All y'all,

This is my contribution to end the controversial Rancho Viejo Solar and Battery Storage Project. I hope CEC will find the ammunition here useful. Thanks so much for your dedication to ending this threat.

The environmental impact and minimal benefit of the facility make the risks of a lithium system unacceptable in the area chosen which is surrounded by homes. I have been working independently to research and find ways to stop the project being built in a very inappropriate location.

There is more to be done on this report – including editing and photography to place the facility in sight-lines from various homes nearby. This is as far as I can afford to take it for now. This is a living document and will evolve with your input and support. There are hearings upcoming in early July and the citizenry must be informed.

Primarily – the surrounding homes will experience at least 10% decrease in value as such facilities garner further criticism. Homeowners must make a stand.

Here is the first draft of:

## **SFC v RVP**

**Santa Fe County Versus Rancho Viejo Project  
– Lithium Energy Risks – Zero Benefit**

DEFENDING SANTA FE NEW MEXICO'S LAST BEST RESOURCE

# SFC v RVP

**Santa Fe County  
versus  
Rancho Viejo Project**

**Lithium  
Energy  
Risks –  
Zero  
Benefit**

**Environmental and Financial  
Losses for Homeowners**

(Click on Cover to link to downloadable file.)

## **Defending Santa Fe New Mexico's Last Best Resource**

The Hazards, Real Estate Losses, Economic Pitfalls, Grid Dynamics, Lack of Benefit, Tariff Impact, Opposition and Alternatives of the Proposed Rancho Viejo Solar and Battery Facility in Santa Fe County, New Mexico.
