Hello, As a resident of Santa Fe county , I would like to voice my concerns regarding the plan to allow AES to build the battery storage facility so close to town, a prison , a school and in such a heavily populated area. Not only are the fire risks a concern but it is hard to believe that the county would even consider allowing this out of state conglomerate to use and contaminate our limited water supply while asking locals to conserve and protect the precious little water that we have. In the case of a fire, is there an evacuation plan for the prison, the schools? Are we really going to believe a company that would rather pay fines than actually make the facilities safer?

Please say no to the building of this risky undertaking and instead protect the lives and lifestyles of your citizens.

Kind regards, Penny Tracey
