Santa Fe County - Purchasing Division

II. INTRODUCTION

A. PURPOSE OF THIS REQUEST FOR PROPOSAL

The City of Santa Fe and Santa Fe County have been collaborating since 1998 to create a continuous greenway of public parks and trails along the Santa Fe River from downtown Santa Fe to the Waste Water Treatment Plant. Santa Fe River Greenway sections between downtown Santa Fe and Siler Road have been completed. The section between San Ysidro Crossing and Caja del Oro Grant Road has also been completed. Section B of the Santa Fe River Greenway is adjacent to both existing sections, located between Siler Road and San Ysidro Crossing.

The conceptual plans for the Greenway and all trail segments west of Frenchy’s Field was completed by the County in 2014. The conceptual plans contain the composite survey identifying all required properties, the new river channel, and trail alignment.

Public Works is requesting solicitation of professional engineering services to complete design for Section B (Siler Road to San Ysidro Crossing) of the Santa Fe River Greenway and for project construction oversight. Section B is an approximately 1.0-mile segment between completed Santa Fe River Greenway and river restoration projects. The project requires reconstructing the river using natural channel design principles. The engineer must use the channel morphology and pedestrian/bicycle trail profile that has been developed from the previous sections of the river in order to ensure continuity of design. The Santa Fe River Greenway project is being run by the Santa Fe County Projects Division, with direction from the Board of County Commissioners and the County Manager.

B. SCOPE OF WORK

The Scope of Work will include without limitation:

The selected vendor will provide complete engineering services from design through construction and project closeout for the river channel reconstruction using natural channel design principles described above and a pedestrian and bicycle trail for Section B from Siler Road to San Ysidro Crossing.

Design Guidance:

The proposed river channel design follows a Rosgen C4 channel classification. The design characteristics are a 44 ft. bank-full width, a 1 to 1.1% slope, and an average floodplain width of 100 ft. which gives an entrenchment ratio of 2.2. The channel cross section has a cross-section area of 60 cubic feet and a mean depth of 1.3 feet and a maximum depth of 1.6. The design goal is for an average meander length of 520 feet and sinuosity of 1.15.

The design should maximize the use of natural materials and native vegetation to stabilize the river channel and minimize the use of hardened structures and retaining
walls. The task is to balance optimum channel design with constraints imposed by existing structures and utilities. River bank disturbance during construction should be held to the minimum amount necessary to stabilize the banks and install erosion control structures only. An effort to leave existing, stable, vegetated bank areas is desired. The primary trail is a 10 ft. wide, concrete trail with 2 ft. recovery zones on both sides that meets AASHTO design standards for pedestrians and bicycles.

C. SERVICES AND DELIVERABLES:

Provide complete engineering services from design through construction for river channel reconstruction and a pedestrian and bicycle trail for Section B from Siler Road to San Ysidro Crossing to include the following:

1. Study and Report Phase:

The amount of discussion to be applied to each listed topic is an individual choice of the Offeror; however, discussion should be detailed enough to inform and educate the Evaluation Committee Members.

Proposals will be scored based upon a comparison of the information submitted by each Offeror against the evaluation factors outlined below. Each Evaluation Factor is assigned the following points:

1. Specialized Design and Technical Competence .............................................. 200 points
2. Evidence of Understanding the Scope of Work .............................................. 300 points
3. Capacity and Capability .................................................................................. 200 points

B. EVALUATION PROCESS

The evaluation process will follow the steps listed below:

1. All Offeror proposals will be reviewed for compliance with the mandatory specifications stated within the RFP. Proposals deemed non-responsive will be eliminated from further consideration.

2. The Procurement Manager may contact the Offeror for clarification of the response as specified in Section III, Paragraph B.7.

3. The Evaluation Committee may use other sources of information to perform the evaluation as specified in Section III, Paragraph C.18.

4. Responsive proposals will be evaluated on the factors in Section V that have been assigned a point value. The responsive Offerors with the highest scores will be selected as finalist Offerors ‘shortlisted’ based upon the proposals submitted. If an oral presentation is recommended the ‘shortlisted” firms will be provided questions by the Selection Committee for their “Oral Presentations”. Each presentation will be evaluated by the Selection Committee. The oral presentation that receives the highest points and is most advantageous to the County, will be recommended for contract award as specified in Section III, Paragraph B.11. Only the points from the Oral Presentation will be calculated for most and highest qualified firms. Points from the ‘shortlisted’ evaluations will only be used if there is a tie resulting from the Oral Presentations. Please note, however, that a serious deficiency in the response to any one factor may be grounds for rejection regardless of overall score.

5. Past performance in a project for the County is a significant consideration of the evaluation and poor performance on a prior County project may result in a lower number of points awarded to a proposal for this element of the evaluation.

RECITALS
WHEREAS, the County needs the services of a professional licensed engineer to provide Design Services for the Santa Fe River Greenway Project, Section B; and

WHEREAS, in accordance with Section 13-1-112 NMSA 1978 and the Santa Fe County Purchasing Regulations and Policy Manual, the County issued Request of Proposal (RFP) No2021-0150-PW/KE; and

WHEREAS, the County requires the services of the Engineer, and the Engineer is willing to provide these services and both parties wish to enter into this Agreement.

NOW THREFORE, in consideration of the premises and mutual obligations herein in Parts A and Part B of this Agreement, the parties hereto do mutually agree as follows:

1. PROJECT DESCRIPTION

The City of Santa Fe and Santa Fe County are planning and constructing a public greenway and trail system along the Santa Fe river (the Santa Fe River Greenway) from downtown Santa Fe to the City’s waste water treatment plant south of the Santa Fe airport. The project requires reconstructing the river using natural channel design principles. The section of the river between downtown Santa Fe and Frenchy’s Field has been completed. The section between Frenchy’s Field and Siler Road is currently under construction. The section between San Ysidro Crossing and Caja del Oro Grant Road has also been completed. The remaining section between Siler Road and San Ysidro Crossing is known as Section B. A 30% Conceptual Plan has been completed for Section B which identifies the Project limits, properties to be acquired for construction or the project and the location of the river channel and trail.

2. SCOPE OF WORK

The Scope of Work includes without limitations:

Provide complete engineering services from design through construction and project closeout for the river channel reconstruction using natural channel design principles described above and a pedestrian/bicycle/equestrian trail for Section B of the Santa Fe River from Siler Road to San Ysidro Crossing.

Design Guidance:

The proposed river channel design follows a Rosgen C4 channel classification. The design characteristics are a 44 ft. bank-full width, a 1 to 1.1% slope, and an average floodplain width of 100 ft. which gives an entrenchment ratio of 2.2. The channel cross section has a cross-section area of 60 cubic feet and a mean depth of 1.3 feet and a maximum depth of 1.6. The design goal is for an average meander length of 520 feet and sinuosity of 1.15.
The design should maximize the use of natural materials and native vegetation to stabilize the river channel and minimize the use of hardened structures and retaining walls. The task is to balance optimum channel design with constraints imposed by existing structures and utilities. River bank disturbance during construction should be held to the minimum amount necessary to stabilize the banks and install erosion control structures only. An effort to leave existing, stable, vegetated bank areas is desired. The primary trail is a 10 ft. wide, concrete trail with 2 ft. recovery zones on both sides that meets AASHTO design standards.

3. COMPENSATION, INVOICING, AND SET-OFF

A. In consideration of its obligations under this Agreement the Engineer shall be compensated as follows:

a. County shall pay to the Engineer in full payment for services satisfactorily performed and all costs and expenses shall be in accordance with Exhibit A (Compensation and Schedule).

b. The total amount payable to the Engineer under this Agreement, exclusive of gross receipts tax shall not exceed __________________________ ($________). Any New Mexico gross receipts tax levied on the amounts payable under this Agreement shall be paid by the County to the Engineer.

c. This amount is a maximum and not a guarantee that the work assigned to be performed by Engineer under this Agreement shall equal the amount stated herein. The parties do not intend for the Engineer to continue to provide services without compensation when the total compensation amount is reached. The County will notify the Engineer when the services provided under this Agreement reach the total compensation amount. In no event will the Engineer be paid for services provided in excess of the total compensation amount without this Agreement being amended.

B. The Engineer shall submit a written request for payment, on the form attached hereto as Exhibit B (Pay Request Form), when payment is due under this Agreement. Upon the County’s receipt of the written request, the County shall issue a written certification of complete or partial acceptance or rejection of the contractual items or services for which payment is sought. The Engineer acknowledges and agrees that the County may not make any payment hereunder unless and until the County has issued a written certification accepting the contractual items or services. Within 30 days of the issuance of a written certification accepting the contractual items or services, the County shall tender payment for the accepted items or services. In the event the County fails to tender payment within 30 days of the written certification accepting the items or services, the County shall pay late payment charges of one and one-half percent (1.5%) per month, until the amount due is paid in full.
C. In the event the Engineer breaches this Agreement, the County may, without penalty, withhold any payments due the Engineer for the purpose of set-off until such time as the County determines the exact amount of damages it suffered as a result of the breach.
