We live in El Dorado where the dry desert winds blow up to 100 mph at times. Any mishap at this proposed for-profit AES facility will put neighboring communities at risk. Do not approve a facility that is not sufficiently prepared to handle extreme weather events just to make a profit. This project is not the answer to Santa Fe's energy needs. The location for this potentially dangerous for profit project has not sufficiently vetted this proposed location that is near to too many residential communities. Please join the 80% of these communities who say NO to this poorly- designed project.
