#	Name	City	State	Country	Comment
619	Brad Moore	Perrin	TX	United States	You would allow destruction of one of the most important historical, cultural, and scenic landmarks in New Mexico? And, in addition, the County has agreed to sell scarce, potable water for mining operations and for dust control. Please stop the destruction of this treasure. Allow the water to be used by your citizens - especially during this period of one of the greatest droughts spreading east from California. BM

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I propose to strip mine La Bajada Mesa and use the

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

which proposes to strip mine La Bajada Mesa and use the

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, and none with more historical significance. As the County's own, newly adopted Sustainable County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the county's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. **I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.**

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to S La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to ~~Deny~~ La Bajada Mesa From Strip Mining

Dear Santa Fe County Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Re La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the County's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means **meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations.**"

Santa Fe County is not lacking in gravel and, **in the midst of record-setting drought**, it is **unconscionable** that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. **I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.**

county's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance. As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, our resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit of residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.

Petition to Save La Bajada Mesa From Strip Mining

Dear Santa Fe County Development Review Committee members and Board of County Commissioners,

I urge you to vote to deny the Buena Vista Estates & Rockology Limited LLC application, which proposes to strip mine La Bajada Mesa and use the county's own potable water to accomplish that shameful feat.

There is no more important geographical landmark of our state, and none with more historical significance: As the County's own, newly adopted Sustainable Growth Management Plan recognizes, "Sustainability for Santa Fe County means meeting the needs of the present while preserving our land, our history, or resources and our communities for future generations."

Santa Fe County is not lacking in gravel and, in the midst of record-setting drought, it is unconscionable that the County would consider allowing our precious desert water to be used to lay waste to this historic landmark. Our history, open spaces, viewsheds and water resources need to be protected for the benefit residents and visitors alike. I urge you to uphold your commitment to do what is best for Santa Fe County by denying this ill-conceived application.
