

Social Trails

For generations, walking & horseback riding have allowed us to connect with our natural surroundings and neighbors. The historic network of community trails and paths is a part of our rural lifestyle that needs protection.

Goal: Preserve Tesuque's historic social trails for community use.

Strategy: The Community will work with the County to create an official social trails map that will be adopted as part of the Tesuque Valley Community District. The map will be used to guide the review of development permit applications but will otherwise be withheld from publication so as not to increase traffic on social trails.

Strategy: Santa Fe County Building and Development Services will advise applicants seeking development permits in the Tesuque area of potential impacts to social trails based on the official Tesuque social trails map. County Development Review will encourage property owners and tenants to work with neighbors and the Tesuque Valley Community Association to maintain social trails.

Strategy: The Tesuque Valley Community Association will work with property owners to record easements for social trails with the County Clerk so that easements, points of access, and allowable uses are on record for title searches and are disclosed to new property owners.
