategy: The Tesuque Valley Community Association will work with Bishop's Lodge to explore the possibility of providing public access to the Windsor Trail using existing resort trails and road network.

Strategy: Currently County Road 72A provides a trailhead with limited parking for the Tesuque Creek trail and Winsor trail. The Tesuque Valley Community Association will work with Santa Fe County Public Works to develop signage at the trailhead that alerts hikers of trailheads off of Hyde Parke Road that provide access to the Winsor trail and Tesuque Creek trail with more plentiful parking.

Strategy: The Tesuque Valley Community Association will work with Santa Fe County Public Works and the Tesuque Valley Volunteer Fire District to provide signage at the County Road 72A trailhead that describes penalties and the hazards of parking beyond stated limits.
