I opposed the AES installation on the Rancho Viejo property. I'm not against solar energy installations. However, this installation is too close to residential areas. These solar energy installations can be built in non-residential areas. It is not true that they need to be built Next to the load demand. The energy that they produce can be transferred anywhere on any the grid system. The risk that can happen is not worth its proposed location. The water that is needed to complete the project, and if a meltdown occurs would be detrimental to our water resource. Thank you for your consideration. Paul Olshefsky, 22 Maddog Drive Lamy, New Mexico.
