VALUATION METHODOLOGY

How was the valuation determined?

CLAIM INSPECTION

SEDGWICK has provided CCC with the zip code where the loss unit is garaged, loss unit VIN, mileage/hours, options and additional equipment, as well as loss unit condition, which is used to assist in determining the value of the loss unit.

DATABASE REVIEW

CCC maintains an extensive database of units that currently are or recently were available for sale in the U.S. This database includes units advertised for sale by dealerships or private parties. All of these sources are updated regularly.

SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable units are selected. On current year units, new units for sale at the time of the valuation may have been used. The zip code where the loss unit is garaged determines the starting point for the search. Comparable units are similar to the loss unit based on relevant factors. If a sufficient number of comparable units cannot be located, CCC may also obtain dealer quotations for a unit with attributes as reported by the insurer.

CALCULATE VALUATION

Adjustments to the price of the selected comparable units are made to reflect differences in attributes, including mileage/hours, options, additional equipment, refurbishments, after factory equipment, and condition. Dollar adjustments are based upon market research. Finally, the Base Value is the straight average of the adjusted values of the comparable units. Due to the unique nature of the loss units valued in the Commercial and Recreational Vehicle division, a valuation specialist handles each request individually.

VALUATION METHODOLOGY

How was the valuation determined?

CLAIM INSPECTION

SEDGWICK has provided CCC with the zip code where the loss unit is garaged, loss unit VIN, mileage/hours, options and additional equipment, as well as loss unit condition, which is used to assist in determining the value of the loss unit.

DATABASE REVIEW

CCC maintains an extensive database of units that currently are or recently were available for sale in the U.S. This database includes units advertised for sale by dealerships or private parties. All of these sources are updated regularly.

SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable units are selected. On current year units, new units for sale at the time of the valuation may have been used. The zip code where the loss unit is garaged determines the starting point for the search. Comparable units are similar to the loss unit based on relevant factors. If a sufficient number of comparable units cannot be located, CCC may also obtain dealer quotations for a unit with attributes as reported by the insurer.

CALCULATE VALUATION

Adjustments to the price of the selected comparable units are made to reflect differences in attributes, including mileage/hours, options, additional equipment, refurbishments, after factory equipment, and condition. Dollar adjustments are based upon market research. Finally, the Base Value is the straight average of the adjusted values of the comparable units. Due to the unique nature of the loss units valued in the Commercial and Recreational Vehicle division, a valuation specialist handles each request individually.

Vehicles sold in the United States are required to have a manufacturer assigned Vehicle Identification Number(VIN). This number provides certain specifications of the vehicles .

Please review the information in the Loss Unit Information Section to confirm the reported mileage and condition, and to verify that the information accurately reflects the options, additional equipment, refurbishments or other aspects of the loss unit that may impact the value.

SEDGWICK uses condition inspection guidelines to determine the condition of the loss unit prior to the loss. The guidelines describe physical characteristics for the loss unit, for the condition selected based upon age. Hi John:

Here is my email response.

I received a response from the county advising that they do not wish to retain salvage on either vehicle.
The excavator does not have a title
I am paying the ACV and will contact the salvage company to see if they are still interested.

ACV CAT Excavator = \$36,825.67
ACV Seal Master tank \$14,493.33 minus **\$10,000.00 deductible** = \$4,493.33

Hi John:

Here is my email response.

I received a response from the county advising that they do not wish to retain salvage on either vehicle.
The excavator does not have a title
I am paying the ACV and will contact the salvage company to see if they are still interested.

ACV CAT Excavator = \$36,825.67

ACV Seal Master tank \$14,493.33 minus **\$10,000.00 deductible** = \$4,493.33
