

**SANTA FE COUNTY  
PROFESSIONAL SERVICES AGREEMENT  
WITH MORRIS SURVEYING ENGINEERING, INC.  
TO PROVIDE SURVEYING SERVICES**

**THIS AGREEMENT** is made and entered into this 29<sup>th</sup> day of September, 2010 by and between Santa Fe County, hereinafter referred to as "the County", and Morris Surveying Engineering, LLC, a New Mexico limited liability company, with a principal address located at 1216 A Parkway Drive, Santa Fe NM 87507, hereinafter referred to as "the Contractor".

**WHEREAS**, pursuant to NMSA 1978, Sections 13-1-112 and 13-1-117, competitive, sealed proposals were solicited via a formal request for proposals, RFP No. 2010-0407-CSD/PL, for the provision of the professional services; and

**WHEREAS**, based upon the evaluation criteria established within the request for proposals for the purposes of determining the most qualified Offeror, the County has determined Contractor as a responsive Offeror; and

**WHEREAS**, the County desires to engage the Contractor to render surveying services for Santa Fe County, and the Contractor is willing to render such services; and

**WHEREAS**, the County requires these services and the Contractor is willing to provide these services and both parties wish to enter into this Agreement.

**NOW THEREFORE**, in consideration of the premises and mutual obligations herein, the parties hereto do mutually agree as follows:

**1. SCOPE OF WORK**

The Contractor shall for each project identified by the County:

- A. Provide County with a proposed budget for the project using the rates set forth in paragraph 2. If the County provides contractor written authorization to proceed with the project after a review of the budget, Contractor shall commence work.
- B. Determine what type of surveying is necessary from the definitions in NMAC Subsection A of 12.8.2.7 and shall conform to the requirements set forth in NMAC Sections 12.8.2.9 through 12.8.2.9 for that type of surveying and must also comply with accuracy standards in NMAC 12.8.2.16. If the surveying is not defined, then the Contractor shall conform to the requirements for unclassified surveying set forth in NMAC 12.8.2.15.
- C. Adhere to the County's digital submission requirements which specifies the format of all digital data submitted to the County for development review and recordation. The digital data shall be representative of features on the ground and is not intended to convey legal boundaries of any kind. The County's digital submission was implemented to: a) improve the design and plan review processes within the County by following modern professional standards for geographic data; b) improve the

County's GIS mapping through the inclusion of new developments in a standard geographic format; c) provide data that meets accuracy standards required for new parcels and infrastructure improvements consistent with the County's geodetic control network; and d) improve the County's foundation of geographic information to support community decision-making.

D. Geodetic Control:

a) Santa Fe County will make available all Geodetic Control Information to be used for survey purposes. All coordinate values for these survey points shall be in the New Mexico State Plane System using the North American Datum (NAD83), New Mexico Central Zone 3002. All measurements shall be in US Survey Feet.

b) All drawing elements shall be submitted referencing New Mexico Plane Coordinates. Features in drawing files that are stored in drawing units (artificial 0,0) must be translated to represent real world locations as referenced by New Mexico State Plane coordinates. All horizontal measurements shall reference the North American Datum of 1983 (NAD83) NSRS using US Survey Foot. Vertical control will reference the North American Vertical Datum of 1988 (NAVD88) using US Survey Foot.

c) Contractor shall tie the boundary into at least two of the above mentioned survey control network monuments. Positional accuracy of any digital submittal should be +/- 1ft. The basis of bearing for the plans must be in NAD83 (NSRS) coordinate system.

d) It is not the intention of the County to replicate legal surveys. With this in mind, control of plan features may be tied to the New Mexico State Plane Coordinate system using traditional surveying or GPS methods.

E. Data Formats:

a) In addition to the final plats, plans, and as-built drawings submitted in hard copy format, a digital data file shall be provided to the County in one of the following formats:

- 1) DGN (Microstation design file)
- 2) DXF (AutoCAD drawing exchange file)
- 3) DWG (AutoCAD drawing file)

b) All digital files must be mapped to scale and submitted to the County on CD-ROM, or via e-mail. The digital files must be named using the development name (e.g. WestSanfrancisco\_Phase2.dxf). The CAD file shall contain text in standard fonts that can be read without third party software.

c) No annotation shall be included in any feature layer and no feature shall be included in any annotation layer.

d) No polylines or annotations shall be stored in blocks. Explode all blocks that do exist.

e) Since polygonal closure is critical in converting CAD features to GIS features, all appropriate polygonal features (e.g. parcel boundaries, subdivision boundary, buildings) shall be "snapped" closed.

f) Submitted CAD files shall contain only complete polygon features. All partial parcel polygons shown for reference (e.g. along the boundaries) shall not be included in the PARCELS layer. Such features can be included in an unnamed layer in the submitted CAD file.

F. Data Layering Requirements

a) In order to improve the efficient use of this data in the County's GIS, the digital data shall use the following layering scheme:

<b>DIGITAL DATA LAYERING SCHEME</b>	
<b>LAYER NAME</b>	<b>DESCRIPTION</b>
BDRY perimeter (pline)	Subdivision Boundary Lines
ROW	Rights of Way
PARCELS interior (pline)	Subdivision lot lines
ESMTS	Utility, Trail & Drainage Easements
BLDGS (pline)	Building Footprints

b) Annotation submitted digitally must be identical to the annotation submitted on the hard copy filed with the County. All other miscellaneous annotation and information, such as north arrow and scale, shall be put on a separate layer.

c) Any geographic information other than specified above, such as parking lots, curb and gutter, etc., shall but put on a separate layer. The County may waive or adjust requirements specified herein upon a finding that the strict adherence of the requirements does not apply or is contrary to the long-term maintenance of the Geographic Information System (GIS) of the County.

G. Types of projects include but are not limited to the following:

a) Boundary survey; the determination, description, portraying, measuring, or monumentation of the boundaries of a tract of land. Contractor shall perform the following:

- 1) Obtain copies of relevant documents necessary to performed the survey and when available a copy of the title search for the tract being surveyed.
- 2) Review all recorded plats and all plats known to be available to the surveyor that are germane to the tract being surveyed.
- 3) Determine the relative location on the ground of all found existing monuments which pertain to the survey using procedures which achieve the minimum accuracy standards NMAC 12.8.2.16.
- 4) Tag found monument which are accepted by the surveyor and pertain to the boundary being surveyed with a metal tag, bearing the surveyor's license number.
- 5) Set new monuments in conformance with NMAC 12.8.2.17, unless permanent marker all ready exists.
- 6) Follow the rules and procedures, except for accuracy and monumentation standards, in the manual of instructions for the survey of public lands of the United States.
- 7) Never move, remove or obscure an existing monument unless it is first properly referenced and all dimensions necessary to preserve its location are reported on a recorded plat.
- 8) Updating a prior survey-if an existing survey is updated for any reason, the surveyor shall comply with the minimum standards in effect at the

time of the update unless the update is only to correct a minor scrivener's error.

- 9) Prepare a plat of the survey, unless the survey is only for re-monumentation of corners of the tract, as shown on a recorded plat, where some of the existing corners of the tract are recovered, whose measured dimensions on the ground are reasonably close to the record dimensions.
  - 10) Record the plat prepared in accordance with NMAC 12.8.2.9, Section J with the Santa Fe County Clerk.
- b) Topographic Survey includes; a measurement and portrayal of the configuration of the ground and/or the location and description of objects thereon. It may include the plotting and description of property boundary monuments and property lines on a topographic map provided;
- 1) Only existing monuments found at the time of the survey are shown and no boundary monuments are set.
  - 2) The following words are prominently shown on the topographic map: "This is not a boundary survey, apparent property corners and property lines are shown for information only. Boundary data shown is from previous survey referenced hereon."
  - 3) On topographic surveys with contour lines, the vertical accuracy of 90% of the points tested shall be within one half of the contour interval, unless otherwise stated on the survey.
  - 4) Conform to all accuracy standards as set forth in NMAC 12.8.2.16.
- c) Right of Way Surveying includes; The boundary surveying of right of way for acquisition or for locating existing right of way. The Contractor shall do the following;
- 1) Obtain a copy of the last recorded deed for the tract(s) affected by the existing or contemplated right of way and obtain copies of all existing right of way maps and conveyance documents available.
  - 2) Obtain a copy of all recorded plats and all plats and maps known to be available to the surveyor for the tract(s) affected by the existing or contemplated right of way.
  - 3) Make a diligent search on the ground, including the use of a metal detector, for all existing monuments, which pertain to the property boundaries intersecting the public highway right of way corridor being surveyed.
  - 4) Determine the relative location on the ground of all found existing monuments, which pertain to the survey using procedures, which achieve the minimum accuracy standards in NMAC 12.8.2.16.
  - 5) Tag all found and accepted monuments, which pertain to the survey, with a metal tag, bearing the surveyor's registration number, attached to the monument with a metal wire or strap.
  - 6) Set new monuments pursuant to NMAC 12.8.2.17 on the right of way limits at all changes in direction and at all points where property lines intersect, using procedures which achieve the minimum accuracy standards in NMAC 12.8.2.16, unless a permanent monument exists.

- 7) Follow the rules and procedures, expect for accuracy and monumentation standards, in the manual of instructions for the survey of public lands of the United States prepared by the Bureau of Land Management.
- 8) Whenever a tract of land is to be severed by a right of way acquisition, the surveyor shall locate property lines that intersect the right of way limits. The surveyor shall use all available documents, field data, including parole evidence and land title information to determine the length, location and bearing of the severed property line relative to the right of way limits. This includes surveying as many additional parcel boundaries as necessary which connect to the property lines intersecting the right of way in order to accurately locate the property lines affected by the contemplated right of way.
- 9) Prepare a plat of survey which contains all requirements of NMAC 12.8.2.13, Subsection J.
- 10) Record the plat prepared under NMAC 12.8.2.13, Subsection J, with the Santa Fe County Clerk. The plat shall be recorded within sixty (60) days of completion and will be considered complete when the surveyor signs and seals it.

H. Additional surveying services may include but not be limited to the following:

- a) Improvement Location Report to include the following:
  - 1) Improvement location reporting is the preparation of an improvement location report which is a narrative report, which may be accompanied by a sketch, and which is issued only to a title, abstract or escrow company or lending institution for the exclusive use in determining such things as insurability or value of a tract of land. It shall not be represented by the Contractor as being a property boundary survey.
  - 2) If the report contains a sketch, the sketch shall contain the following words which are printed as large and as prominently as any other works upon the sketch, "this report is not for use by a property owner for any purpose."
- b) Archaeological survey to include accurately assessing the relationship of archaeological sites in a landscape or to accurately record finds on an archaeological site.

- e) Foundation survey completed to collect the positional data on a foundation that has been cured. This is done to endure that the foundation was constructed in the location, and at the elevation, authorized in the plot plan, site plan or subdivision plan.
- f) Geological survey conducted for the purpose of recording the geological significant features of an area under investigation.
