8. PREFERENCES IN PROCUREMENT:

***New Mexico In-state Preference.***

- A. New Mexico law, Section 13-1-22 NMSA 1978, provides a preference in the award of a public works contract for an **"in-state resident contractor"**. Application of a resident contractor preference requires the bidder to provide a copy of a valid and current certificate as a resident contractor. Certificates are issued by the state taxation and revenue department.

If a bidder submits with its bid a copy of a valid and current in-state resident contractor certificate, the bidder's bid will be deemed to be 5% lower than the bid actually submitted.

Certification by the department of taxation and revenue for the resident contractor takes into consideration such activities as the business or contractor's payment of property taxes or rent in the state and payment of unemployment insurance on employees who are residents of the state.

**OR**

**B. *New Mexico Resident Veteran Preference.***

New Mexico law, Section 13-1-22 NMSA 1978, provides a preference in the award of a public works contract for a "**resident veteran contractor**". Certification by the department of taxation and revenue for the resident veteran contractor requires the bidder to provide evidence of annual revenue and other evidence of veteran status.

A bidder who wants the veteran contractor preference to be applied to its bid is required to submit with its bid the certification from the department of taxation and revenue and the sworn affidavit attached hereto as Appendix C.

If a bidder submits with its bid a copy of a valid and current veteran resident contractor certificate, the bidder's bid will be deemed to be 10%, 8% or 7% lower than the bid actually received, depending on the business' annual revenue.

**The in-state resident contractor preference is not cumulative with the resident veteran contractor preference.**

The in-state and veteran preferences do not apply to procurement of services or goods involving federal funds or federal grant funds.

Additional information about obtaining the certificate as a resident contractor and resident veteran contractor may be found at:

<http://www.tax.newmexico.gov/Businesses/Pages/In-StatePreferenceCertification.aspx>.

9. **SUBCONTRACTORS, SUPPLIERS AND OTHERS:** The contractor shall be required to fully comply with the Subcontractors Fair Practices Act, NMSA 1978, 13-4-31 to 13-4-42.
  - A. The contractor, in the bid documents, must identify in writing to the County those portions of the work that it proposes to subcontract and after the Notice of Award, may only subcontract other portions of the work with the County's written consent.
  - B. Any subcontractor who will be providing more than \$5,000 or one-half of one percent of the architect's or engineer's estimate of the total project cost (not including alternates) whichever is greater for any service, must be listed on the Subcontractor Listing. The subcontractor listing threshold for this IFB is \$5,000.
10. **SUBSTITUTIONS:** The materials, products, and equipment described in the Bid Documents establish a standard of required function, dimension, appearance and quality to be met by any proposed substitution. No substitution will be considered prior to receipt of bids.
11. **WAGE RATES/REGISTRATION WITH THE LABOR AND INDUSTRIAL DIVISION OF THE LABOR DEPARTMENT:** The contractor shall be required to fully comply with the Public Works Minimum Wage Act, NMSA 1978, 13-4-11 thru 13-4-17. If the minimum

wage rate determination for the project is not included in the initial Bid Documents, it will be furnished in an addendum.

A contractor or subcontractors who submit a bid valued at more than sixty thousand dollars (\$60,000) for a public works project that is subject to the Public Works Minimum Wage Act must be registered with the New Mexico Workforce Solutions at the time of the bid opening. The registration number shall be provided in the bid submitted by the contractor in the space provided for subcontracts with work proposed. After the bid opening, the registration numbers will be verified by the County and the bid will be determined to be non-responsive and disqualified if the registration numbers are “inactive” and the contractor does not provide proof of the required registration for itself or its subcontractors for work proposed over sixty thousand dollars (\$60,000).

For a public works contract whose value is \$60,000 or more, the NM Public Works Minimum Wage Act, 13-4-11 NMSA 1978, also requires all tiers of subcontractors to submit certified weekly payroll records to the general contractor and the County biweekly. If this provision applies, the contractor shall, and shall require all tiers of subcontractors, to submit certified weekly payroll records to the contractor and the County’s Project Manager for this project.

12. **BID FORM:**

- E. All names must be typed or printed below the signature.

13. **BID SECURITY:** Each individual bid shall be accompanied by bid security equal to 5% of the amount of the bid. Such bid security shall be in the form of a certified or cashier’s check made payable to the County or a surety bond issued by a surety authorized to conduct business in the State of New Mexico and who is approved in federal circular 570 as published by the U.S. Treasury Department.

By submitting the bid and providing the bid security, the bidder pledges to enter into a binding contract with the County and will furnish bonds covering the faithful performance of the contract and payment of all obligations arising hereunder.

The County will have the right to retain the bid security of bidders to whom an award is being considered until either the contract has been executed and bonds, if required, have been furnished or the specified time has elapsed so that bids may be withdrawn or all bids have been rejected.

14. **POWER OF ATTORNEY:** Attorneys in fact who sign bonds must attach certified effective copies of their Power of Attorney to all bonds.
15. **QUALIFICATION OF BIDS:** All contractors and subcontractors must have a valid New Mexico license appropriate to the work herein specified at the time the bid is submitted.

Prior to the time and date designated for receipt of bids, a bid submitted may be modified or withdrawn by notice to the County at the address designated for receipt of bids. Such notice shall be in writing and signed by the bidder.

Upon receipt such written confirmation shall be date and time stamped by the County on or before the date and time set for receipt of bids. A modification of a bid shall be worded as not to reveal the amount of the original bid.

18. **GROSS RECEIPTS TAXES:** The amount of the bid shall exclude applicable New Mexico Gross Receipts Taxes or applicable local option taxes. The applicable gross receipts tax or applicable local option taxes shall be computed and shown as a separate amount on each request for payment made under the contract.

20. **BID OPENING PROCEDURE:** The person or persons opening the bids shall verify that the requirements of the Instruction to Bidders have been fulfilled, and shall read aloud the name of each apparently responsive bidder and the bid amount(s). If the lowest responsible bidder has otherwise qualified, the lowest bidder may negotiate with the County for a lower bid if the lowest bid is within **ten percent** over budgeted project funds in order to prevent all bids from being rejected. No change in the original scope and/or terms and conditions will be allowed. The County reserves the right to be the sole judge as to whether or not a different process, type of equipment or kind of material offered is in fact equal to that specified.
25. **LICENSE OR ROYALTY FEES:** Licenses and/or royalty fees for products or for processes must be paid for directly by the contractor.
26. **PERMITS:** It is the responsibility of the contractor and each subcontractor to obtain permits and inspections required by the County and/or the State of New Mexico or any other entity that may have jurisdiction over the construction.

Sheet: 4 of 5

Construction Specification 5--Pollution Control

1. Scope

The work consists of installing measures or performing work to control erosion and minimize the production of sediment and other pollutants to water and air from construction activities.

2. Erosion and sediment control measures and works

The measures and works shall include, but are not limited to, the following:

*Staging of earthwork activities*--The excavation and moving of soil materials shall be scheduled to minimize the size of areas disturbed and unprotected from erosion for the shortest reasonable time.

*Sediment filters*--Sediment filters shall be properly anchored to prevent erosion under or around them. These filters are temporary and shall be removed and the area restored to its original condition when they are no longer required or when permanent measures are installed.

3. Chemical pollution

The Contractor shall provide watertight tanks or barrels or construct a sump sealed with plastic sheets to dispose of chemical pollutants, such as drained lubricating or transmission fluids, grease, soaps, concrete mixer washwater produced as a by-product of the construction activities. At the completion of the construction work, sumps shall be removed and the area restored to its original condition. Sump removal shall be conducted without causing pollution.

Sanitary facilities, such as chemical toilets, or septic tanks shall not be located next to live streams, wells, or springs. They shall be located at a distance sufficient to prevent contamination of any water source. At the completion of construction activities, facilities shall be disposed of without causing pollution.

4. Air pollution

The burning of brush or slash and the disposal of other materials shall adhere to state and local regulations.

5. Maintenance, removal, and restoration

All pollution control measures and temporary works shall be adequately maintained in a functional condition for the duration of the construction period. All temporary measures shall be removed and the site restored to near original condition.

6. Measurement and payment

For Pollution control bid item, payment for installation and removal of pollution control measures is made at the contract lump sum price. Such payment will constitute full compensation for all labor, equipment, tools, applicable permits, and associated fees for disposal of refuse and all other items necessary and incidental to the completion of the work.

Construction Specification 6--Seeding, Stabilization, and Planting

1. Scope

The work consists of preparing the area for treatment; furnishing and placing seed, and stabilizing with certified weed-free straw in designated areas as specified. Planting of livestock willows and cottonwood poles during the dormant season shall be permitted.

2. Material

Seed--All seed shall conform to the current rules and regulations of the state where it is being used and shall be from the latest crop available. It shall meet or exceed the standard for purity and germination listed in section 7.

Seed shall be labeled in accordance with the state laws and the U.S. Department of Agriculture rules and regulations under the Federal Seed Act in effect on the date of invitations for bids. Bag tag figures are evidence of purity and germination. No seed will be accepted with a test date of more than 9 months before the delivery date to the site.

*Livestakes - Willow livestockakes may be salvaged from designated areas on County property to be used in streambank plantings as shown on the Planting Plan. Willow plantings not harvested locally shall be of the species Salix exigua (Coyote Willow).*

*Cottonwood pole plantings may be salvaged from designated areas on County property or supplied by an approved nursery. Pole plantings not obtained locally shall be of the species Populus angustifolia (Narrowleaf Cottonwood) and shall be at least 3-5 inches in diameter and a minimum of 4-5 feet in length.*

*Straw mulch shall be certified weed-free straw, from a supplier approved by the New Mexico State University Noxious Weed Free Certification Program.*

3. Seeding mixtures and dates of planting

The application rate per acre for seed mixtures, plantings shall be as shown on the plans or as specified in section 7.

4. Seedbed preparation and treatment

Areas to be treated shall be dressed to a smooth, firm surface. The seedbed shall be prepared by hand methods by scarifying to provide a roughened soil surface so that broadcast seed will remain in place.

Rocks larger than 6 inches in diameter, trash, weeds, and other debris that will interfere with seeding or maintenance operations shall be removed or disposed of as directed by the Engineer.

5. Seeding, stabilizing, and planting

All seeding and planting operations shall be performed in such a manner that the seed or plantings are applied in the specified quantities uniformly in the designated areas. The method and rate of seed application shall be as specified in section 7.

The contractor shall maintain the stabilized areas until all work under the contract has been completed and accepted. Maintenance shall consist of the repair of areas damaged by water erosion, wind, fire, or other causes. Such areas shall be repaired to reestablish the intended condition and to the design lines and grades required by the contract. The areas shall be reseeded before the new application of the certified weed free straw.

6. Measurement and payment

For items of work for which specific unit prices are established in the contract, each area treated is measured as specified in section 7 and the area calculated to the nearest square yard. Payment for treatment is made at the contract unit price for the designated treatment, which will constitute full compensation for completion of the work.

7. Items of work and construction details

All designated areas within the limits of disturbance shall be seeded after final grading of the site has taken place. These areas shall be overseeded with the following seed mix:

*Elymus canadensis* (canada wildrye), at a rate of 6.75 pounds per 1,000 square yards.

*Deschampsia cespitosa* (tufted hairgrass), at a rate of 1.8 pounds per 1,000 square yards.

*Juncus balticus* (baltic rush), at a rate of 0.45 pounds per 1,000 square yards.

Designated seeded areas shall be stabilized with certified weed free straw specified in Section 2. Straw mulch shall be hand broadcasted to a uniform depth of 2-3 inches at a rate of 0.85 pounds per square yard.

Contractor shall perform plantings in a manner that minimizes disturbance to the project area to the maximum extent practicable, and reseed and stabilize any disturbed areas resulting from planting activity.

Construction Specification 7--Construction Surveys

1. Scope

The work consists of performing all surveys, measurements, and computations required by this specification.

2. Primary control

The baselines and benchmarks for primary control, necessary to establish lines and grades needed for construction, are shown on the drawings and have been located on the job site. These baselines and benchmarks shall be used as the origin of all surveys, layouts, and measurements to establish construction lines and grades. The Contractor shall take all necessary precautions to prevent the loss or damage of primary control points. Any stakes or control points lost or damaged by construction activity will be reestablished by the Contractor or at Contractor expense.

3. Quality of work

All work shall follow recognized professional practice and the standards of the industry. The horizontal locations for all work shall be determined and recorded to the nearest 0.5 ft. The elevations for all work shall be determined and recorded to the nearest 0.05 ft vertical.

Before beginning work, the Contractor shall check and verify all established control points and shall advise the Engineer in writing that the points are acceptable or, if they are not acceptable, the reasons therefor.

Construction Specification 8--Mobilization and Demobilization

1. Scope

The work consists of the mobilization and demobilization of the Contractor's forces and equipment necessary for performing the work required under the contract, obtaining applicable permits if any are necessary for carrying out the work show in the drawings or as described in the specifications, and restoration of the site to a quality that is equal to or greater than of preconstruction conditions.

2. Equipment, material and work force.

Mobilization shall include all activities and associated costs for transportation of Contractor's personnel, equipment, and operating supplies to the site, premiums paid for permits, performance and payment bonds and per diem for Contractor's work force.

Demobilization shall include site restoration to a quality that meets or exceeds preconstruction conditions and appearances as approved by Engineer and all activities and costs for transportation of personnel, equipment, and supplies not required or included in the contract from the site, including the disassembly, removal, and site cleanup of facilities assembled on the site specifically for this contract.

1. Scope

The work consists of the control of surface water and ground water as necessary to perform the construction required by the contract in accordance with the specifications. It shall include: (1) constructing, installing, building, and maintaining all necessary temporary water containment facilities, channels, and diversions; (2) furnishing, installing, and operating all necessary pumps, piping, and other facilities and equipment; and (3) removing all such temporary works and equipment after their intended function is no longer required.

2. Bypassing surface water

The contractor shall install, maintain, and operate all cofferdams, channels, flumes, sumps, and all other temporary diversion and protective works needed to bypass streamflow and other surface water through or around the construction site. Control of surface water shall be continuous during the period that damage to construction work could occur. Unless otherwise specified and/or approved, the diversion outlet shall be into the same drainage way that the water would have reached before being bypassed.

The contractor shall furnish the Engineer, in writing, a proposed plan for controlling water before beginning any construction activities for which a diversion is required. Should construction occur during the irrigation season the Contractor shall be responsible for meeting the irrigation demands of all affected water users on the Rio Quemado during construction activity. Acceptance of this plan will not relieve the contractor of the responsibilities related to this activity during the process of completing the work as specified.

3. Dewatering the construction site

Foundations and all other parts of the construction site may need to be dewatered and kept free of standing water and debris to the extent necessary for the proper execution of the work. The contractor shall furnish, install, operate, and maintain all drains, sumps, pumps, casings, well points, and all other equipment required to properly dewater the site if required.

4. Erosion and pollution control

Removal of water from the construction site shall be accomplished so that erosion and the transporting of sediment and other pollutants are minimized. Dewatering activities shall be accomplished in a manner that the water table water quality is not altered. Pollution control activities shall not conflict with the requirements of Construction Specification 5, Pollution Control, if it is a part of this contract.

5. Removal of temporary works

Areas where temporary works were located shall be graded for slightly appearance with no obstruction to natural surface waterflows or the proper functioning and access to the works of improvement installed. The contractor shall exercise extreme care during the removal stages to minimize the loss of soil sediment and debris that was trapped during construction.

6. Measurement and payment

Items of work listed in the bid schedule for control of water, diverting surface water, and dewatering construction sites are paid for at the contract lump sum prices. Such payment will constitute full compensation for all labor, equipment, tools, and all other items necessary and incidental to the completion of the work.

Construction Specification 21--Excavation

1. Scope

The work shall consist of the excavation of soil required by the drawings and specifications and demolition and salvage of the existing diversion dam materials.

3. Disposal of waste materials

All surplus or unsuitable excavated materials are designated as waste and shall be disposed at an approved location.

4. Excavation limits

Excavations shall comply with OSHA Construction Industry Standards (29CFR Part 1926) Subpart P, Excavations, Trenching, and Shoring. All excavations shall be completed and maintained in a safe and stable condition throughout the total construction phase. Structure and trench excavations shall be completed to the specified elevations and to the length and width required to safely install, adjust, and remove any forms, bracing, or supports necessary for the installation of the work. All existing structures shall be maintained in a safe and stable condition throughout construction activities.

5. Measurement and payment

For items of work for which specific unit prices are established in the contract, the volume of each type and class of excavation within the specified pay limits is measured and computed to the nearest cubic yard by the method of average cross-sectional end areas. Regardless of quantities excavated, the measurement for payment is made to the specified pay limits except that excavation outside the specified lines and grades directed by the Engineer to remove unsuitable material is included. Excavation required because unsuitable conditions result from the Contractor's improper construction operations, as determined by the Engineer, is not included for measurement and payment. Payment for excavation is made at the contract unit price. Such payment will constitute full compensation for all labor, materials, equipment, and all other items necessary and incidental to the performance of the work except that extra payment for backfilling over excavation will be made in accordance with the following provisions.

Payment for backfilling over-excavation is made only if the excavation outside specified lines and grades is directed by the Engineer to remove unsuitable material and if the unsuitable condition is not a result of the Contractor's improper construction operations as determined by the Engineer.

Compensation for any type of work described in the contract, but not listed in the bid schedule is included in the payment for the item of work to which it is made subsidiary. Such items and the items to which they are made subsidiary are identified in section 6 of this specification.

6. Items of work and construction details

The Contractor shall verify the location of underground utilities. Omission or inclusion of utility items does not constitute non-existence or definite location. The Contractor shall secure and examine local utility records for location data, take necessary precautions to protect existing utilities from damage due to any construction activity and repair damages to utility items at Contractor's expense.

All excavated material suitable for backfill may be placed on the bed and banks of the channel to meet the design grades on the construction drawings.

Demolition and removal of material comprising the existing diversion dam is included under this Specification 21, Excavation. Usable material comprising the existing diversion structure shall be salvaged and stockpiled as directed by the Engineer. Unusable material shall be removed and disposed of at an approved location.

Contractor shall exercise caution in excavation operations so as to not disturb the trunk or roots of any trees identified for preservation.

Earthfill shall be placed in approximately horizontal layers. The thickness of each layer before compaction shall not exceed 12 inches.

Earth backfill shall be placed in a manner that prevents damage to the structures and allows the structures to assume the loads from the earth backfill gradually and uniformly.

5. Control of moisture content

During placement and compaction of earth backfill, the moisture content of the material being placed shall be maintained equal to the surrounding undisturbed soil material.

6. Compaction

Earth backfill adjacent to structures shall be compacted to a density equivalent to that of the surrounding in-place earth material. Compaction shall be accomplished by hand tamping or manually directed power tampers, plate vibrators, walk-behind, miniature, or self-propelled rollers.

7. Payment

Payment for bid item No. 9 structure backfill and site grading will be made at the lump sum contract price and will constitute full compensation for completion of work under this bid item.

8. Items of work and construction details

Geotextile material shall be Mirafit 600x Woven or approved equal.

4. Equipment-placed structure rock

The structure rock shall be placed by equipment on the surface and to the depth specified. The structure rock shall be delivered and placed in a manner that ensures the rock in place is reasonably homogeneous with the larger rocks uniformly distributed and firmly in contact one to another with the smaller rocks and spalls filling the voids between the larger rocks. Some hand placing may be required to provide a neat and uniform surface.

Hand placing is required as necessary to prevent damage to the geotextile fabric and structures. Contractor shall be responsible for material and labor costs necessary to replace any existing geotextile/structure that are damaged by Contractor's actions.

5. Method of payment

For items of work for which specific unit prices are established by the contract, the weight of structure rock is measured within the specified limits and computed to the nearest ton. Payment is made at the contract unit price for each type of structure rock. Such payment is considered full compensation for completion of the work.

- B. The Contractor agrees that work shall be prosecuted regularly, diligently and uninterruptedly at such rate of progress as will insure full completion thereof within the time specified. It is expressly understood and agreed, by and between the Contractor and the County, that the time for the completion of the work described herein is a reasonable time for the completion of the same, taking into consideration the average climatic range and usual industrial conditions prevailing in this locality.
