The damage we all have done to our environment, whoever unintended, has cause real death, destruction of lives, homes, communities and economies. This is in contrast to the imaginary and hysterical backlash from those who fear change with no sense of self sacrifice or any sense of urgency to do all we can to halt and reverse climate change. The voters of Santa Fe County set a date and mandate to take action and I trust the county commissioners and administration to continue to be proactive towards our community goal of reaching sustainable energy in a timely fashion. I trust in the people on duty to keep our community's safety forefront as the AES project meets all County safety standards. Thank you, Harland Soper, Eldorado resident.
