Question No. 1: Is Amorock Polymer concrete considered as approved alternate for the manholes calling for internal corrosion protection?

**Answer No. 1:** Armorock Polymer Concrete may be considered as an approved alternate for the manholes. If Contractor wishes to propose Armorock as an Or Equal or Substitute, Contractor shall submit a substitution request in accordance with Specification Section 01 25 00. Substitution requests will not be considered during the bid phase and will be reviewed during a period of 30 days after the date the Contract Times commence as noted in Specification Section 01 25 00 Item 1.3.C.1.

Question No. 2: Does the City have or maintain a polymer specification?

Answer No. 2: The project is being completed by Santa Fe County and will be subject to the requirements of the Santa Fe County Utilities Department. SFCU does not have a polymer specification.

Question No. 3: Does the City of Santa Fe, NM have an Approved Product List, Qualified Product List, or Approved Materials List, or specific design standards for sanitary sewers that the City follows for references?

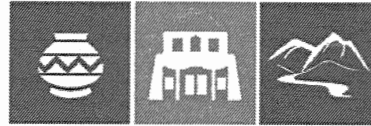

Answer No. 3: Design standards for sanitary sewers are included in Section D of the Santa Fe County 2014 Design Guide. SCFU generally follows the NM Standard Specifications for Public Works Construction with some modifications. SCFU has an Approved Materials List for water. Section D of the Santa Fe County 2014 Design Guide does not have an Approved Material List for sanitary sewers but does identify some manufacturers for some items.

Question No. 4 Will trenchless lining technologies other than CIPP be considered for the project? Specifically, Thermoform PVC Liner. Thermoform Liner is a structural PVC lining solution that offers a 50 year design life and 10 year manufacturer's warranty. Unlike CIPP lining technology where the liners are "cured" in the field creating the liner, Thermoform is factory manufactured offering a consistent and reliable finished product. Thermoform is Styrene Free providing a safer lining solution for the residents, environment and work crews. Thermoform Liner has been used over the years by Bernalillo County Water Utility.

Answer No. 4: Thermoform PVC Liner may be considered for the project. If Contractor wishes to propose Thermoform PVC Liner as an Or Equal or Substitute, Contractor shall submit a substitution request in accordance with Specification Section 01 25 00. Substitution requests will not be considered during the bid phase and will be reviewed during a period of 30 days after the date the Contract Times commence as noted in Specification Section 01 25 00 Item 1.3.C.1.

Please add this Addendum No. 2 to the original proposal documents and refer to proposal documents, hereto as such. This and all subsequent addenda will become part of any resulting contract documents and have effects as if original issued. All other unaffected sections will have their original interpretation and remain in full force and effect. Responders are reminded that any questions or need for clarification must be addressed to Tammy Jim, Procurement Specialist Senior at [tjim@santafecountynm.gov](mailto:tjim@santafecountynm.gov).
