Mr. Sisneros,

I am writing to express my full support for the proposed AES solar & battery project (BESS). As a wildland firefighter for 40 years I have seen first-hand the negative consequences on ecosystems, communities and wildland firefighters from a warming planet. It is essential we act now to diversify our power portfolio.

I have managed risk on wildland fires, hurricanes, and floods during my career. I fully understand the risk associated with this project and believe it will be mitigated during construction and oversight once it is built. The short and long-term benefits of this project to Santa Fe and the planet far outweigh the minimum risk associated with the construction of this facility.

Thank you for your consideration.

Sincerely,

George Broyles

USFS Retired & Eldorado resident
