19 Contemporary Community Planning Area, except those specifically documented by this
20 Ordinance.

21
22 5.2 Location of Planning Area and Boundaries

33 5.3.1 The standards and regulations set forth for this Planning Area are intended to implement
34 the purposes, intent, planned land use goals and strategies of the San Pedro Community
35 Plan, Resolution 2001-51, adopted and approved by the Board of County Commissioners

3 dwelling unit (160 acres). With proof of 100 year water supply and application of water
4 use covenants, the maximum density may be lowered to one dwelling unit per 40 acres. If
5 an on-site geohydrological well test demonstrates an adequate 100 year supply of water
6 for additional lots smaller than 40 acres per dwelling unit, land may be further divided to
7 a minimum of 2.5 acres per dwelling unit. Density adjustments below one dwelling unit
8 per 160 acres must follow requirements as outlined in Article III, Section 10 and Article
9 VII, Section 6 of the Code along with all requirements outlined in this ordinance. Lots
10 may be divided below 40 acres as per the Code requirements cited above with the
11 following conditions:

12 5.4.1.1 Applications for division of parcels below 40 acres must include a full
13 geohydrological report with a 48 hour aquifer pumping test to demonstrate
14 availability of a 100 year supply of water. Geohydrological reconnaissance
15 reports will not be accepted as proof of water supply.

16 5.4.1.2 All geohydrological studies shall be reviewed and approved by the County
17 Hydrologist and shall meet all standards as applied by the New Mexico
18 Office of the State Engineer.

19 5.4.1.3 All hydrogeological reports shall assess the impact of the new well on
20 neighboring wells. Applicant shall provide a summary of findings of the

22 property line by certified mail. A letter by the applicant stating that the report
23 has been sent to adjacent landowners shall be submitted to the Land Use
24 Department. Those interested in reading the entire report may review a copy
25 at the County Land Use Department office or make other arrangements to
26 receive a copy.

29
30 5.9 Performance Standards for the San Pedro Contemporary Community Zoning District:

31 5.9.1 Residential Building Height:

32 5.9.1.1 Residential structures, windmills and wind turbines shall not exceed 24 feet
33 in height. Residential structures on 15% or greater slopes cannot exceed 15
34 feet in height.

35
36 5.9.2 Building Colors:

37 5.9.2.1 All structures including non-residential, residential and accessory structures
38 shall be a neutral or a darker shade of color that blends into the natural
39 surroundings such as the natural foliage or natural earth tones of the soils.

40
41
42 5.9.3 Light Reflective Values for Roofs of Residential Buildings:

1 5.9.3.1 All residences and accessory structures shall have a 'light reflective value'
2 (LRV) of 40 or less for roofs.

3

4 5.9.4 Lighting

6 a) All outdoor lighting shall be shielded.

7

8 5.9.4.2 Light Pole Height:

9 a) Poles with lights cannot exceed 24 foot in height or one and one-half
10 (1.5) times the height of the tallest structure on the property,

24 (see map is Section IVX.) identifies some of the potential ridgetop areas in
25 the Planning Area. Residential dwelling units shall be permitted on ridgetops
26 only if the entire property is classified as a ridgetop and the landowner would
27 have no alternative buildable site on the property. In such cases, all Code
28 design standards for building on slopes and ridgetops shall apply.

29 5.9.5.2 Land divisions and subdivisions should be platted in a manner that does not
30 create new lots which contain only ridgetop areas. The intent of this
31 requirement is to prevent new lots from being created that avoid the ridgetop
32 protection requirement in 5.10.5.1 by creating new lots with the only

34

35

36

37

38

39 5.9.5.3 In order to preserve the unobstructed horizons in San Pedro, no portion of a

5 slope less than fifteen percent (15%) that includes the prominently
6 visible portion of a hill or mountain that sits above an area having an
7 average slope greater than twenty percent (20%) on one or more
8 sides. Where a ridgetop measures more than three hundred feet
9 (300') from shoulder to shoulder (a mesa), the ridge top standards
10 and requirements for architecture and buffers shall apply within one
11 hundred and fifty feet (150') of the shoulder of the ridge. A ridge
12 formation which does not contain a buildable area of at least one
13 thousand and two hundred (1,200) square feet will not be classed as
14 part of the buildable area for purposes of construction of a primary
15 residential structure. County standards to be applied include but are
16 not limited to Article III, Section 2.3.8 – *Architectural Appearance*
17 *Standards* and Article III, Section 2.3.10 b) – *Preservation and*

30 and preserve existing vegetation.

32 verifying depth of base course and drainage bar ditches.

33
34 5.9.8 Noise

2 (200') from any existing or planned water supply or well. This will not apply to existing,
3 legally recognized lots that are smaller than 2.5 acres.

4 5.10.2 Septic systems that utilize alternative wastewater treatment techniques such as but not
5 limited to wetlands, composting toilets, and gray water reuse "split-system" ("gray water-
6 black water") technology shall be permitted, providing that they meet all New Mexico
7 Environment Department (NMED) regulations.

21 Albuquerque metropolitan areas, all notices required by the County, including the Land
22 Use Department and the Planning Division, shall be published in the regional newspaper
