MEMORANDUM

DATE: December 28, 2017

TO: Board of County Commissioners

FROM: Vicki Lucero, Building and Development Services Manager *VL*

VIA: Katherine Miller, County Manager
Penny Ellis-Green, Land Use Administrator

REF.: Planning Commission Appointments/Re-Appointments

SUMMARY:

Chapter 3 of the SLDC gives the BCC the authority to appoint members of the Planning Commission. Section 3.3.3.1 states: "The Planning Commission shall consist of seven (7) members, appointed by the Board. Planning Commission Members shall be registered voters of the County. One member shall reside in each of the Commission Districts in order to provide diversity of representation; the remaining members shall be at large and may reside in any area of the County and be nominated by any Commissioner." Section 3.3.3.2 goes on to state; "The initial members of the Planning Commission shall be the current members of the County Development Review Committee (CDRC), who shall serve out their remaining terms. Thereafter, terms of members of the Planning Commission shall be for two (2) years or until after their successors are appointed. Three (3) members shall be appointed in even numbered years and four (4) members shall be appointed in odd numbered years. Members shall serve for no more than three (3) consecutive terms..." (Exhibit A).

The terms of three of the current CDRC members will expire in January of 2018. One of the members represents Commission District 2, and the other two are at-large positions.

In November of 2017, the County sent out a press release seeking interested members of the general public to serve on the Planning Commission. We received responses from 13 individuals which includes 2 of the 3 current members who have requested reappointment.

Four of the applicants that submitted a letter of interest to serve on the Planning Commission reside in Commission District 2. This includes the current member, Mr. Charlie Gonzales, who is interested in serving another term.

The list of applicants for District 2 is as follows:

Charlie Gonzales-current Planning Commission member (has served for less than 1 year)
M. Brett Holliday (Experience-Dentistry/Orthodontics, Office Management, Draftsperson)
George Shoup (Experience-Engineering and Project Management)
Felix Moeker (Experience-Operations and Project Management, Industrial Engineering)

We also received letters of interest from applicants who have requested to serve on the Planning Commission as at large members and reside in different areas of the County.

These applicants are as follows:

District 1

Susan Martin- current Planning Commission at large member (Has served for approx. 9 years)
Richard Reinders (Experience-Business owner, Building/Construction, Land Development)
David Neal-(Experience-Engineering, Project Management, Construction Inspections)

District 2

As listed above. Any of the candidates from District 2 who are not chosen to serve as the District 2 representative are eligible to serve in the at large positions.

District 3

Steve Shepherd (Experience-Engineering/Management, Member of Volunteer Fire Dept.)

District 4

Peter Dodds (Experience-Risk Management and Banking Professional, current SFC Ethics Board Member)
Patrick Murphy (Experience-Real Estate/Real Estate Management, current SFC Protest Valuation Board Member)

District 5

Cedric Page (Experience-Administration, Academics/Teaching, Member of Local Organizations)
Gail Odom (Experience-Land Use Planning and Regulation, Environmental Planning, Trust Mgmt.)
John Nitzel (Experience-Traffic/Transportation Engineering and Planning, SF MPO, SF Transit Board)

The Applicant's letters of interest and resumes are included in Exhibit B.

STAFF RECOMMENDATION:

Staff recommends the reappointment of Charlie Gonzales for the District 2 member and the reappointment of Susan Martin as an at large member to serve 2-year terms beginning January 2018 until January 2020.

In order to provide diversity within the Planning Commission, staff recommends appointment of Gail Odom to serve as the second at large member on the Planning Commission for a 2 year term beginning January 2018 until January 2020.

ATTACHMENTS:

Exhibit A— Chapter 3, Section 3.3. (Planning Commission) of the SLDC
Exhibit B – Applicants' Letters of Interest and Resumes

~~3.2.1.12. To hear and rule on appeals from discretionary decisions of the Planning Commission.~~

~~3.2.2. Action and Appeals. The Board shall hold public hearings and issue development orders, on applications for legislative or discretionary development approval, except where a final development order is authorized to be issued by the Planning Commission. Where the Planning Commission has authority to issue a development order determining a matter, the Board shall have appellate authority to review such development order if an appeal is properly perfected by the Administrator, the owner/applicant, or any other person or entity with standing to appeal the development order, no more than thirty (30) days from the date of the development order.~~

~~3.2.3. Conflict of Interest: Quasi-Judicial Proceedings. A member of the Board of County Commissioners shall not vote or participate in any discretionary development matter pending before the Board as specified in County Code of Conduct.~~

3.3. PLANNING COMMISSION.

3.3.1. Creation and Responsibilities. There is hereby created a County Planning Commission ("Planning Commission") which shall have the responsibilities and duties specified in the SLDC and in NMSA 1978, § 3-19-1 *et seq.* (1965) (as amended) and NMSA 1978, § 3-21-1 *et seq.* (1965) (as amended).

3.3.2. Duties and Powers of the Planning Commission. The duties and authority of the Planning Commission are as follows:

3.3.2.1. To perform the functions specified in NMSA 1978, §§ 3-19-1 and 3-21-7 (1965);

3.3.2.2. To review and recommend to the Board, for adoption, text and map amendments to the SLDC, SGMP amendments and the adoption and amendment of an Official Map, a Capital Improvement Plan ("CIP") and other programs for public improvements and services and financing;

3.3.2.3. To hold public hearings and prepare written recommendations to the Board on certain discretionary development approvals subject to appeal to the Board in the matters designated in Table 4-1;

3.3.2.4. To hold public hearings and recommend action on an area, district or community Plan, final development orders, and quasi-judicial discretionary development applications;

3.3.2.5. To hold public hearings and take final action and issue development orders regarding applications for variances and conditional use permits; and

3.3.2.6. To enter upon any land that is the subject of an application that is the subject of this ordinance, make examinations and surveys, and place and maintain necessary monuments and markers upon the land pursuant to NMSA 1978, § 3-19-4, upon reasonable notice of not less than seventy two (72) hours to the owner/applicant or designated agent of the land to be entered, and after adoption of an order authorizing the time, place and location of the entry onto land or site examination.

3.3.2.7. To make decisions on appeals from final decisions of the Administrator.

3.3.3. Membership and Terms.

3.3.3.1. Number; Appointments; Residency. The Planning Commission shall consist of seven (7) members, appointed by the Board. Planning Commission members shall be registered voters of the County. One member shall reside in each of the Commission Districts in order to provide diversity of representation; the remaining members shall be at large and may reside in any area of the County and be nominated by any Commissioner.

3.3.3.2. Terms and Removal. The initial members of the Planning Commission shall be the current members of the County Development Review Committee, who shall serve out their remaining terms. Thereafter, terms of members of the Planning Commission shall be for two (2) years or until their successors are appointed. Three (3) members shall be appointed in even numbered years and four (4) members shall be appointed in odd numbered years. Members shall serve for no more than three (3) consecutive terms. Members may be removed by the Board after a public hearing solely for reasonable cause set forth in writing and made part of the public record.

3.3.3.3. Vacancies. The Board shall appoint a person to fill a vacancy as soon as practicable after the vacancy is created.

3.3.4. Conduct of Planning Commission Business.

3.3.4.1. Officers; Quorum; Rules of Order. The Planning Commission shall follow the Rules of Order established by the Board for the conduct of meetings in the County.

3.3.4.2. Meetings. The Planning Commission shall meet at least once a month. All meetings of the Planning Commission shall be open to the public. Notice of such meetings shall be given in accordance with the applicable Board approved resolution establishing statutory notice for public meetings.

3.3.4.3. Minutes and Other Records. The County Clerk shall keep minutes of the proceedings of the Planning Commission, which shall reflect the vote on each matter put to a vote or, if a member is absent or fails to vote, reflect such fact; and such other records as are necessary to memorialize its transactions, findings, recommendations, resolutions, determinations and development orders, all of which shall be filed in the Office of the County Clerk.

3.3.4.4. Conflict of Interest. A member of the Planning Commission shall not vote or participate in any discretionary development matter pending before the Planning Commission as specified in the County Code of Conduct.

3.3.4.5. Recommendations and Development Orders. The Planning Commission shall not make a recommendation or take final action on any matter without first considering evidence received from the Administrator, planning staff, a Hearing Officer, or owner/applicant, reports of the pre-application neighborhood meeting, other persons with standing, tribal governments, and other county, regional, state or federal departments or agencies, as determined by law.

3.4. ADMINISTRATOR

3.4.1. Appointment. A person shall be appointed by the County Manager to serve as the Administrator. Where the SLDC assigns a responsibility to the Administrator, the Administrator may delegate that responsibility to any employee of the County.

Re: Request to be appointed to the Santa Fe County Planning Commission

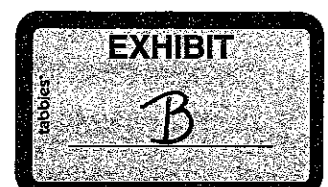

Dear Board of County Commission Members,

Please accept this letter as a request to be re-appointed to the Santa Fe County Planning Commission. Attached is a copy of my resume. I believe my experience in writing, applying and enforcing the County and City Codes would be a good asset for this position. Thank you for your consideration.

Sincerely,

Charlie D. Gonzales

BRIEF PRE-SUMMARY OF QUALIFICATIONS

I retired with the City of Santa Fe in January of 2010. My title was Technical Review Coordinator for the Land Use Department. I reviewed building permit applications, developments, subdivisions and complaints for compliance with the Escarpment Overlay District, FEMA Floodplains, Terrain Management and Landscaping. I also tracked all the letters of credit and escrow agreements for approved subdivisions, developments and permits. This also included inspections in the field for Terrain Management, FEMA Floodplains, Escarpment and Landscaping. I have attended and participated in all kinds of public and private hearings or meetings. The majority of the time I assisted the public and staff with coordination and simple explanations on technical issues. I was well liked by the public and staff. On January 27, 2010, I received an Official Proclamation from the City Council, for service to the Public, the City and the County. (Copy attached)

Currently I have been working under contract with Design Enigenuity as an inspector and project manager. Sometimes I do landscape and irrigation design. I started there in April of 2011. I have inspected numerous projects which include tributaries of floodplains, erosion prevention/mitigation, bank stabilization, reseeding, re-vegetation of disturbed areas and subdivision infrastructure.

I designed and completed a Master Landscaping Plan for the Water Treatment Plant for the City of Santa Fe located in the upper watershed of the Santa Fe River, this included an irrigation plan. The design started in May of 2011 and the actual project was constructed by the middle of December of 2011. I was also responsible for the placement and inspections of the shrubs, vines, trees and irrigation system.

In 2006 and 2007 I worked under contracts for Santa Fe County, the City of Santa Fe and the New Mexico Association of Counties. I worked for the Santa Fe County Land Use Department as the Permits & Enforcement Division Director, from July 6, 1999 to March of 2006. During this time, I worked in the same capacity as mentioned below under qualifications from 1996 – 1998. Additional duties or projects completed or which I was involved with are listed under the most recent qualifications. From October of 1996 to July of 1998, I was employed by Santa Fe County as the Building & Hydrology Division Director of the Land Use Department. Prior to that, I worked for the City of Santa Fe as an Engineering Technician I, II, III, Subdivision Inspector II, III and Senior Engineering Technician from July of 1982 to September of 1996. Before that I was employed by the following companies or agencies: Capital Engineering, (drafting, surveying, project management), for three years, A-Z Engineering &

Surveying, (drafting surveying, project management), Morris Apodaca Surveying, (draftsman, surveying), New Mexico State Highway Department, District V while I was attending NMSU.

I have been involved in various working groups, committees and commissions throughout my career, including the Santa Fe River Commission, the City Policy Planning Commission (CPPC), Extra-territorial Land Use Commission (ELUC) and the County Development Review Commission (CDRC). I am currently on the City Escarpment Working Group.

QUALIFICATIONS

7/06/99 – March 2006

I was hired by the County Land Use Department on July 7, 1999, as the Code Enforcement Supervisor for the Land Use Department. I later became the Permits & Enforcement Division Director. This division was made up of three sections, development permits, code enforcement and technical review. I spent a lot of my time with code enforcement and helped establish a Commissioner Response process. I wrote numerous letters for the code enforcement, technical review section and the development permits section and personally took responsibility for all projects, especially controversial projects and responded accordingly and /or attended community meetings and court. The department was very successful in the regulating of mining and reclamation. I left the County in 1998 and became a Project Manager for Tierra Contenta Corp. When I came back to the County in 1999, I caught Cerrillos Gravel Products Mining out of their limits and provided the documented information to the Board of County Commissioners, which resulted in the Development Permit being revoked. I was also involved in the acquisition of the property for the new County Park at San Ysidro Crossing and the Santa Fe River. This included many depositions for the violations on the property before it was acquired. I have earned the respect of most of the public in the mining communities.

I maintained close communication and a great work relationship with the Army Corp. of Engineers, New Mexico Environmental Department, State of New Mexico Construction Industries Division, State of New Mexico Manufactured Housing Division, FEMA, the Office of the State Engineer's and the City of Santa Fe, which I continue to maintain. Currently, I am a Certified Floodplain Manager and a member of the New Mexico Floodplain Managers Association.

I wrote the National Pollution Discharge Elimination System (NPDES) permit submittal, which was due to the EPA by April 23, 2003. This prevented a substantial penalty fee to the County. I would also like to mention that I did this at home while I was doing my other duties at work.

I was very much involved in public hearings, writing, implementation and enforcement of the County Rainwater Harvesting Ordinance.

Staff and I created a standard County detail sheet. I was involved with writing several ordinances or amendments. I modified the height ordinances, participated in the code re-write a few times (it was never finished), the MSRD settlement amendments and numerous others as mentioned on page 3.

I represented the Land Use Department on the City Planning Policy Commission for about four years. I also sat on the City Santa Fe River Commission. At the County I was on a joint City/County Committee appointed by the County Manager for coordination of Santa Fe River Improvements in Coordination with the Army Corp. of Engineers. A member of the following committees: Building Water Efficient Homes, Water Wise, Rainwater Harvesting and Greywater reuse which, were sponsored by the Office of the State Engineers.

QUALIFICATIONS

10/27/98 – 6/30/99

During this time I was employed under a professional contract with the Tierra Contenta Corporation as a construction inspector/project manager. The contract expired June 30, 1999. My job description was the following: periodic inspection of infrastructure construction of subdivision improvements, coordination of soil and materials tests, review of test results, inspection walk through with City of Santa Fe and utility companies, keeping a daily record/journal and attending/coordinating periodic and special meetings with the owner, city and construction contractors.

QUALIFICATIONS

8/28/98 – 9/14/98

The Rio Arriba Gravel Mining Advisory Committee hired me and Rio Arriba County as a consultant to review a version of a Rio Arriba County proposed draft ordinance for "zoning for extraction of construction materials," article 12. (See attached request letter for hire)

QUALIFICATIONS

10/96 - 7/98

I was hired at the County of Santa Fe for my extensive experience and knowledge of terrain management, subdivisions/developments, Environmental requirements, F.E.M.A. requirements, Army Corps of Engineers requirements as well as local, state and national codes employed me. This division was responsible for reviewing and approving development permits, subdivisions/development inspections, coordinating pre-construction conferences, and reviewing/approving/tracking financial guarantees, drainage complaints, floodplain requirements, special review districts, reviewing/approving/inspecting the mining ordinance requirements and verifying licensed contractors. These reviews were intensified, implemented or enhanced by my knowledge and expertise. A lot of the items mentioned below were not being addressed thoroughly or at all until I started working in the Land Use Department. The following is a list of some of those accomplishments:

- * Created a "General Construction Notes" policy.
- * Modified the development permit submittal requirement packet.
- * Directed Staff to verify licensed contractors and to maintain a list of licensed contractors in coordination with the State of New Mexico Construction Industries Division.
- * Trained staff on F.E.M.A. requirements
- * Provided retaining wall details and other standard sections for applicants.
- * Established a more cooperative relationship with Construction Industries, the State Environmental Department, the City of Santa Fe, F.E.M.A. and the Army Corp. of Engineers.
- * Established procedures and conducted numerous pre-construction conferences for subdivisions & development.
- * Created a policy for "establishing a financial guarantee with Santa Fe County."
- * Attended court on behalf of the Code Enforcement Division as an expert witness on Terrain Management Regulations and the County Code. This included illegal cuts, mining and visual impacts. We had some positive victories.
- * Directed staff to enforce the County Ordinance to require utilities to be installed underground.
- * Created a cardboard Development Permit for display, specifically for issuance by Santa Fe County for proposed improvements.
- * Obtained some of the appropriate field inspection equipment so the division could conduct thorough inspections.
- * Directed Staff to prepare letters of conditions for development permits in sensitive areas and controversial projects or developments.

Informed the Land Use Administrator and the County Manager of situations where the Public Works Department and the General Services Department also need to obtain Development Permits for improvements. The County should be setting the example.

- * I have been involved with the field and office aspects of the Mountain Special Review District, since it was adopted. Have reviewed and enforced this ordinance at the City of Santa Fe and Santa Fe County.
- * Played a major role in reviewing submittals for the Santa Fe Ski Basin, all mining submittals and the reclamation and remediation of all disturbed sites. This included follow-up inspections.
- * Started training staff on procedures and techniques for the inspections of Development and Subdivision Improvements.
- * Established contact with the New Mexico State Highway Department, in order to remind them to invite County Staff to participate in all pre-construction conferences for proposed highways throughout Santa Fe County.
- * Informed the New Mexico State Highway Department and all of their sub-contractors at that time, of the requirements of obtaining development permits for grading, cutting or filling work conducted on private property on behalf of Highway Department projects.

Another part of my job was to make presentations to various committees and commissions on behalf of the Land Use Department. This included the Extraterritorial Zoning Commission, the Extraterritorial Zoning Authority, the County Development Review Committee and the Board of County Commissioners.

QUALIFICATIONS

1986 – 9/1996

I was employed by the Public Works Department of the City of Santa Fe on July 19, 1982. During this time, I was at the City for about fourteen years and two months. Prior to that I worked for a private firm called Capital Engineering.

Drafting: Mostly consisted of updating zoned and re-zoned parcels of property on the City of Santa Fe Zoning Atlas. Implemented a reference system for looking up zones on the atlas. Have also drawn and designed street section alternatives for proposed solutions for drainage problems, plan & profiles for roads, terrain management plans, retaining walls and sections. I am capable of conducting drafting for engineering, surveying and architectural.

Subdivisions: Maintained an accurate construction file on each subdivision or development under construction. Reviewed proposed plans and engineer's estimates for infrastructure improvements as well as redline corrections and change orders prior to final approval. Coordinated pre-construction conferences with utilities, contractors and developers. Verified quantities to release pay requests for improvements. Conducted final inspections to accept dedicated infrastructure improvements for maintenance.

Technical Assistance: Assisted the public with complaints to my office or directly from the City Manager's Office and City Councilors pertaining to Code Enforcement, Land Development, drainage problems and concerns resulting from existing or new construction. Reviewed tracts or lots for "lot of record" lot consolidations, lot line adjustments, culverts, addresses, driveways, sidewalks and easement encroachments. Helped the public in procedures for lot splits, subdivisions and various land uses. Attended many meetings on behalf of the subdivision engineer for weeks and months at a time. I have many years of experience in reading and interpreting work from field notes, land descriptions, surveys, aerial photographs, plans, specifications and computations, as well as dealing with the public and associates with respect and understanding when enforcing or explaining codes.

Experience/ Inspections: I have extensive knowledge of Terrain Management Regulations, Surveying, City and County Subdivision Regulations, all applicable local, state, federal and national statutes and regulations. I am also very familiar with chapter 70 of the Uniform Building Code. I have been conducting subdivision inspections within the two and five mile Extraterritorial boundaries during my time with the City. These inspections include from clearing and grubbing to the final street signage and releasing of the financial guarantees. I have no problem working evening and weekends to accomplish an acceptable project.

Building Permits: Reviewed building permits for compliance with Terrain Management Regulations, Escarpment Overlay District, sidewalks, driveways and anything pertaining to Planning and Land Use. I have also been involved in the Mountain Special Review District. This included numerous meetings with various contractors, developers, architects and engineers in the field and office to explain these regulations. In September of 1990, I was responsible for pushing to implement a final tag system for compliance with Terrain Management Regulations, including the Escarpment Overlay District. This inspection is tied into the final Building Inspection as well as the Certificate of Occupancy. Compliance has been very successful.

QUALIFICATIONS

07/1982 – 1986

Drafting: Performed drafting for the Public Works Department, which included new road designs, traffic plans and detail sheets, City of Santa Fe standards and specifications sheets for residential streets and drainage (which have been adopted by the City Council and are still utilized today), sanitary sewer line locations and surveys, plan and profile sheets and various computations.

Subdivisions: Implemented a construction file system for new subdivisions to include all correspondence, test results, change orders, T.V. inspections of sanitary sewer lines and a daily journal. Established a specific procedure for pre-construction conferences coordinating developers, contractors, utilities and city staff. Tracked financial guarantees and conducted field inspections (this included terrain management regulations) verified quantities for approval of pay requests for infrastructure improvements.

Technical: Assisted the public with complaints or questions pertaining to Public Works inspections, sewer lines, drainage, street cuts and anything to do within the city right-of-way. Assigned addresses for building permits, verified "lot of record" and reviewed for easement or right-of-way encroachments. Ability to read and understand all kinds of maps, plats, engineering, architectural and landscaping plans. Researched information on new and existing building permits.

Field Work: Supervised survey crews, street cuts and Cutler repaving projects. Approved or rejected driveway cuts and sidewalk or culvert locations. Conducted numerous daily subdivision inspections under construction along with the pre-final and final subdivision inspections.

CERTIFICATES

- American Public Works Association – Public Works Construction Inspection June 1985
- Troxler Laboratories – Training course for nuclear testing equipment May 1987
- CPN Laboratories – Training course for nuclear testing equipment June 1987
- New Mexico State University – Short Surveying Course May 1990

- University of Madison, Wisconsin – Improving Public Works Construction Skills December 1990
- Federal Emergency Management Agency – Floodplain Managers Certification Workshop June 1995

Subject: RE: Application for Position on Land Commission
Attachments: CV1.docx

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Vicki Lucero,

This is a letter of interest in the position on the Santa Fe County Land Commission. I have attached my CV and as you may notice my qualifications might be unusual since I am not a land developer, or contractor, I am an Orthodontist. However, I admit to having always been interested in city planning and since 1976 when I attended St. John's College, Santa Fe, I developed a great affection for the City of Santa Fe. Over the years I have lived in California and Santa Fe, in both places I have purchased a number of houses as fixer uppers, so I am not entirely naive or uneducated regarding building projects. Also, I own a Commercial building in Santa Fe which will ultimately be my private Orthodontic Office.

At present I work for a corporation, Pacific Dental Services, and although I live in Santa Fe in District , I do commute to Albuquerque during the week. One additional revelation that is further evidence of my interests, is that many years ago, before I decided to attend Dental School, I was accepted to Architecture school at University of Southern California. So, for many years I have had an inkling and a dream of being involved in architecture and city development.

In addition to my curiosity and interest in renovation and architecture - I would very much like to be more involved in the community, to contribute to the city of Santa Fe. I think a position on the Land Commission would be fascinating and involve compromise, as well as protecting the charm and unique character of our city. My primary interest is to help improve and learn more about our beautiful and unique city. Please know that if I don't meet your criteria, or another applicant is superior, I would be pleased to be considered in 2020 for service to the city commission. Please keep me in mind.

I hope you will consider my application, I look forward to hearing from you at your convenience.
Sincerely,
Dr. M. Brett Holliday

M. BRETT HOLLIDAY, DDS, MDS

Vicki:

Please accept my application to serve on the Santa Fe County Planning Commission. I am a full time resident of District 2 in Santa Fe County, and my wife and I have lived at this address for 6 years.

Over the last two years I have become active in promoting sustainability in the areas under development in and near Las Campanas. I have a good working knowledge of the Santa Fe County Sustainable Development Code for Planned developments. Recently I have worked with the Land Department to help ensure the Code is followed and remediation plans are in place for development that is not up to County standards.

Attached please find my resume for your consideration. As a career Engineer, I have a wide range of skills that will be valuable to the Commission. Please let me know if you require additional information.

Sincerely,

George Shoup

The Santa Fe County Growth Management Department (Land Use Division) is currently seeking interested members of the general public to serve on the Santa Fe County Planning Commission. We are seeking the service of three members. Of the three members sought, one member must reside in Commission District 2, the other two members must reside in Santa Fe County. Appointment to the Planning Commission will be for a two-year term beginning in January of 2018 and ending in January of 2020.

Commission Members are responsible for attending monthly public hearings on the third Thursday of every month. Planning Commission members listen to County staff recommendations, project application presentations and testimony from the public. The Planning Commission subsequently makes land development related decisions and recommendations to the Board of County Commissioners. Projects heard by this commission range from variance requests to Conditional Use Permits and Planned Development districts.

Interested individuals should submit a letter of interest and resume to:

Santa Fe County Growth Management Department

SENIOR CONSULTANT | PROJECT MANAGER, ENGINEERING TEAM LEADER

Major capital project Manager, providing expertise as consultant in flow simulation, oil, gas, & fluid systems

Extensive experience working with diverse multinational engineering teams on global high-impact projects. Work in multicultural team environment, managing needs of all internal and external stakeholders. Implement capital value process, risk management, interface management, and cost and budget controls. Create high-performing teams, focusing on staff development, training, and mentoring.

SKILLS SUMMARY

- Petroleum and Mechanical Engineering
- Flow Assurance and Production Chemistry
- Steady State and Transient Pipeline Simulation
- Produced Fluids PVT Modeling and Lab Procedures
- Risk Management, HAZOP, and HAZID
- Subsea Engineering, Architecture, Installation, and Operations

PROFESSIONAL EXPERIENCE

STATOIL, Houston, TX

2014 to 2015

Lead Project Engineer, Deep Water Gulf of Mexico

- Assessed value of projects, ensuring accurate appraisal of business economics by serving as Subsea Lead for Gulf of Mexico prospects.
- Provided hands-on expertise while seconded to Chevron Project Team as Interface Coordinator and Engineering Adviser for Tahiti project.
- Provided quality assurance by evaluating operators (Shell and Anadarko) to ensure Statoil requirements for project development and serving as adviser for the partnerships.

STATOIL, Stavanger, Norway

2012 to 2013

Project Manager

- Developed technology enabling transport of heavy viscous crude oil over long distances offshore Brazil.
- Lead Engineer for flow simulation, managing people, and integration of engineering into overall projects. Cost effective solutions implemented that met company requirements for safety and reliability.
- Served on executive committee for developing large gas transmission system in North Sea, including wells and production platform, pipeline, and gas processing system for end-user consumption.

BP, Houston, TX

Paleogene Subsea Team Leader (2009 to 2011)

- Responsible for subsea architecture, flow assurance, system engineering, and high-pressure integrity pipeline protection system development for portfolio in Keathley Canyon. Many technical breakthroughs and innovations achieved, enabling economic development of this challenging high pressure high temperature subsea prospect.
- Led effort, modifying and qualifying standard 15k tree for application at 17.5k for Kaskida prospect. Led joint effort between BP, Cameron, Stress Engineering, and Minerals Management Service. Successful in integrating the efforts of all the stakeholders.

Flow Assurance Manager (2006 to 2008)

- Fostered teamwork and collaboration of diverse multinational engineering team recognized for executing difficult assignments in timely manner.
- Managed BP Houston Flow Assurance Team, including system engineering and procedures development for hydrate plug remediation, consulting on deep water assets (Kaskida, Nakika, Thunder Horse, King, Dorado, Mardi Gras pipeline, and Angola Blocks 18 and 31), startup reviews, R&D planning, Deepstar, and RPSEA Flow Assurance Committee Chairman.

BP, Houston**Thunder Horse Senior Facility Engineer and Thunder Horse Lead Integration Engineer (2000 to 2005)**

- Increased capacity of export oil cooler system, sour service studies, Thunder Hawk and Thunder Horse North appraise stage studies, training simulator upgrades, and operator training by managing startup and 1st oil procedures.
- Met project budget and timeline managing team of TECHNIP engineers responsible for subsea flow assurance strategy, subsea architecture, subsea equipment ratings, thermal hydraulic simulation, chemical injection hydraulics, MMS Deepwater Operations Plan, annulus pressure management, hydrate inhibitor and corrosion inhibitor qualification, operating guidelines, operator training, HAZOPs, and interface management.

Additional Professional Experience:

AMOCO ENGINEERING AND CONSTRUCTION, Flow Assurance Lead Engineer, Houston, TX

AMOCO EXPLORATION AND PRODUCTION, Senior Research Engineer, Tulsa, OK

OCCIDENTAL OIL AND GAS, Senior Engineer, Tulsa, OK

EDUCATION

Master of Science, Petroleum Engineering
UNIVERSITY OF TULSA, Tulsa, OK

Master of Science, Mechanical Engineering
UNIVERSITY OF TULSA, Tulsa OK

Bachelor of Science, Mechanical Engineering
RICE UNIVERSITY, Houston TX

Management Studies, Global Major Capital Projects
NORWEGIAN UNIVERSITY OF SCIENCE AND TECHNOLOGY

LICENSES

Registered Professional Engineer, State of OK
Registered Professional Engineer, State of TX

ADDENDUM

Research & Development Expertise

- Ten years' experience with Amoco Production Research Laboratory.
- Designed and operated equipment to perform high-pressure tests on hydrocarbons and water.
- Collaborated with companies and universities to develop pumps, meters, production chemistry, and simulation techniques for long-distance transport of fluids.
- Developed low-cycle fatigue models for steel under plastic strain conditions.
- Obtained Master Degrees in Petroleum and Mechanical Engineering at University of Tulsa.

Hello Vicki

I would like to be considered for the Commission Member position.

I recently retired from 3M Company and moved to Santa Fe. I am looking for opportunities to get involved and contribute in the Santa Fe community.

I have no direct experience with county planning commissions. I do however have extensive experiences that I feel would be very relevant for this position. I was a global manufacturing operations manager (executive level) and have significant experience with scaling up new manufacturing operations all around the world. My key skills include team work, strong analytical, critical thinking, and financial assessment skills.

Please see my attached resume

(651) 325-7339

OBJECTIVE STATEMENT

Recently retired and moved to Santa Fe. Seeking opportunities to get involved and contribute to Santa Fe's development.

SKILLS / KNOWLEDGE

- Scaled up Mfg Operations around the world
- Capital Asset Management
- Manufacturing Operations Mgmt
- Supply Chain Management
- Team building and leadership
- Six Sigma Black Belt
- Project Management
- Business Process development / optimization
- Strong financial acumen (asset justification)
- Strong business acumen

ACHIEVEMENTS

- Manufacturing Operation manager for a \$200 million business
- Scaled up manufacturing operations in Malaysia, Panama, Poland, and China
- Defined, justified, and installed millions of capital assets (mfg equipment, mfg site expansions, utilities, etc)
- Managed and scaled up numerous contract manufacturers
- Led manufacturing improvement operations in Germany, Brazil, Mexico, France
- Led 3M corporate wide programs to implement ERP (Enterprise Resource Planning) systems in China, Singapore, India, Mexico, Korea, and Taiwan)

PROFESSIONAL EXPERIENCE

3M Company

Executive Global Mfg Operations Manager **Automotive Aftermarket Division,** **St. Paul MN**
Led Mfg operations team that expand business, justify and implement capital investment, and deliver bottom line results.

Global Project Manager **Drug Delivery Systems Division** **St. Paul MN**
Led cross-functional project teams install mfg operations in China, scale up Lab in Singapore and improve business operations in United Kingdom.

Corporate Supply Chain Project Manager **Corp Supply Chain & Mfg Services** **St. Paul MN**
Led cross-functional teams to scale up ERP system that drive bottom line results for 3M and the deployment of Six Sigma.

Six Sigma Black Belt Manger **Optical Components Project** **Austin TX**
Led project teams that drive bottom line results and the deployment of Six Sigma methodology.

Global Supply Chain Manager: **Electronic Products Division** **Austin TX**
Global Supply Chain Manager
Managed customer service, demand planning, source of supply allocation planning, capacity planning, inventory management, and vendor managed inventory with strategic customers.

Various Engr & Supervisor positions:

Supply Chain Project Manager	Electro & Communications Group	Austin, TX
Optimized Operations Manager	Corp Mfg & Supply Chain Manufacturing	St. Paul MN
Product Development Engineer	Liquid Filtration	St. Paul, MN
Production Supv & Process Engr	Personal Protection Devices / Respirators	Valley NE
Industrial Engineer	Magnetic Media	Weatherford OK

EDUCATION / CREDENTIALS

1982 BS - Industrial Engineering and Management, Oklahoma State University
2002 Six Sigma Black Belt Certification

International: Extensive travel and assignments in Asia, Europe, and Latin America.

Languages: German as a first language (lived in Germany and Switzerland) Immigrated to US at 6 years of age.

Vicki Lucero
Building and Development Services Manager
Santa Fe County Growth Management Department

Dear Vicki:

Please consider my application for reappointment to the County Planning Commission. My resume is enclosed.

As a 34-year resident of Santa Fe County, I have followed land use and planning issues for years and know that the Planning Commission is a vital entity in determining the future of growth in our region. More recently I have served as a member of the Planning Commission and have done my best to serve fairly, honestly, and consistently, with a goal to represent all county residents.

My experience includes working collegially on bodies such as the Youth Shelters and Family Services board and as past chair of the Santa Fe Metropolitan Water Board.

Thank you for your consideration of my application. Please do not hesitate to call or email if you have questions.

Sincerely,

Susan Fry Martin

Reference: Santa Fe County Planning Commission – Membership

Please accept this letter to serve as a Planning Commissioner for Santa Fe County and become part of the process for decisions that affect our community's future by working together with other members on the Commission, Board of County Commissioners, County Land Use Division, other departments and staff, and the public.

My experience will be a positive influence on land use, development and growth. Most of my career I have been self-employed in different aspects of land use which required working closely with zoning, building, and land planning departments in Colorado and New Mexico. I have above average understanding of zoning and land planning, applied and complied with many variances commercial and residential as well as rezoned and bought and sold real estate.

I live in Santa Fe County in District 1 in the 87506 zip code (Pojoaque/Nambe Valley). Over the last 10 years I owned and operated a highly successful business in Santa Fe County that promoted agritourism, and created jobs and a positive economic impact for the County.

Background:

- 2007 to 2017: Business owner vineyard development, winery, and land subdivision in Santa Fe County. Currently semi-retired and own vacation and long term rentals
- 2003 to 2007: Land subdivision and development Colorado
- 1990 to 1993: Product development, off shore manufacturing and global marketing
- 1976 to 2003: Self-employed with building and construction
- US Army 1972 to 1975

My interest in serving on the Santa Fe County Planning Commission is to give back to the community by helping my local government. My experience with land use and development in larger metropolitan areas can bring a fresh perspective to some of the problems brought by growth. I am and have been on other boards and understand the responsibility. I am qualified to be on this planning board if my service can be used, and hope that you will consider my application for this position.

Sincerely,

Richard Reinders

Resident Project Representative (RPR) (Professional Services contract)

- Observe and review with the engineer the contractor's work
- Answer contractor's questions regarding contract documents, details about engineering drawings/design, or interpretation of project specifications
- Provide the project engineer with additional details or information when required for proper execution of the work.
- Publish site reports of my observations.

October 2008 - June 2010 Pojoaque Valley School District (PVSD)

IT Advisor (Professional Services contract)

- Work with District personnel to upgrade the District's technology infrastructure. Included overseeing the installation of a wireless connection between campuses +three miles apart and the deployment of several new servers (Exchange, Web (Apache), Active Directory, Network Appliance)
- Published a new five year District technology plan that was approved by the Board of Education and NM State Department of Education
- Assisted in the installation of an Internet filtering system (LightSpeed) to monitor and/or prevent network access to inappropriate Internet sites.
- Contract was not renewed due to change in Superintendent and new Board members.

Experience October 2002 - June 2006 Computing, Communications, & Networking Division Los Alamos National Laboratory (LANL)

Team Leader, Scalable Systems Integration (Staff member)

- Supervised a small team of 5 highly skilled professionals in developing and deploying system software tools to improve system reliability/sustainability. In this position, given a Department of Energy's Award of Excellence.
- Directed the integration of all hardware and software customization for the deployment of several high performance computers rated among the top 50 super computers in the world. Awarded several internal LANL awards for my effort in this area.
- Established a hardware maintenance program for Linux clusters by organizing training,

procedures, & resources to certify and utilize internal LANL employees as hardware support engineers.

- Experience** November 1995 – September 2002 Center for Nonlinear Studies/Theoretical Division (LANL)
System Administrator & Network Manager (Staff member)
- Provided desk top/end user support to 200 customers comprised of visiting scientists and post doctoral students using Windows (10), MacOS (10), and Linux (80) workstations
 - As a subnet manager, maintained and configured all network equipment including managed network switches and routers.
 - Built, configured, and administered several servers providing network services such as email (sendmail), web server (Apache), NFS.

- Experience** January 1990 - November 1995 International Technology Division (LANL)
System Administrator (Staff member)
- Assembled and maintained small networks of workstations to identify and exploit operating systems vulnerabilities as part of LANL's Information Warfare Center.
 - Installed and maintained a secure online database for evaluating and processing of US export control applications.

- Education** 1980 - University of the State of New York, Albany, NY
- ☐ B.S. – External Degree with a concentration in Civil Engineering
 - ☐ 2 years of undergraduate and graduate level courses in computer science – University of New Mexico

- Skills**
- ☐ Leadership
 - ☐ Project management
 - ☐ Construction inspection
 - ☐ Asset Management Process/Plans

- Awards**
- ☐ Numerous awards during my military service and employment at LANL.
 - ☐ 2002 Santa Fe New Mexican "10 Who Made a Difference" for Volunteer Work @ Pojoaque Schools

- Personal Information**
- ☐ From 1981 to 1984 served on the Los Alamos County Planning and Zoning Commission during which I attended several training seminars on planning and zoning at the request of the County Commission
 - ☐
 - ☐ Served six years as a acequia treasurer
 - ☐ Currently seeking election to the Pojoaque Valley Irrigation Board of Commissioners
 - ☐ Currently serving as vice president of a community advocacy non-profit organization in the Pojoaque Valley
 - ☐ Married to Cristella Trujillo-Neal where we reside in El Rancho
 - ☐ Retired in June 2006 from Los Alamos National Laboratory after 21 years of employment
 - ☐ Retired military officer with 21 years of service in the US Army Corps of Engineers

Addendum
Resident Project Representative Projects
\$4,372,000

Village of Questa - Water System Upgrade (\$388, 000 - Completed 2007)

Installation of 4,500 LF of new 8" PVC pipe, 50 commercial and residential services, a new pressure relief vault, 10 new fire hydrants, and one road bore of 60 LF of 16" casing pipe.

Pojoaque Valley School District - L Wing Demolition and Reconfiguration (\$354,000 - Completed 2008)

Demolition 74,000 SF of existing building, hazardous material abatement of demolished buildings, remodel remaining buildings, build new mechanical room with new boiler, and reconnect all utilities.

City of Bloomfield – North Height Water System Upgrade (\$1,200,000 - Completed 2009)

Installation of about 13,000 LF of 12" PVC, 20 new fire hydrant, four new pressure relief vaults, a road bore of 120 LF of 24" casing pipe, 1,450 LF of new sanitary sewer, and 18 commercial and residential services.

Pojoaque Valley School District – Water and Waste Water Improvements (\$1,800,000 - Completed 2010)

Decommissioned 12 septic facilities, a new sewer collection system including lift station and 2000 LF of sewer force main, replaced existing water distribution system with 3,000 LF of new water lines, a new 295,000 gallon steel water storage tank with pump house and diesel-fired booster pump skid, 8 new fire hydrants, a new chlorination system.

Agua Fria Community Water Association - (\$318,000 – Completed 2013)

Installation of +4,000 LF of new water distribution lines, 10 new fire hydrants, a new pressure relief vault, new booster pump skid, 30 residential service connections, remote monitoring system (SCADA - supervisory control and data acquisition)

Agua Fria Community Water Association - (\$659,000 – Completed 2013)

Drill new well approximately 350 in depth, install approximately 280 feet of filter gravel pack, install pump and pit less adapter, and connect new well to existing piping to pump house.

Vicki, I am interested in the County Planning Commission. I am currently on the Santa Fe County Protest Valuation Board. I am not sure if you can serve on two boards at the same time. I have an extensive background in real estate and real estate management which could be beneficial to this board also. I have attached my resume which will give you an idea of my experience.

I am retired so my resume covers the time I was working.

Thank you

Patrick Murphy

EMPLOYMENT HISTORY

2005-Current	Sam Moon Group Director of Real Estate	Dallas Texas
---------------------	--	--------------

Position was established to set up real estate department for an extremely successful family owned retail company for properties they own, are developing and future projects. Properties include seven shopping centers (900,000 SF) with one under construction, golf course, parking facilities, industrial building and restaurants. Duties include, site selection, due diligence, financing, leasing, management, rent collections, tenant improvements, contractor and vendor selection, supervision of purchasing of equipment and supplies, property inspections, insurance, tax review, reporting as required and dispositions. Developed centralized filing system, prepared CAM, Tax and Insurance reconciliation, produced policy and procedures manual and budgets for all properties. Consolidated insurance policies and increased coverage while lowering premiums over \$73,000.00 per year. Protested property taxes, which produced savings of over \$1,000,000.00 in savings. By reducing the number of vendors, suppliers, and contractors has resulted in additional savings and better service.

1993-2005	GAC AND ASSOCIATES Senior Asset Manager	Tulsa OK. Dallas TX.
------------------	---	----------------------

Real Estate Management and consulting. Portfolio has included the supervision of retail, mixed-use projects, over 3,000 multifamily units and seven office buildings in five states plus industrial properties. Proven track record of increasing occupancy and income, lowering operating expenses and enhancing NOI. Duties have included yearly budget preparation, development of short and long term marketing plans, hiring and training of staff and reporting as required. Long and short-term contract assignments have included Management and leasing seminars, Feasibility studies/due diligence, Market research, Site inspections/evaluations, Budget review, Personnel review and Acquisition/sale analysis. Worked with Individuals, corporations, REITS and pension funds covering all facets of Real Estate Management from on-site to corporate office duties.

1988-1993	MIG REALTY ADVISORS West Palm Beach FL Senior Asset Manager	THE NORTHSTAR GROUP Atlanta GA Executive Vice President
------------------	--	--

MIG - Responsible for both equity properties including over 2,000,000 SF retail, office and (9,631 multi-family units plus self-storage, industrial, flex space and distribution facilities) and debt properties (3,000,000 SF of retail and office) located in 26 states, including the preservation and increase of value from a pro-active managerial role. Define and analyze asset problems while establishing meaningful long-term strategic plans. Oversaw the daily direction of the asset/property managers, including, site review, due diligence, feasibility reports, market survey, tax reviews, marketing, financing, construction/rehab and disposition. Provided specific guidance to the asset managers relative to the selection, engagement and performance evaluation of property managers. Maintained direct supervision of selected "problem" properties. Determined long and short-term property goals as a result of overall portfolio decisions including refinancing and sales. Review completed property appraisals for reasonableness and conclusions provided.

Qualified MIG through my experience and course studies with the Institute of Real Estate Management (IREM) for the prestigious designation of Accredited Management Organization (AMO).

NORTHSTAR- Formulated plan, developed documents and negotiated agreement which established joint venture between MIG and G.F.S. International Management, creating the 10th largest Property Management company as reported by the National Real Estate Investor Magazine, July, 1991. Established long term plan of growth for marketing and staffing. Prepared budget. Instrumental in development of long and short-range business plan.

1985-1988

RESOURCES PROPERTY MANAGEMENT CORP., New York NY
Vice President Southwest Regional Office Houston Texas

Established the Southwest Regional Office, Houston, Texas, with direct supervision of all company owned properties West of the Mississippi River. Portfolio consisted of four shopping centers (780,826sf), 10,863 residential units (market rate and section 8) in 11 states and nine office buildings (2,221,451sf). Increased occupancy levels and lowered expenses through aggressive marketing and strict budget controls.

1981-1985

ROBERT A. MCNEIL CORPORATION, San Mateo CA
Regional Vice President Property Management, Phoenix AZ

Responsible for western Texas, New Mexico, Nevada and Arizona. Properties totaled 3,641 apartment units, three shopping centers (247,005sf) and one office building (115,362sf)

November 29, 2017

Santa Fe County Growth Management Department
Attn: Vicki Lucero
P.O. Box 276
Santa Fe, New Mexico 87504-0276

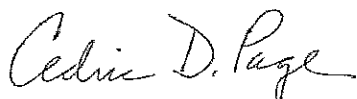

Good afternoon:

I am pleased to submit this formal application for service on the Santa Fe County Planning Commission. I am interested in serving on the Commission so that I can apply my experience and expertise in reviewing County staff recommendations and project application presentations, and testimony from the public, and making land development related decisions and recommendations to the Board of County Commissioners.

In addition to my extensive academic and administrative experience, I believe my service on numerous community boards and organizations has given me a deep understanding of community and economic development processes, goals and outcomes. My continued service on the board of directors for the Regional Development Corporation serving northern New Mexico with a variety of economic development initiatives has given me a unique perspective on a range of economic and community development strategies and programs. In contrast, my service on urban community development and human services organizations have afforded me an understanding of the challenges and opportunities facing our communities in Santa Fe County.

I look forward to your review of this application and to serving on the Santa Fe Planning Commission

Regards,

A handwritten signature in cursive script that reads "Cedric D. Page".

EDUCATION

- Harvard University, Certificate, Management Development Program
- Rutgers University, Ph.D., Urban and Social Geography
- Rutgers University, M.A., Quantitative and Urban Geography
- Syracuse University, B.A., Cartography and Physical Geography

ADMINISTRATIVE EXPERIENCE

SUN PATH Site Coordinator

University of New Mexico-Los Alamos

October 2014 – July 2016

Los Alamos, New Mexico

- Manages the day-to day administration of the DOL TAACCCT project by ensuring that the college meets all grant obligations in a timely manner, assuring the timely preparation and submission of required reports to the TAACCCT statewide office at SFCC, and conducting administrative operations in compliance with the grant.
- Assists in the collection of SUN PATH student data required by the Department of Labor.
- Serves as the primary liaison between the SUN PATH consortium college and the SUN PATH Consortium Director and Staff at Santa Fe Community College.
- Expands awareness of the SUN PATH training program to the community of potential students and employers by promoting the program through various outreach efforts.
- Collaborates with College Deans of Health/Sciences and department heads to identify courses, certificates, and entry level certificates in Allied Health, EMS, and/or HIT to develop and implement that enhance and expand programs of study including online and entry level certificates.
- Implements and coordinates I-BEST services for adult education students.
- Oversees orientation and registration of SUN PATH students.
- Identifies existing competency based assessments that can be integrated into programs of study.
- Partners with on-site Job Development Career Coaches and regional Workforce Investment Boards to coordinate regional SUN PATH Councils on a quarterly basis.

Executive Director

University of New Mexico-Los Alamos

July 2007 - June 2014

Los Alamos, New Mexico

- Provided leadership and direction in all aspects of administering a university branch campus or satellite location.
- Established and implemented short- and long-range organizational goals, objectives, strategic plans, policies, and operating procedures; monitors and evaluates programmatic and operational effectiveness, and effects changes required for improvement.

- Directed and supervised associate directors and senior managers on implementing branch campus or satellite mission statements regarding instructional programs, community outreach programs, curriculum planning and development; oversees administration of branch campus policies and procedures, facilities, programs, and student services.
- Represented the university and the branch to various internal institutional divisions as well as externally to the media, governmental agencies, state legislators/legislature, community/civic groups, prospective students and their parents, university alumni, prospective funding agencies including the New Mexico Higher Education Department, and the public.
- Created and developed avenues of communication for all branch staff, faculty, and students; serves as liaison between the branch campus or satellite location and the main campus.
- Developed and managed annual budgets for the organization and performs periodic cost and productivity analyses.
- Planned, developed, and implemented strategies for generating resources and/or revenues for the organization.
- Recommended and participated in the development of University policies and procedures; served on University planning and policy-making committees.

Dean of Instruction

January 2007- December 2007

University of New Mexico-Los Alamos

Los Alamos, New Mexico

- Served as the Institute's chief academic officer in all areas related to the faculty, the curriculum, and academic support services.
- Provided oversight and management of division heads, curriculum coordinators, core and adjunct faculty; adult basic education and English as a second language programs and staff; library operations and staff; and community education and customized training programs and staff.
- Administered academic personnel procedures involving recruitment, appointment, retention, and promotion.
- Provided for the educational well being and success of students and patrons.

Dean of Faculty/Sr. Vice-President for Academic Affairs

January 2000 - January 2007

DigiPen Institute of Technology

Redmond, Washington

- Served as the Institute's chief academic officer in all areas related to the faculty, the curriculum, and academic support services.
- Provided leadership and direction for the Institute's authorization and accreditation efforts.
- Provided oversight and manage 31 full time faculty and 18-part time faculty and a budget over \$3M.
- Administered academic personnel procedures involving recruitment, appointment, retention, and promotion.
- Coordinated the administration, supervision, development, and assessment of all degree programs and general education courses.
- Provided for the educational well being of students as a student-centered visionary and pragmatic leader.

Executive Director

September 1998 - December 1999

Center for Social Responsibility and Community

Oneonta, New York

SUNY College at Oneonta

- Managed the projects, programs, and services of the Center for Social Responsibility and Community.
- Coordinated the Community Advisory Council, National Advisory Committee, Student Philanthropy Board, Faculty Fellowships, and faculty development in service learning.
- Managed the SUNY Oneonta AmeriCorps Rural School Empowerment Program.
- Provided leadership and financial support for service-learning research, project development, and diffusion of this knowledge to faculty.
- Provided leadership to the development of the American Humanities undergraduate certification program in nonprofit management.

Associate Director

December 1989 - September 1998

Washington Higher Education Coordinating Board

Olympia, Washington

- Developed and implemented strategies to increase the number and percentage of people of color and students with disabilities in Washington's public higher education system.
- Managed the review and authorization of degree-granting institutions operating in Washington that: offer degree programs or credit-bearing courses at or from a physical location in the state; recruit or advertise to state residents; or maintain any type of physical presence in the state. Review included areas, including the institution's financial stability, business practices, academic programs, and faculty qualifications.
- Supervised staff in the evaluation and approval of programs at colleges and universities, flight schools, apprenticeship sites and on-the-job training sites for the use of veterans' education and training benefits.
- Provided written reports and briefings to HEC Board, legislative committees and other agencies; managed program budgets.
- Represented the HECB with local, regional and national higher education organizations.
- Supervised staff and supported staff development opportunities for superior workplace performance and professional growth.

Executive Director

February 1986 - November 1989

Community Technical Skills Center

Denver, Colorado

- Overall program administration and staff supervision.
- Fundraising and resource development (through individual, corporate, private and public foundation sources.
- Fiscal management; board and community relations.
- Program coordination and evaluation for this nonprofit IBM-affiliated office and computer skills training organization (graduated over 100 students annually; maintained over 90% graduation rate, a 75% job placement rate, and a 90% employment retention rate).

Director, Northeast Denver Neighborhood Development Center

University of Colorado at Denver

January 1984 - February 1986
Denver, Colorado

- Neighborhood planning; university services coordination; resident participation.

Assistant Director, Population Dynamics Program

University of Colorado at Denver

September 1975 - June 1977
Denver, Colorado

- Program coordination; student advising; community relations.

TEACHING EXPERIENCE

Professor Emeritus (Geography)

University of New Mexico-Los Alamos

January 2017 - Present

Los Alamos, New Mexico

Professor (Tenured) Geography

University of New Mexico-Los Alamos

January 2007-January 2017

Los Alamos, New Mexico

Courses: World Regional Geography; Urban Geography; and Human Geography

Associate Professor (Tenured) Geography

State University of New York College at Oneonta

September 1998 - December 1999

Oneonta, New York

Assistant Professor, Urban Studies and Geography September 1975 - December 1986

University of Colorado at Denver

Denver, Colorado

Assistant Professor, Department of Geography

U.S. Air Force Academy

July 1969 - June 1973

Colorado Springs, Colorado

I have also taught geography courses as a part-time faculty member at Front Range Community College and Metropolitan State College in Denver, and at Pierce College and The Evergreen State College in Tacoma Washington.

Santa Fe County Growth Management Department

Attn: Vicki Lucero

P.O. Box 276

Santa Fe, New Mexico 87504-0276

Ms. Vicki Lucero:

I am pleased to apply for an appointment to the Santa Fe County Land Use Planning Commission.

I hold a master's degree in urban planning from California State Polytechnic University, Pomona and a bachelor's degree in literature from the University of California, Santa Cruz. In the mid-1970's, I began a career as a county land use planner, with additional experience as an environmental planner and State of California project manager and policy analyst. My resume details my employment history and accomplishments.

I moved to Santa Fe in January 2017; in August I bought a home in Eldorado. It has been interesting to read about land use planning issues in the local press. I've explored the rural areas surrounding the city of Santa Fe in my search to purchase a home. I've reviewed some of the Planning Commission minutes to get the flavor of current County land use Planning Commission issues. As a Commissioner, I would be a strong advocate for the public interest and the best future development of the county.

Best regards,

Gail

EXPERIENCE

Land Use Planning and Regulation (seven years experience)

- Processed permits, subdivisions and associated environmental reviews both as regular and contract staff; served as city planning commissioner.
- Reviewed site and architectural plans of proposed development projects for conformance to applicable general and specific plans, and zoning and other ordinances.
- Facilitated public participation, including presentations to boards, commissions, and technical and citizen advisory groups.
- Authored major planning documents including:
 - Sonoma County Local Coastal Plan (LCP) (contributor)
 - Franz Valley Specific Plan (manager and principal author)
 - Malibu LCP Water Quality Policies (author)
 - Diked Historic Baylands Study (contributor)
 - National Estuarine Sanctuary Proposal (author)

Environmental Planning (six years experience)

- Reviewed projects and prepared initial studies and mitigated negative declarations.
- Researched and authored CEQA-required chapters on land use, planning, housing, fiscal, and agricultural impacts and mitigation measures for variety of proposed projects.
- Edited technical analysts' reports detailing air and water quality, noise, traffic engineering, geotechnical, biological, archaeological impacts and mitigation measures.
- Prepared existing conditions sections for Sonoma County General Plan Update EIR.
- Participated in many EIR projects including WalMart (Salinas), Mission Bay (San Francisco), Bank of America (Concord), Hotel II (Oakland), shoreline redevelopment plans in Berkeley and San Mateo, wastewater project (Salinas) and numerous other residential, office, and commercial projects.
- Developed EIR marketing proposals, determined project scope/requirements and helped assemble project team.
- Organized and managed critique of Beaconsfield Canyon (Oakland) housing project EIR, identifying major gaps in draft EIR which resulted

in two supplemental EIRs being prepared. Hired and supervised environmental attorney. Assisted Oakland open space and park advocacy group pass \$60 million bond act. These efforts resulted in development of the land as a public park.

Coastal Zone and Land Trust Management (eight years experience)

- Extensive coastal project planning and management experience, facilitating development of urban waterfront renewal, public access and other public facilities.
- Developed projects in each of California's fifteen coastal counties over a six year period.
 - Assisted local grant applicants with project feasibility analysis, scope, designs, and budgets.
 - Prepared and presented staff recommendations to Coastal Conservancy Board.
 - Helped prepare and manage contracts for funded projects, insuring final project completion according to approved plans and conditions.
 - Projects developed included piers, retail space, restaurants, plazas, esplanades, stairways, bicycle and pedestrian trails, parks, parking, and land acquisition for public use.
 - Managed Conservancy's public access offers-to-dedicate program.
 - Served as policy analyst in Water Quality program at Coastal Commission.
 - Volunteered at Marin Agricultural Land Trust.
 - Staffed Contra Costa County Agricultural land Trust.
 - Assisted Oakland open space and park advocacy group pass \$60 million bond act.

Dear Ms. Lucero:

The letter in email form is to express my interest in being considered for an appointment to the Santa Fe County Planning Commission. I am a resident of Santa Fe County and apparently could be eligible for a County appointment.

I have been resident of Santa Fe County for over 25 years and in the past, have been active in a number of community activities. Recently I served as a citizen advisor for the Santa Fe MPO relating to the preparation of the MPO Master Plan for Pedestrians. I was also chair of the Santa Fe Transit Board for eight years.

Professionally, I was the City of Santa Fe Director of Traffic/Transportation Engineering for about 10 years and in that capacity attended Santa Fe Planning Commission meetings providing testimony, attending numerous public hearings and neighborhood meetings over the years as City Traffic Engineer. This position entailed the preparation of staff reports, review of projects in addition to work on the Santa Fe Master Plan and changes to city code relating to planning requirements. Overall, I am quite familiar with the process that relates to a planning commission making recommendations to a governing body such as the Board of County Commissioners as that type of effort was part of my job responsibilities at the City.

Currently I am Principal Transportation Engineer for CH2M and work primarily in transportation engineering and planning. For CH2M I have worked around the US for a wide variety of clients primarily in government at all levels. In addition, I have been active on various National Academy of Engineering and National Academy of Science Committees for over 25 years.

My education includes completion of graduate course work and research at Northwestern University, Evanston, Illinois where I majored in Transportation Engineering/Planning with a minor in Urban Planning. Later I taught and conducted research at Northwestern for five years. I am a licensed Professional Engineer in New Mexico and Illinois. Please see my Resume which is attached for more details.

I would be very excited to serve on the Planning Commission and will be able to attend monthly meetings.

Please don't hesitate to contact me if you have any questions or need additional information.

Sincerely,

John Nitzel
9 Crows View Place
Santa Fe, NM 87508
Email: john.nitzel71@outlook.com
Phone: 505.471.0175

John Nitzel, PE

Principal Transportation Engineer – Safety and Traffic

Education

Graduate Studies, Transportation Engineering and Planning, Northwestern University

Graduate studies, Structural Engineering, University of Nebraska

B.S., Civil Engineering, University of Nebraska

Professional Registrations

Professional Engineer: New Mexico (1989, No. 10957), and Illinois (1979, No. 062-040257)

Distinguishing Qualifications

- Experienced in the practical and theoretical applications related to traffic operations and highway safety.
- Broad background in the geometric design of highway facilities especially arterial street systems and access management practices for public and private sector applications.
- Expert in highway safety analysis—from the development of strategies for specific projects to system and state-wide, national, strategies and programs.
- More than 35 years of experience, including the preparation of studies, conceptual designs, and detailed designs for large and small projects (up to \$300 million).
- Has worked on Central Federal Lands Highway Division (CFLHD), Indefinite Delivery Indefinite Quantity (IDIQ) Programs for 12 years, delivering over 35 CFLHD task orders and 25 studies of national parks and other facilities.
- Serve as lead Safety Planner and Engineer for the West Region of CH2M.

Relevant Experience

Mr. Nitzel is a Principal Transportation Engineer with CH2M's Albuquerque office. He has been extensively involved in public involvement efforts, developed conceptual and design plans for street, trail, and freeway facilities in both the private and public-sector roles, serving as a project manager and technical lead. Mr. Nitzel's technical expertise lies in planning, conceptual and final highway design, traffic engineering, operations analysis, access management, and highway safety performance analysis. He is a recognized leader in regard to resolving difficult transportation issues in a public forum coupled with his ability to complete studies and projects accurately, efficiently, while meeting client needs.

Currently a member of two Transportation Research Board (TRB) Committees including: Highway Safety Performance Committee (18 years) (founding member) and Intersections Task Force. He previously was a committee member of the TRB committees on Operational Effects of Geometrics (12 years), and Geometric Design (9 years). He has past and present involvement in various research efforts associated with the National Academy of Engineering, Federal Highway Administration, National Highway Institute, Institute of Transportation Engineers, and US Department of Transportation.

John Nitzel is a national expert in traffic safety. For example, John has extensive experience as a safety planner and engineer for at the federal level. For federal lands traffic safety projects, this includes leading 15 contracts and more than 20 other work requests to perform safety analyses with Federal Highway Administration (FHWA) Federal Lands Highway (FLH), National Park Service (NPS), and the U.S. Forest Service (USFS). He has been working on the Central Federal Lands Highway Division (CFLHD) Indefinite Delivery Indefinite Quantity (IDIQ) Program for 12 years, delivering 35 CFLHD task orders. John is a Member of the Transportation Research Board, National Academy of Sciences, Task Force on Intersections; and Transportation Research Board, National Academy of Sciences, Committee on the Development of a National Highway Safety Manual.

"As a planner and engineer, I consider it an honor to be a part of improving the safety of the transportation infrastructure in our parks and federal lands system. The staff we work with in the FLH program is exceptionally qualified, professional, and clearly dedicated in their mission. Our teams have worked diligently to integrate and recommend safety initiatives that will reduce injuries and save lives of both the traveling public and the park employees."

—John Nitzel, PE, Traffic Safety Discipline Lead

Representative Projects and Dates of Involvement

Principal Safety Engineer and Project Manager, New Mexico Department of Transportation (NMDOT), Highway Safety Improvement Program, New Mexico Strategic Highway Safety Plan, 2009 to present. Supported the NMDOT in the development and guidance with respect to department safety initiatives and program development. Was the lead for the preparation of the New Mexico Strategic Highway Safety Plan (SHSP) which included a detailed crash analysis of all roadways in NM, development of causative factors and strategies to mitigate crashes which included an extensive stakeholder of safety agencies and interest groups across the state. The SHSP included all of this information and process to move forward with programs to reduce fatalities and serious injuries in New Mexico. Also supported NMDOT in the planning and development of annual NMDOT Highway Safety Improvement Plans (HSIP) for 2015-2017. This has included support in development of data analysis and query techniques, performance measure refinement and assessment, evaluation of projects, prioritization of projects and support in implementation analysis.

Project Manager or Senior Technical Lead for Various Strategic Highway Safety Plans for Nebraska, South Dakota, Arizona (CH2M HILL Team PM) and New Mexico. 2006 to 2017. The development of these multiyear Strategic Highway Safety Plan (SHSP) for State DOTs has entailed analysis of severe crashes for the state over a five-year period, development of strategies to mitigate crashes, assessment of the effectiveness of these strategies, and an SHSP (plan) for implementation. As part of these projects, an extensive stakeholder interaction was included to solicit input as to safety concerns and needs.

Principal Safety and Traffic Engineer; National Park System Technical Assistance; US Department of Interior; 2007 to 2016. Served as the technical lead responsible for providing safety and traffic engineering technical assistance on a variety of issues for the NPS. Recent efforts include assistance in the development of a system-wide safety program which is being proposed to Congress by the NPS/Department of Interior for the 2009 SAFETY_LU Reauthorization Program. Also, an estimation of the National Park System fatality rate, evaluation of the crash data base, and defining a system-wide traffic monitoring system for all NPS management systems under development.

Senior Traffic Engineer and Principal Investigator; NCHRP Project 17-18(3); Transportation Research Board of the National Academies; Washington, DC; 2005 to 2017. Responsible for the development of project guides used to implement the AASHTO Strategic Highway Safety Plan. The AASHTO effort consists of a national highway plan to substantially reduce traffic accidents, particularly for fatalities and injuries. CH2M HILL was selected to serve as the primary contractor and investigator for the major effort to address safety for 22 areas of emphasis and need. For the freeway guide and others, the project involved extensive research which identified the best practices available in the United States, and elsewhere, and incorporated them into well-defined strategies. The documents were written for all members of the highway safety community including engineers, planners, law enforcement officials, educators, judges, and other highway safety specialists in an effort to successfully coordinate safety efforts.

Senior Reviewer, Moody Porter Intersection Evaluation, TriMet, Portland, OR: 2015. Conducted senior review of pedestrian, bicycle, transit, and vehicular circulation at a transit station. The focus was to study the site in the field, but also including a brief overview of project concept plans particularly as they pertain to pedestrian, bicycle, and motor vehicle safety and operations. Also considered was the context of the adjacent street network, adjacent development and land uses, and the imminent plan to fully open this intersection to extensive transit activity – light rail, street car and bus use -- all of which will use the new Tillikum Crossing Bridge to the west which is intended to exclusively serve non-motor vehicle users including pedestrians, bicycles and transit modes. Recommendations were made for primarily three modal areas – pedestrians, bicycles and motor vehicles to enhance safety, operations, provide clearer direction to users, and, in particular, to address the large numbers of pedestrians and bicycles – considering their interactions with Light Rail, Street Car, and bus operations.

Lead Safety Engineer; Red Rock Canyon Project Scoping and Project Delivery; Federal Highway Administration (FHWA)-Central Federal Lands (CFLHD); Las Vegas, NV; 2014. Performed a Road Safety Scan to address the BLM's concerns with interactions between pedestrians, bicyclists, and vehicles. CH2M developed the final design for the rehabilitation of the 13-mile scenic Loop Drive, a 3-mile return route on new alignment to reduce travel time, and safety improvements to 12 parking lots. A primary driver of the project is the high level of visitation and the mixed use of vehicles, bicycles, and pedestrians. Safety and environmental preservation areas were high priorities identified during project scoping. After project scoping, CH2M facilitated decision making with the BLM and CFLHD to determine the first construction package, which had an accelerated schedule to meet funding deadlines. This package replaced two major

low water crossings with bridges and installed flood warning systems at the remaining three low water crossings to improve safety and reduce maintenance.

Quality Manager, New Mexico Department of Transportation (NMDOT) Transparency Reports, New Mexico DOT 2012-2013. These federally-required projects identify the most prominent crash sites for various roadway types, jurisdictions, and locales (urban/rural) in New Mexico. The report contains at least 5 percent of roadways. Based on crash patterns, general countermeasures are also identified. CH2M produced the FY 2012 Transparency Report for the NMDOT, as required by the FHWA with the authorization of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA LU). The intent of the report is to describe at least 5 percent of the highway locations exhibiting the most severe safety needs for the public roads in each state. CH2M HILL also produced the FY 2011 and FY 2010 Transparency Reports.

Quality Manager, Evaluation of the Comprehensive Transportation Safety Plan (CTSP), New Mexico Department of Transportation, 2007 to 2009. CH2M HILL reviewed and evaluated the current CTSP at the time. Specifically, we completed a comprehensive literature search and state-of-the-practice survey to identify and assess best practices. We developed the criteria and format to review and identify emphasis areas and strategies from the current and past CTSP's that have proven effective. We conducted research to determine if the recent decline in traffic fatalities and serious injuries has been the result of implementing the CTSP; validating or invalidating whether the performance measures of the current CTSP align with the emphasis areas and appropriate strategies; developing strategies to effectively manage the current CTSP and future versions; and developing a tracking system that can be used to measure progress and effectiveness with current and future CTSP emphasis areas and appropriate strategies.

Quality Manager, Traffic Calming Manual, City of Albuquerque, NM: 2012 to 2015. CH2M HILL developed a Traffic Calming Manual for the City of Albuquerque. The intent of this City-wide policy is to better manage neighborhood traffic, address citizen concerns, and outline a process on how traffic calming projects are identified, prioritized, and implemented. The CH2M HILL team completed a comprehensive literature search and state-of-the-practice survey to identify and assess traffic calming best practices. Based on these practices, we worked with the City to build a "traffic calming toolbox" that can be utilized when the City determines that implementation of a measure is warranted. We also developed criteria and the format that will be used to review and identify requests for traffic calming implementation.

Project Manager; US 380 Corridor Study; Lincoln NM Historic District; New Mexico Department of Transportation; Lincoln, New Mexico; 2007. The project consisted of a ten-mile segment of US 380 located in the National Historic District. It served as the model for the NMDOT project with respect to the development of alternative mitigation measures meeting transportation needs that are sensitive and compatible with the local culture and environment. CH2M HILL is using a Context Sensitive Solutions (CSS process) to work with local and agency stakeholders that include the Bureau of Land Management, National Park Service and the NM State Historic Preservation Office.

Senior Traffic Engineer; National Park System Comprehensive Traffic Safety Study; Central Federal Lands Highway Division, FHWA; 2005 to 2010. Served as senior technical lead responsible for the completion of a system-wide study of traffic safety for the entire National Park System (NPS). The effort, the first of its kind, consisted of an overall review of traffic crash patterns and characteristics for all types of crashes occurring in national parks. The final report identified recommendations for addressing traffic safety issues and reviews the crash experience for over 222 national parks during a 16-year period. The study considers not only motor vehicle safety issues but those related to pedestrians and bicyclists. The effort involved extensive interactions with stake holders such as NPS administrative staff in Washington DC, and FHWA Headquarters. The National Park System represents 49 states including the District of Columbia. In 2002, the parks had 421 million visitors and experienced over 110,000 accidents in a 16-year time span.

Instructor; Context Sensitive Solutions Training Course; National Highway Institute; Federal Highway Administration; 2006 to 2009. Served as Instructor nationally for a three-day training course sponsored by NHI for FHWA, and Federal Lands Highway Division. The objective of the course was to present the CSS framework and principles to state and local agency employees, including lessons and group case study exercises.

Experience Prior to CH2M HILL

Principal Traffic Engineer; Traffic Bureau Chief and Engineer of Traffic Design; New Mexico Department of Transportation; New Mexico; 1989 to 1998. Responsible for the development of engineering policies related to design, traffic, and safety. Had a number of policy level responsibilities for the department as state traffic engineer. This included leading the development of the first state Access Management program and development of the first two

editions of the guide, development of the outline for the department design manual, served as chair of the Department Access Control Committee, was the Department representative on the NM State Tourism Board, and helped lead the effort for the establishment of routes for vehicles that transport low level radioactive waste to the WIPP storage facility in Carlsbad, New Mexico. The effort included analysis of routes utilizing methodologies developed by the DOE, consideration of emergency response issues, the preparation of a report which evaluated the recommended routes in the State of New Mexico, and review of public hearing comments and their disposition related to the route establishment. Other accomplishments included the development of a statewide consultant traffic signal program, new state access management procedures, and participation in the development of a new state subdivision act, and technical assistance with the legislature in developing a state "dark skies act".

Principal Transportation and Traffic Engineer; City of Santa Fe; New Mexico; 1998 to 2005. Managed 25 or more design projects (\$3.75 million) relating to intersection, roundabout, and signal improvements, new historic downtown street lighting in addition to transportation development review and plan approval of on-site and off-site designs, and development of transportation engineering improvement projects and impact fee expenditures. Responsibilities included direction and management of transportation engineering functions relating to traffic operational issues and design, and safety for vehicle, pedestrian and bicycle modes. Reviewed and approved new traffic control devices.

As principal traffic engineer, developed and implemented a multi-year traffic signal program for the City of Santa Fe. These programs involved the installation of over 25 traffic signals and interconnect system improvements. Implemented various innovative techniques such as the first fully operational fiber-optic communication video system in the State of New Mexico. The system included pedestrian count down heads, advance walk signal indications, and improved bidding and specification processes.

City Traffic Engineer and Traffic Lead; Cerrillos Road Reconstruction Project; City of Santa Fe; New Mexico; 1997 to 2003. Responsible for the overall review and approval of the design and geometrics from conceptual design to final plans a \$9.5 million reconstruction project. Cerrillos Road is one of the principal arterials in Santa Fe and carries up to 75,000 vehicles per day and has significant retail and government facilities on either side. Participated in the public involvement process regarding to design coordination with affected businesses, which entailed 15 public meetings to resolve access issues and identified safety concerns. The project ultimately included innovative access management designs which were acceptable to stake holders, new bicycle lanes, ITS improvements related to the signal system, and significant design accommodations for transit, and enhanced pedestrian improvements.

Division Director; Implementation of City Traffic Calming and Safety Program; City of Santa Fe; New Mexico; 2001 to 2005. Managed and implemented the first traffic calming program and safety program for the city of Santa Fe. As lead staff person and manager, supervised and developed public process and design procedures for the traffic calming program which included over 45 projects at a cost of approximately 4 million. The extensive public process serves as a model for the City in terms of neighborhood involvement and project execution with more than 28 projects approved by neighborhoods as a result of over 100 meetings, and 22 or more constructed projects. The scope of these projects is to identify efforts that could be implemented in an expeditious manner at a relatively low cost.

Lead Traffic Design Engineer; Big "I" Concept Design Project; New Mexico Highway and Transportation Department; Albuquerque, New Mexico; 1995 to 1998. The project consists of the development of the concept design for the interchange of I-25 and I-40 in Albuquerque. The Big "I" is a major system interchange which by itself carries almost 10 % of the entire interstate traffic in Albuquerque. Previous studies had recommended designs which fell short of what state transportation planners and engineers felt would meet the needs of the traveling public. The \$250 million concept design included the elimination of all left hand off ramps though the addition of more desirable right hand off ramps, and the addition of frontage roads for all approaches to serve local traffic and provide for incident management options. Design challenges included a concept design which largely avoided existing ramps and major bridge structures, thereby greatly enhancing traffic control. Construction was accomplished within two years. The concept design developed required virtually no right-of-way acquisition. The constructability of the concept was in large part possible due to the development of an efficient traffic control plan, and careful design. A detailed traffic analysis which thoroughly evaluated geometric and traffic needs which permitted the project to be a design-build effort which saved funds and time.

Professional Organizations/Affiliations

National Academy of Engineering, TRB, Member of the Highway Safety Performance Committee, 2000 to Present, chair of the Best Paper Award subcommittee, Planning and Meetings subcommittee. Currently chapter reviewer and chapter lead for 6 chapters of the 2nd edition of the AAHSTO Highway Safety Manual which is under development

National Academy of Engineering, Member NCHRP Panel to Develop First Seven Chapters of the Highway Safety Manual, 2003 to 2007

National Academy of Engineering, Highway Safety Manual Task Force, was reviewer and chapter lead for various chapters of the first AASHTO Highway Safety Manual, 2007 to 2010.

Transportation Research Board, National Academy of Sciences, Task Force on Intersections, 2005 to Present

Transportation Research Board, National Academy of Sciences, Committee on the Development of a National Highway Safety Manual, Member Task Force, Chair of Draft Chapter Sub-committee and chair of subcommittee on Planning, 2000 to 2010

Transportation Research Board, National Academy of Sciences, Committee on Geometric Design, 1994 to 2006

Transportation Research Board, National Academy of Sciences, Committee on Operational Effects of Geometrics, 1992 to 2007

Transportation Research Board, National Academy of Sciences, Committee on Access Management, Friend, 1994 to 1999

Third International Symposium on Geometric Design, paper reviewer, 2005

Second and Third National Conferences on Access Management, 1995 (Presenter) and 1999 (Paper Reviewer)

Institute of Transportation Engineers, Fellow

State Bicycle, Pedestrian and Equestrian Advisory Committee, 1997 to 1998

Tourist Association of New Mexico (TANM), Board of Directors, 1994 to 1998

National Committee on Uniform Traffic Control Devices (MUTCD), 1993 to 1998

AASHTO Subcommittee on Traffic Engineering, 1990 to 1998

Institute of Transportation Engineers, New Mexico Section President, 1995 to 1996
