

reduce waste

what's your style?

PRACTICAL

PLAYFUL

ADVENTUROUS

TRASHY

Nobody likes the trashy style. Take a simple step towards sustainability: carry your own mug! Most paper cups have a petroleum-based liner, so they cannot be recycled. Keep them out of the landfill by bringing a reusable mug. Most coffee shops offer discounts when you do!

- Paper cups are a major source of waste in the U.S. In one year, we throw out enough cups to equal 49 Empire State Buildings.
- Producing this many cups requires cutting down about 9 million trees each year. It also requires an annual water usage equivalent to 10,000 Santa Fe County households.
